LOGAN-GREGG HARDWARE COMPANY PITTSBURG

Wholesale Distributers of Hardware

== 1912 ==

OFFICES AND WAREHOUSE:

125-131 SEVENTH STREET

PRINTED BY PITTSBURGH PRINTING COMPANY, PITTSBURGH, PA.

IMPORTANT INFORMATION

TERMS OF SALE :

Payment is due on all sales upon delivery of the goods.

Additional time as noted below will be allowed while purchaser's credit standing continues satisfactory to us.

Limit of time, 60 days.

2% Discount allowed for Cash within 10 days.

1% on Lead and Oil.

No Discount allowed after 10 days.

All goods sold f. o. b. Pittsburg, unless otherwise specified.

Nails, Wire, Oils and Lead sold only on 10 days time.

MODE OF COLLECTION :

We render statement when account falls due. Receipt of our statement means a request for payment.

When accounts stand unpaid after due, we send notice, "Will draw on——inst." This gives time to anticipate our draft by remittance. Upon the day named we make draft with interest and exchange.

N. B.—We carry no running accounts with payments "on account." Each payment should close the account up to a specified date. Frequent buyers are expected to balance accounts once a month.

CLAIMS :

Our shipments are delivered to Transportation Co. in good order, and are shipped at the risk of buyer. When goods arrive in bad order, receipt for them noting this fact and make claim on the Transportation Co.

Claims for overcharge or shortage must be made immediately upon receipt of goods.

We are not responsible for goods delivered to messengers or to other houses, nor to stations where there is no Agent. All such deliveries are at buyers' risk.

BACK ORDERS :

We aim to carry a full stock and complete orders at one shipment.

When this is impossible, we send a memorandum of Back Order and request customer to advise if shipment is not desired.

Unless we receive such notice if goods are seasonable or special we ship soon as received. Regular staple articles of insufficient weight to make a separate shipment we hold for next order.

Customers are expected to pay the regular railroad charges.

OUR SPECIAL BRANDS

This brand is used to denote quality. All "Sterling" brand goods are covered by our personal guarantee and are strictly first quality. At the same time they are moderate in price, our aim being to furnish a high grade article which can be sold at a moderate price.

This brand we have used for a great many years. It is used to designate goods of dependable quality, but which are not necessarily covered by our personal guarantee. It is a recognized standard of quality among the trade.

This is our brand for popular priced goods. It is never placed upon goods which have nothing but price to recommend them, but denote good quality at a low price. It has been in use a long time and has a recognized standing with the trade.

Customers giving preference to these brands are sure of getting full value for their money. Goods so branded are desirable because they command good prices on account of their quality and because competition in them is considerably more restricted than in many manufacturers' brands.

THE HOME OF THE STERLING BRAND

We have additional room in the adjoining building which gives us over 100,000 square feet of floor space.

"STERLING BRAND FOR QUALITY STANDS"

INDEX

In compiling Index our aim has been to catalogue all items at least twice; frequently oftener; so that the item sought may be readily found.

First, under the noun, thus:

SHOVELS

Coal 263

This being the usual form of indexing, we have used bold-face capitals for the noun and light-face type for the adjective.

Second, the words are printed in regular order in light-face type, thus:

Coal Shovels 263

Under the noun (or last word) headings, everything is indexed in detail, and as the type is bold and prominent we suggest looking for the item wanted under such headings.

Continuous spring in case holds each chisel firmly in place and relieves the hinge of the strain

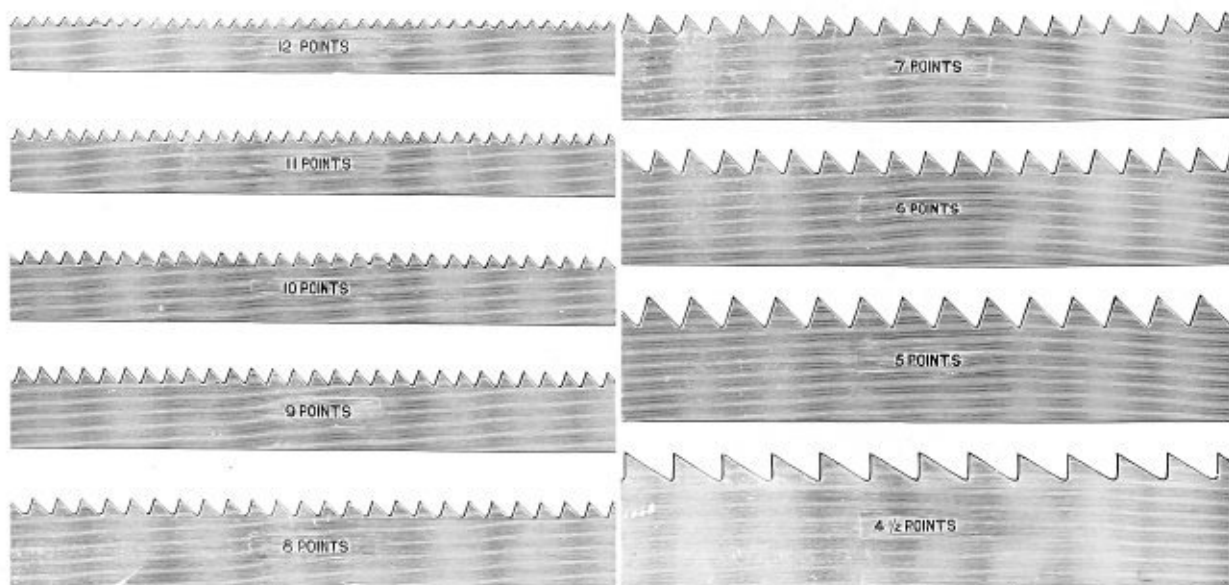

Per set \$ 7.00

Sterling butt chisels are highest grade throughout. Highly finished and fitted with large handles, designed more particularly for exclusive hand work. Useful where any light work is to be done or where it is desired to get close to the work. Also recommended for manual training and amateurs' use.

"STERLING BRAND FOR QUALITY STANDS"

HAND SAWS

CROSS CUT AND RIP TEETH

The above cuts are full size of the respective number of teeth and points per inch which they represent. Orders should always specify the number of points, care being taken to observe that there is **one tooth less** than there are points in 1 inch space.

Rip saw teeth are graduated from butt to point of blade, the narrow end being one point to the inch finer than at butt; the points being measured at butt of blade.

Sterling.—Skew back. 26-inch. Fine crucible steel. Full width, highly polished. Etched. Polished handle. 5 brass screws. Fully warranted. 6, 7, 8, 9, 10, 11 and 12 points.....Per dozen \$ 18.00

SAW CLAMPS PERFECTION

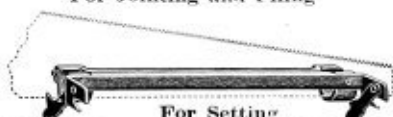

Perfection.—Japanned. 11-inch jaws. Holds saw firmly. Instantly adjustable. May be firmly attached to bench or other wooden object without screws or nails, or may be fixed permanently to the same in a moment. Lever folds back when not in use. One-twelfth dozen in a box Per dozen \$ 11.00

ATKINS' "AAA"

For Jointing and Filing

For Setting

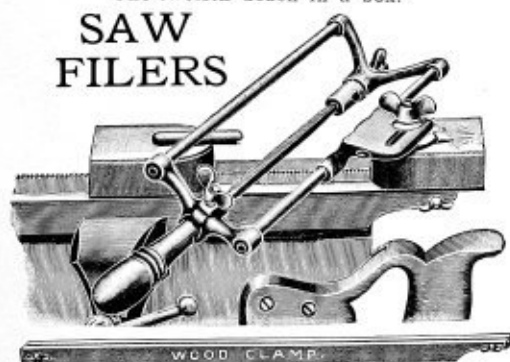

Atkins' "AAA".—Japanned steel. 12 $\frac{3}{4}$ -inch jaws. Filing space between jaws 9 $\frac{1}{2}$ inches. Weighs a little over 1 pound and will take up about as much room as a chisel. May be conveniently carried in any kit. Used for either jointing or setting, and being seated close to the work does not quiver and needs no wooden prop. As will be seen by above illustrations the saw is placed in clamps at tooth edge for jointing and filing, when all parts and teeth are easily accessible. For setting the teeth the vise is reversed—the blade being then clamped at the back. Per doz. \$ 16.00
One-fourth dozen in a box.

DIKEMAN'S FOLDING

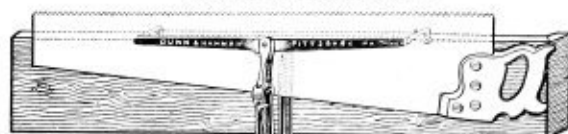

Dikeman's.—All steel, finished in combination of black enamel and polished nickel. 11 $\frac{1}{2}$ inches long with a filing section 10 $\frac{1}{2}$ inches. Made of T and channel steel; it is light and strong, weighing about 2 lbs. The back jaw has a moulded rubber pad which prevents noise. The saw is clamped the entire length of the jaws by means of the folding handle and can be jointed as well as filed by inverting the vise. Per dozen \$ 18.00
One-twelfth dozen in a box.

SAW FILERS

Wilson.—Saw filer. Japanned frame. Bright steel rods. Complete with wood clamp, 32 inches in length. Easily adjusted. With its aid any person can file a saw correctly, keeping the teeth the same as when new. Filer may also be used on any ordinary iron saw clamp or vise. Each \$ 2.50

GUNN'S FOLDING

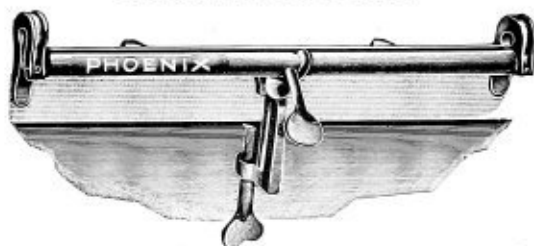

PATENTED
AND

JULY 29th 1895
NOV. 24th 1896

Gunn's.—Japanned malleable iron. 14-inch jaws. Folds up like a jack knife so that it can be carried in the pocket. Occupies no more space in tool box or chest than a hatchet or hammer. One particular feature is that it is self-fastening and can be fastened anywhere. Substantially built and neatly finished. Per dozen \$ 18.00
One-half dozen in a box.

PHOENIX FOLDING

No. 5.—Phoenix. Malleable iron and steel, finely finished. 12-inch jaws, rubber inserted. Light and strong and holds any style saw. Dimensions 2x2 $\frac{1}{2}$ x12 inches—easily carried from place to place. Per dozen \$ 15.00
One-twelfth dozen in a box.

Above planes are called "One Piece" from their great solidity. The entire surfaces of the frog are in contact with the plane iron on one hand and the plane bottom on the other, and are so perfectly fitted that, from the plane iron to the bottom of the plane is as one solid piece of metal. The frog is machined, not ground. The tongue and groove on the sides of the two pieces cause them when adjustment is necessary to move on one another absolutely in a straight line. No shifting or wobbling of the frog. Easily adjustable at the mouth, so that to change from hard wood to pine means scarcely a moment's delay.

STANLEY'S LOW ANGLE

- No. 62.—Low angle block. 14 inches in length. 2-inch cutter.....Each \$ 2.85

The construction of this plane is such that it is especially adapted for use in cutting across the grain on heavy work, where more power is required than can be obtained by use of the ordinary block plane. The plane is fitted with patent adjustable throat, which enables the user to work equally well on hard or soft wood.

One in a box.

IMPROVED SCRUB

- No. 40.—Iron stock. 9 $\frac{1}{2}$ inches in length. 1 $\frac{1}{4}$ -inch cutter.....Each \$ 1.10
No. 40 $\frac{1}{2}$ —Iron stock. 10 $\frac{1}{2}$ inches in length. 1 $\frac{1}{2}$ -inch cutter.....Each 1.50

This plane has a single iron, with the cutting edge rounded. This makes it particularly suited for roughing down work before using a Jack or other plane.

One in a box

CABINET MAKERS' RABBIT

- No. 92.—Rabbit. 5 $\frac{1}{2}$ in. in length. $\frac{3}{4}$ -inch cutter
Each \$ 2.20
No. 90.—Bull-nose. 4 in. in length. 1-inch cutter
Each 2.20

These planes are designed for fine cabinet work where extreme accuracy is required. The sides and bottom being square with each other the plane will lie perfectly flat on either side and can be used right or left.

Both the cutter and width of throat opening are adjustable. Nickel-plated and fitted with the "Handy" feature.

One in a box

SIDE RABBIT

- No. 98.—Side rabbit. 4 inches in length. Right hand Each \$ 1.00
..... One in a box.

- No. 99.—Side rabbit. 4 inches in length. Left hand.
Each \$ 1.00
..... One in a box

Planes numbers 98 and 99 above listed make a convenient tool for side-rabbiting and trimming dados, mouldings and grooves of all sorts. A reversible nose-piece will give the tool a form by which it will work close up into corners when required.

BULL NOSE RABBIT

- No. 75.—Bull-nose rabbit. 4 inches in length
1 inch cutter Each \$.40

This plane made for working close up into a corner and will be found a very convenient tool.

One in a box.

STANLEY'S PATENT ADJUSTABLE PLANES

CARRIAGE MAKERS' RABBIT

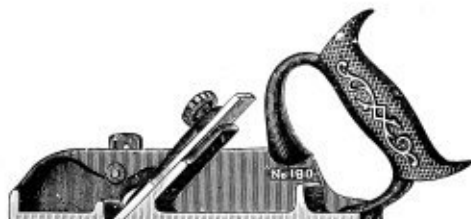

- No. 10 $\frac{1}{2}$.—9 $\frac{1}{2}$ in. in length. 2 $\frac{1}{8}$ -inch. cutter. Each \$ 2.75
 No. 10. — 13 in. in length. 2 $\frac{1}{8}$ -inch cutter. Each 3.30

Carriage makers' rabbit, with handle. Patent adjustments. A very strong and serviceable tool. Cutter is entire width of bottom.

One in a box.

IMPROVED RABBIT

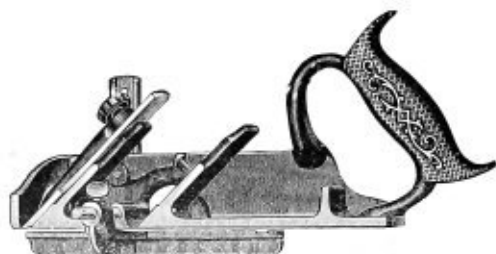

- No. 190.—Iron stock, 8 inches in length. 1 $\frac{1}{2}$ -inch wide, with spur.....Each \$ 1.25
 No. 191.—Iron stock, 8 inches in length, 1 $\frac{1}{4}$ -inch wide, with spur.....Each 1.25
 No. 192.—Iron stock, 8 inches in length, 1-inch wide, with spur.....Each 1.25

These planes will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces. All fitted with a depth gauge.

One in a box.

RABBIT AND FILLETSTER

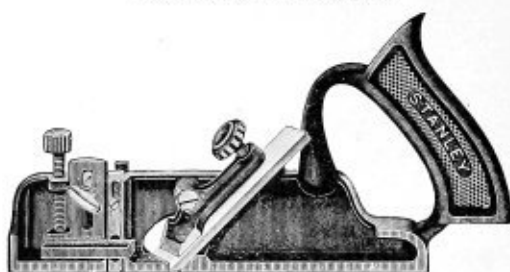

- No. 78.—Iron stock and fence. 8 $\frac{1}{2}$ inches in length. 1 $\frac{1}{2}$ -inch cutter.....Each \$ 1.65

The arm to which the fence is secured can be screwed into either side of the stock, thus making a superior right or left-hand filletster, with adjustable spur and depth gauge. Remove the arm to which the fence is secured, and a handled rabbit plane is had, and with two seats for the cutter, so that the tool can be used as a bull-nose rabbit if required.

One in a box.

IMPROVED DADO

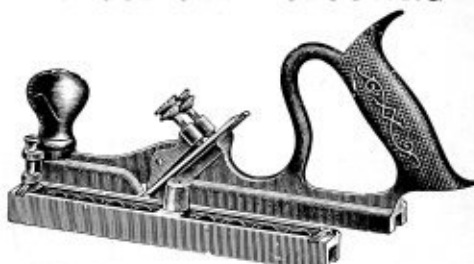

- No. 39.— $\frac{1}{2}$ -inch cutter. Iron stock 8 in. long. Each \$ 1.65
 No. 39.— $\frac{5}{8}$ -inch cutter. Iron stock 8 in. long. " 1.65
 No. 39.— $\frac{3}{4}$ -inch cutter. Iron stock 8 in. long. " 1.65
 No. 39.— $\frac{7}{8}$ -inch cutter. Iron stock 8 in. long. " 1.65
 No. 39.—1-inch cutter. Iron stock 8 in. long. " 1.65

The cutter is set on a skew. Plane is fitted with a depth gauge, adjustable by means of a thumb screw. Also with 2 adjustable spurs, which can be adjusted to take up wear as well as for depth of cut. In ordering be sure to specify size of cutter.

One in a box.

TONGUING AND GROOVING

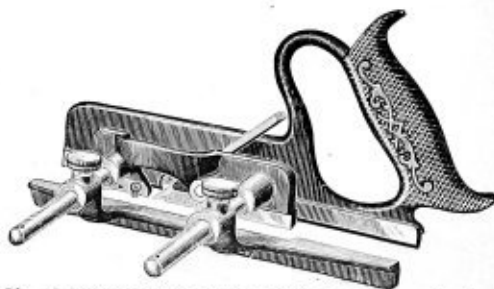

- No. 48.—Nickel-plated stock and fence, for $\frac{3}{4}$ to 1 $\frac{1}{4}$ -inch boardsEach \$ 2.75

Has two separate cutters, a suitable distance apart. When the guide or fence is set as shown above, both cutters work and a tongue can be made. The fence is hung on a pivot and can be swung around, end for end. This movement covers one of the cutters, and also furnishes a guide for grooving an exact match for the tongue.

One in a box.

BEADING AND MATCHING

- No. 50.—Nickel-plated stock and fence.....Each \$ 4.50

This tool, for ordinary beading or for center beading cannot be surpassed. By adjustment of the fence, center beading can be done up to 5 inches from the edge of a board. Except for working across the grain, the spurs need not be used.

With each plane are furnished beading tools, $\frac{1}{8}$, 3-16, $\frac{1}{4}$, 5-16, $\frac{3}{8}$, 7-16 and $\frac{1}{2}$ -inch, and a pair of $\frac{1}{4}$ -inch matching tools.

One in a box.

"STERLING BRAND FOR QUALITY STANDS"

STANLEY'S PATENT PLANES

ADJUSTABLE CIRCULAR

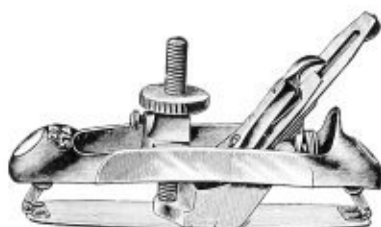

No. 113.—Adjustable circular, with 1¾-inch cutter.
Each \$ 3.00

By means of the graduated scale on the gears, the face can be accurately set to work an arc of the same circle, both concave and convex by turning the knob on the front of the plane. Cutter adjustments, end wise screw, lateral lever.

One in a box.

VICTOR CIRCULAR

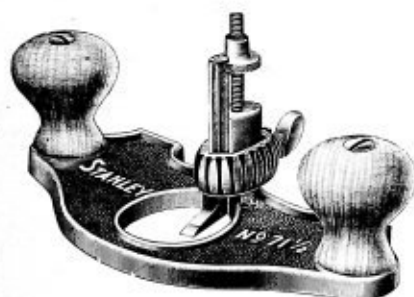

No. 20½.—Adjustable circular, with 1¾-inch cutter.
Each \$ 3.50

A very superior tool, and all its parts are specially designed with the object of eliminating any lost motion due to wear. There are less parts subject to lost motion in this plane than in any other circular plane. The ends of the flexible face being fixed and the force applied at the center great accuracy of adjustment is possible, and the face is most firmly held in position.

One in a box.

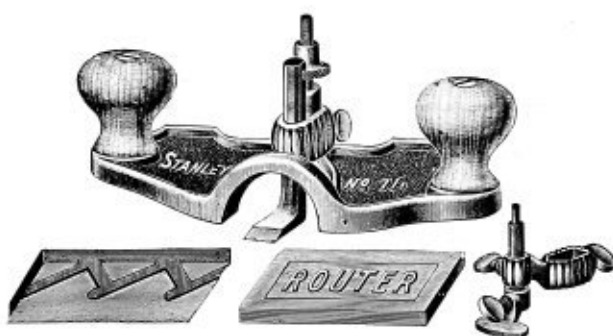

WOOD WORKERS' ROUTER WITH CLOSED THROAT

No. 71½.—Nickel plated stock, with steel bits, ¼ and ½-inch. With closed throat Each \$ 1.65

One in a box.

WOOD WORKERS' ROUTER

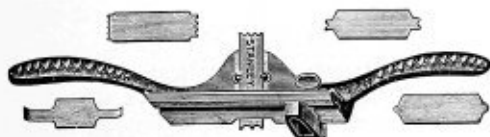

No. 71.—Nickel plated stock, with steel bits, ¼ and ½-inch Each \$ 2.05

One in a box.

The wood workers' router plane should be added to the kit of every skilled carpenter, cabinet maker, stair builder, pattern maker or wheelwright. It is perfectly adapted to smooth the bottom of grooves, panels or all depressions below the general surface of any wood work. The bits can also be clamped to the back side of the upright post, and outside of the stock. In this position will plane into corners, will router out mortises for sash frame pulleys, or will smooth surfaces not easily reached with any other tool. The attachment shown in the small cut is furnished with each plane. It can be substituted for the collar that holds the cutter when the work requires a plane with a closed throat.

STANLEY'S UNIVERSAL HAND BEADERS

No. 66.—Nickel plated stock, 11½ inches long. With 7 steel cutters Each \$ 1.00

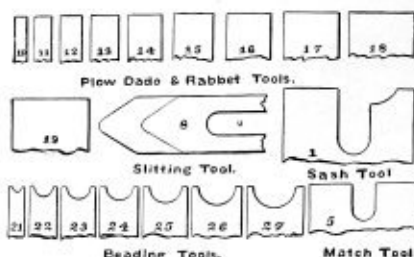

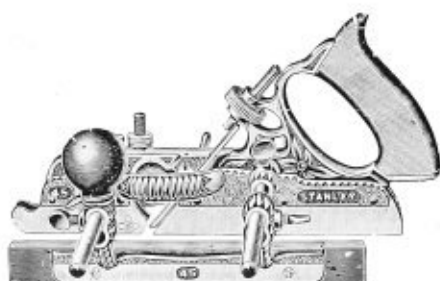

Raised handles of special iron and nickel finish. For beading, reeding or fluting straight or irregular surfaces, and for all kinds of light routing. With square gauge for straight, and an oval gauge for curved work. 7 superior steel cutters go with each tool. Both ends are sharpened thus embracing six ordinary sizes of beads, four sets of reeds, two fluters and a double router iron ⅝ and ¼-inch. The illustration to the right gives an idea of the work that may be done with this small beader.

One in a box.

"STERLING BRAND FOR QUALITY STANDS"

STANLEY'S PATENT PLANES

ADJUSTABLE BEADING, RABBET AND MATCHING

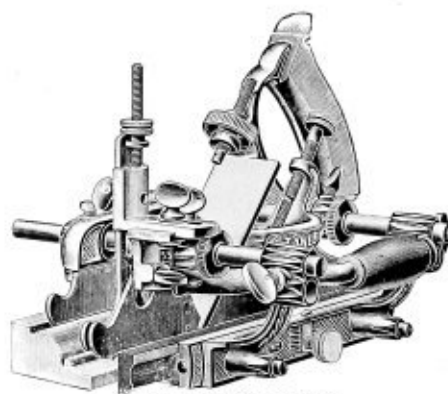

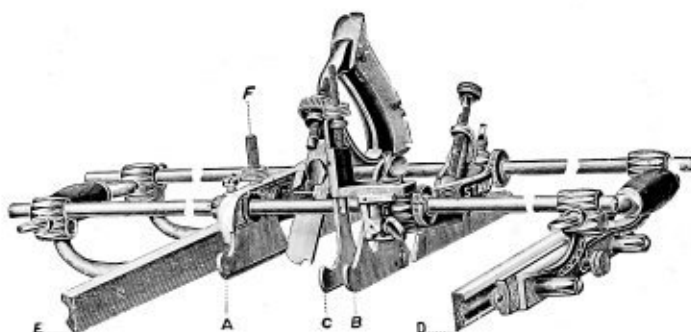

No. 45.—Nickel plated, with twenty tools, bits, etc., embracing beading and center beading plane, rabbet and fillet-ster, dado, plow, matching plane, sash plane and a superior slitting plane Each \$ 9.00

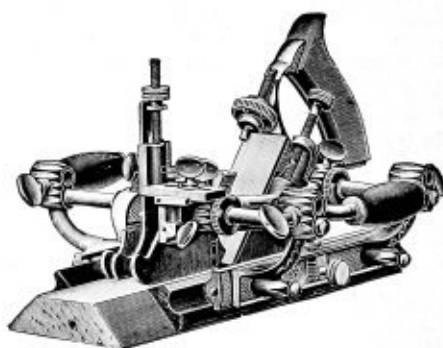

This plane combines a main stock and a sliding section so arranged that cutters of different widths can be used. Each plane is fitted with adjustable fence or guide and a depth gauge, and also with spurs for use in working across the grain. This plane can be used right or left hand. Each plane has seven beading tools ($\frac{1}{8}$, 3-16, $\frac{1}{4}$, 5-16, $\frac{3}{8}$, 7-16 and $\frac{1}{2}$ -inch), ten plow and dado bits ($\frac{1}{8}$, 3-16, $\frac{1}{4}$, 5-16, $\frac{3}{8}$, 7-16, $\frac{1}{2}$, $\frac{5}{8}$, $\frac{3}{4}$, and $\frac{7}{8}$ -inch), a slitting blade, a tonguing tool and a sash tool.

One in a box.

UNIVERSAL No. 55

As moulding plane.

As chamfer.

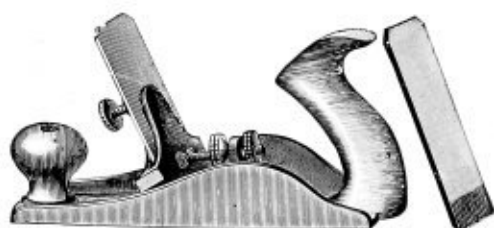

No. 55.—Stanley universal plane. Nickel plated. With 52 tools, bits, etc. Each \$ 18.00

This Plane consists of a main stock (A) with two sets of transverse sliding arms, a depth gauge (F) adjusted by a screw, and a slitting cutter with stop. A sliding section (B) with a patent vertically adjustable bottom. The auxiliary center bottom (C) is to be placed in front of the cutter, as an extra support or stop, when needed. This bottom is adjustable both vertically and laterally. Fences (D) and (E). Fence D has a lateral adjustment by means of a screw, for extra fine work. The fences can be used on either side of the plane, and the rosewood guides can be tilted to any desired angle, up to 45 degrees, by loosening the screws on the face. Fence E can be reversed for center beading wide boards. An adjustable stop can be used in beading the edges of matched boards is inserted on the left hand side of sliding section (B). By means of the patent adjustable bottom and the auxiliary center bottom it is possible to use a cutter of practically any shape with this plane. The 52 cutters are arranged in four separate cases, and the entire outfit is packed in a neat wooden box.

"STERLING BRAND FOR QUALITY STANDS"

ADJUSTABLE SCRAPERS

VENEER SCRAPERS

No. 112.—Adjustable scraper plane. 9 inches in length. 3-inch cutter Each \$ 2.20

This tool suitable for veneer, cabinet and floor scraping. The angle of the scraper blade can be adjusted. It can be used equally well as a tooth plane and will do excellent work in scraping off old paint and glue.

One in a box.

No. 12.—Adjustable veneer scraper. 6 1/4 inches in length. 3-inch cutter Each \$ 2.50

Has cutters the same as scraper plane above described and for many kinds of work its peculiar form is of great advantage.

One in a box.

ADJUSTABLE CABINET SCRAPERS

No. 80.—Raised handles. 11 inches in length. 2 3/4 inch cutter Each \$ 1.00

The blade of this scraper may be sprung to a slight curve by the thumb screw shown in center of cut. This will be found of great advantage in working.

One in a box.

No. 81.—Raised handles, nickel-plated. 10 inches in length. 2 1/2 inch cutter Each \$ 1.50

Designed for fine work, having a rosewood face which reduces friction and also prevents marring of the surface being worked upon. Face is detachable and can be removed, and either concave, convex, or irregular shaped blocks attached in its place as desired.

One in a box.

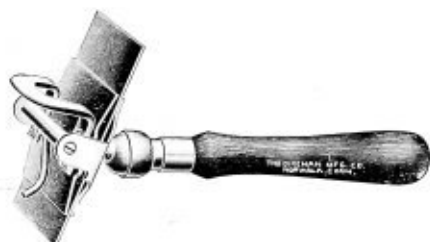

FLOOR SCRAPERS

No. 82.—14 1/2 inches in length. 3-inch cutter. Each \$ 1.05

Tilting device permits cutter to be easily and quickly adjusted to any angle required. Cutter stop screws can be adjusted to hold narrow cutters. Gives natural and easy position to the hands and balances well in working.

One in a box.

No. 125.—Reversible head. Ball joint Each \$ 2.00

Likeman all steel reversible head, ball joint. With the ball of the hand resting on the hand-rest, the fingers clasp the under side, it becomes the natural means for carrying the tool forward ready for the next cut. Holds any size blade and is adjustable all ways.

One in a box.

CABINET SCRAPERS

Polished cast steel.

No. 10.—Assorted, 2, 2 1/2, 3 and 3 1/2 inches in width, 6 inches long Per dozen \$ 1.20

No. 45.—4 inches in width, 5 inches long. " 1.60

No. 46.—4 inches in width, 6 inches long. " 1.70

One dozen in a box.

CORNERING TOOLS

No. 28.—5 1/2 inches long. Cutter 1-16 and 1/8-inch. Nickel-plated Each \$.40

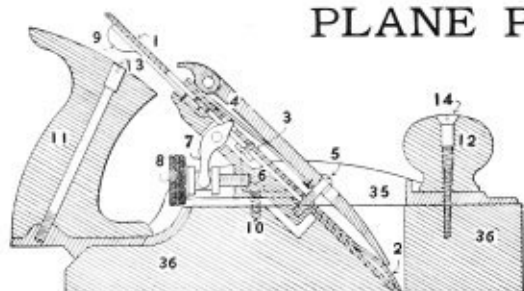

No. 29.—5 1/2 in. long. Cutter 3-16 and 1/4-inch. " .40

Used by wood workers in rounding sharp edges. Each number made with 2 different sized cutters—one in each end—so sharpened that operator can always cut with the grain without changing position of work. Requires no depth gauge.

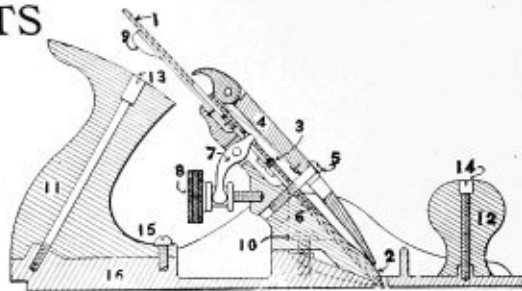

Six in a box.

ESSEX BOARD MEASURE

This measure is along the back of the body of the square and is used to ascertain the contents in feet and inches of boards of various lengths and widths. Full directions for using this measure are packed with each square. For squares marked with this measure see opposite page.

8 SQUARE OR OCTAGON SCALE

This scale is along the middle of the face of the tongue and is used for laying off lines to cut an 8 square or octagon stick of timber from a square one. Full directions for using this scale packed with each square. For squares marked with this scale see the opposite page.

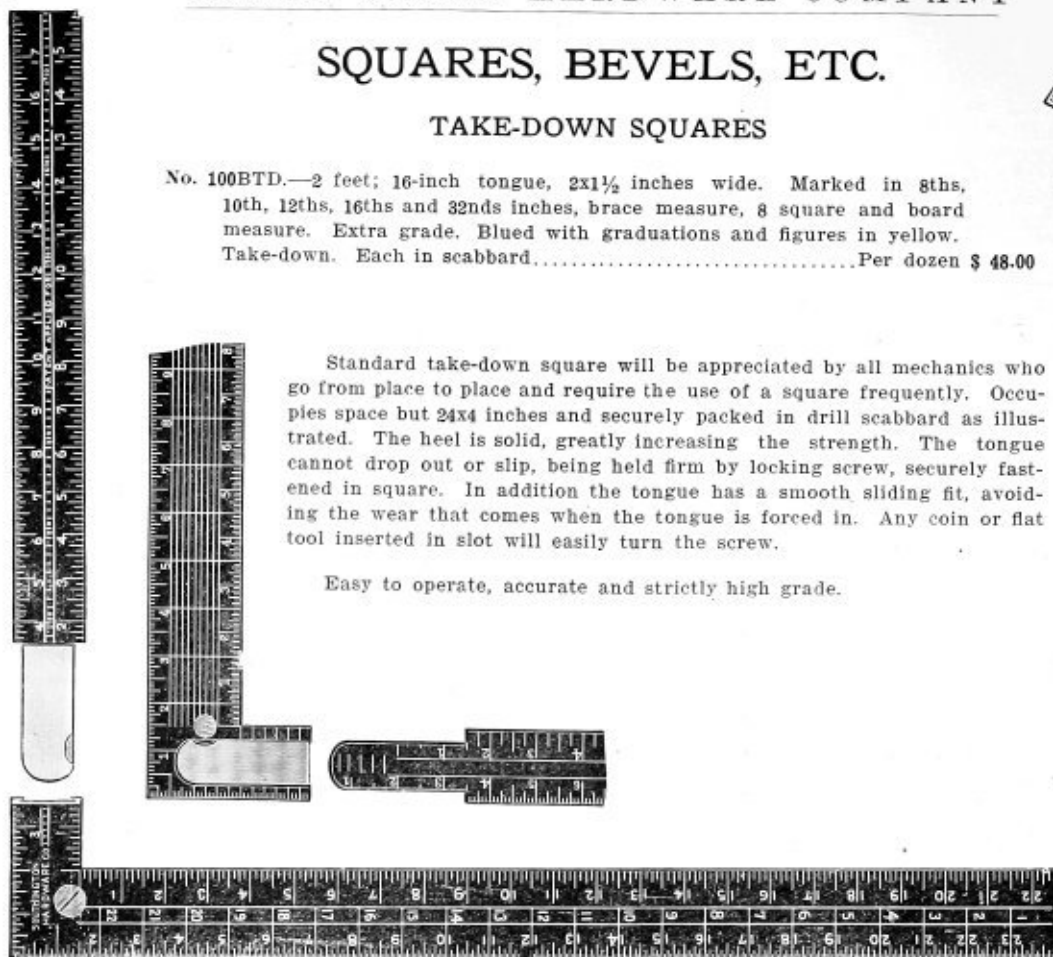

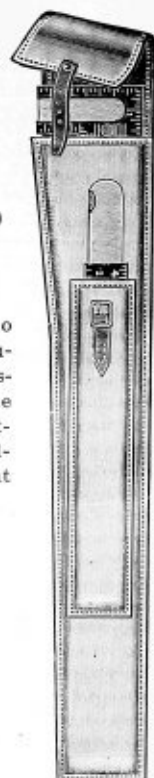

SQUARES, BEVELS, ETC.

TAKE-DOWN SQUARES

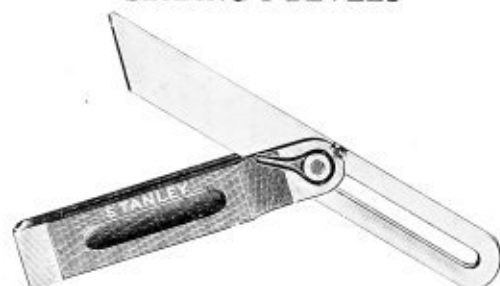

No. 100BTD.—2 feet; 16-inch tongue, 2x1½ inches wide. Marked in 8ths, 10ths, 12ths, 16ths and 32nds inches, brace measure, 8 square and board measure. Extra grade. Blued with graduations and figures in yellow. Take-down. Each in scabbard.....Per dozen \$ 48.00

Standard take-down square will be appreciated by all mechanics who go from place to place and require the use of a square frequently. Occupies space but 24x4 inches and securely packed in drill scabbard as illustrated. The heel is solid, greatly increasing the strength. The tongue cannot drop out or slip, being held firm by locking screw, securely fastened in square. In addition the tongue has a smooth sliding fit, avoiding the wear that comes when the tongue is forced in. Any coin or flat tool inserted in slot will easily turn the screw.

Easy to operate, accurate and strictly high grade.

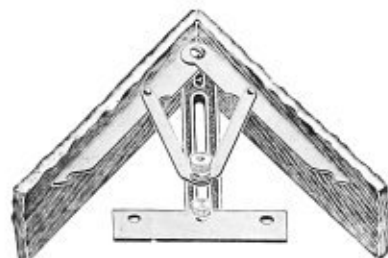

SLIDING T BEVELS

Rosewood handle. Steel blade. Brass flush lever.

No. 25.—Inches	6	8	10	12
Per dozen ...	\$ 3.95	4.30	4.65	5.00
One-half dozen in a box.				

ANGLE DIVIDERS

No. 30.—Angle divider. Nickel-platedEach \$1.50

Finds any angle. Graduated for the parts of circle commonly used. May be used as a try square or T bevel. Ideal for fitting moulding to odd angles.

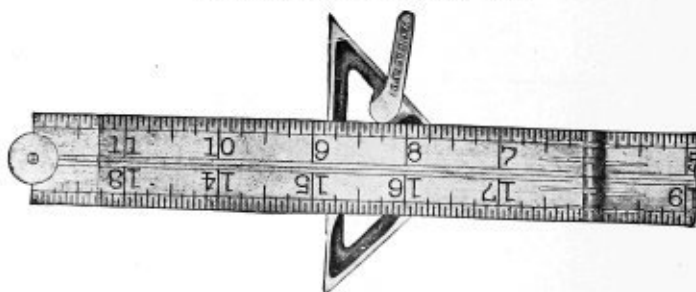

FLUSH T BEVELS

Nickel-plated iron handle. Steel blade. Thumb-screw at lower end of handle.

No. 18.—Inches	8	10
Per dozen	\$ 8.40	9.10
One-half dozen in a box.		

RULE TOOL OR GAUGE

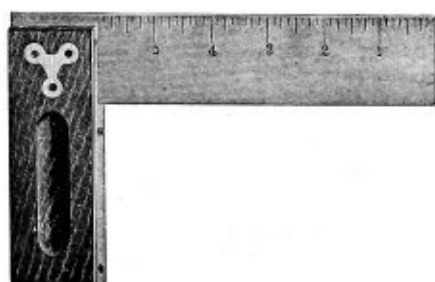

No. 200.—Rule tool or gauge. Aluminum with cast brass lever fastener. ¾-inch wide and in size 3x2x2 inches. May be used on ordinary wood rules (one inch folded) and can be applied or detached in an instant. A true square, depth, or miter line gauge. Takes up very little room—can be carried in the vest or apron pocketPer dozen \$ 4.00
One dozen in display box.

PLUMBS AND LEVELS

All Stanley levels now made with the handy grooved feature. In climbing ladders, walking on stagings or on the frame of a building, the peculiar form of the level gives a feeling of steadiness to the workman.

Also made with both plumb and level glasses set so as to give a better view of the bubble when working overhead. Note the ease of reading as shown by cuts at either side of this description.

Levels. Arch top plates. Two side views. Polished.

FILES, RASPS AND CLEANERS

AUGER BIT FILE

No. 1.—7-inch double ender. For auger bits of all sizes. Enables user to file bit without injury to screw or lip; one end having flat file and smooth edges, other end being smooth with file edges.....Per dozen \$2.00

One dozen on easel back display card.

BARBER'S CORRUGATED FILE

Barbers'.—5-inch. Hand pattern, parallel with two safe edges. Owing to the manner of cutting when filing scissors or shears a slight corrugation is left standing which prevents slipping. The advantage of this feature will be apparent to the user after once trying. Made of silver steel, strictly high grade. Per dozen \$ 4 00

One dozen in a box.

PLAIN HORSE MOUTH RASP

No. 75.—Plain horse mouth rasps. Polished.....Per dozen \$ 15.00

One-half dozen in a box.

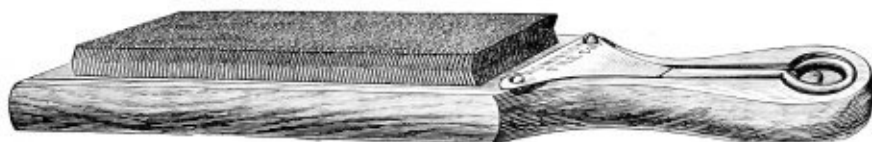

JOINTED HORSE MOUTH RASP

No. 33.—Jointed horse mouth rasps. Nickel-plated.....Per dozen \$ 33.00

One-half dozen in a box.

FILE CARD

No. 200.—File card and cleaner. Wood back. Complete with scorer.....Per dozen \$ 2.75

One-half dozen in a box.

FILE BRUSH

No. 400.—File Brush. Bristle brush one side, wire cleaner other side. Complete with scorer.....Per dozen \$ 4.80

One-half dozen in a box.

HAND DRILLS

YANKEE No. 44

- No. 44.—Nickel-plated. Entire length, including drill point, as illustrated, 11 $\frac{1}{4}$ inches. The cap on top of drill has a screw attached to it, by revolving which the spring is made longer or shorter, thereby making the spring weaker or stronger, and adapting it for use in either soft or hard wood. Improved chuck. Eight points, one each 1-16, 5-64, 3-32, 7-64, 1-8, 9-64, 5-32, 11-64 (as illustrated below) furnished with each Per dozen \$ 30.00
One-twelfth dozen in a box.

YANKEE No. 41

- No. 41.—Nickel-plated. Entire length, including drill point, as illustrated, 11 $\frac{1}{4}$ inches. Improved drill chuck, holding points tight and absolutely rigid. Magazine is opened by loosening nut at lower end, causing interior or handle to move up, exposing all the drills. Eight points, one each, 1-16, 5-64, 3-32, 7-64, 1-8, 9-64, 5-32, 11-64 (as illustrated below) furnished with each Per dozen \$ 27.00
One-twelfth dozen in a box.

YANKEE No. 42

- No. 42.—Stained wood handle. Nickel-plated ferrule and chuck. Entire length, including drill point, as illustrated, 11 $\frac{1}{4}$ inches. Improved drill chuck, holding points tight and absolutely rigid. Eight points, one each 1-16, 5-64, 3-32, 7-64, 1-8, 9-64, 5-32, 11-64, (as illustrated below), put up in a small round wooden box furnished with each Per dozen \$ 20.00
One-twelfth dozen in a box.

YANKEE No. 43

- No. 43.—Stained wood handle. Nickel-plated ferrule and chuck. Entire length, including drill point, as illustrated, 10 $\frac{3}{4}$ inches. Long knurled chuck. Easily adjusted, holding drill points tight and rigid. Adapted for light work, hence only three drill points, one each 1-16, 5-64 and 3-32, put up in small round wooden box, are furnished with each. Larger points should not be used in this drill. Per dozen \$ 15.00
One-twelfth dozen in a box.

SCREW PLATES

CHAMPION EASY

- No. 1B.—Stock 15½ inches long. With adjustable tap wrench. Cutting ¼-20, 5-16-18, ¾-16, 7-16-14, ½-20. Taps and dies in varnished hardwood hinged cover box.....Per set \$ 9.75

- No. 2B.—Two stocks, one 15½ inches long for the ¼ and ¾; the other 23 inches long for the ½, ⅝ and ¾. With adjustable tap wrench. Cutting ¼-20, ¾-16, ½-12, ⅝-11, ¾-10. Taps and dies in varnished hardwood hinged cover box.....Per set \$ 11.10

- No. 5B.—Two stocks, one 15½ inches long for the ¼, 5-16, ¾ and 7-16; the other 23 inches long for the ½, ⅝ and ¾. With adjustable tap wrench. Cutting ¼-20, 5-16-18, ¾-16, 7-16-14, ½-12, ⅝-11, ¾-10. Taps and dies in varnished hardwood hinged cover box.....Per set \$ 13.00

- No. 7B.—Two stocks, one 15½ inches long for the ¼, 5-16, ¾ and 7-16; the other 26 inches long for the ½, ⅝, ¾, ⅞ and 1-inch. With adjustable tap wrench. Cutting ¼-20, 5-16-18, ¾-16, 7-16-14, ½-12, ⅝-11, ¾-10, ⅞-9, 1-8. Taps and dies in varnished hardwood hinged cover box. Per set \$ 21.15

The "easy" dies furnished with above sets are simple in construction, compact and neat in design. Adjustable by use of a taper head screw with a taper nut, thus being braced on both sides and perfectly rigid and solid. The champion electric adjustable tap wrench also supplied with above, has a square socket to fit the square shank of each sized tap in the set. Covering the four sides of the tap it holds solid and firm. The hub shape keeps the tap always in the center. Never becomes top-heavy and can be taken in the palm of the hand for starting a tap. Every part fully guaranteed, yet moderate in price.

LITTLE GIANT

- No. 2.—Stock, 23 inches long. Collets, 2¾ inches in diameter, with adjustable tap wrench, cutting ¼-20, ¾-16, ½-12, ⅝-11, ¾-10. Taps, dies and collets. In varnished hardwood box, hinged cover.....Per set \$ 13.50

- No. 5.—Stock, 23 inches long. Collets, 2¾ inches in diameter, with adjustable tap wrench, cutting ¼-20, 5-16-18, ¾-16, 7-16-14, ½-13, ⅝-11, ¾-10. Taps, dies and collets. In varnished hardwood box, hinged cover. Per set..... \$ 16.00

- No. 4.—Stock, 26 inches long. Collets, 2¾ inches in diameter, with adjustable tap wrench, cutting ½-13, ⅝-11, ¾-10, ⅞-9, 1-8. Taps, dies and collets. In varnished hardwood box, hinged cover.....Per set \$ 17.50

- No. 7.—Stock, 26 inches long. Collets, 2¾ inches in diameter, with two adjustable tap wrenches, cutting ¼-20, 5-16-18, ¾-16, 7-16-14, ½-13, ⅝-11, ¾-10, ⅞-9, 1-8. Taps, dies and collets. In varnished hardwood box, hinged cover.....Per set \$ 25.50

All furnished in U. S. Standard Thread.

One-half dozen in a box.					

STEEL HANDLE

Bar forged from special open hearth steel and made oval front and back,—stronger than square bar. Slide of very tough semi-steel and especially constructed by re-inforcement to the jaw to withstand great strain. Operating screw solid and made of high grade steel. Handle semi-steel, hollow and powerfully braced internally; forced on to the shank under great pressure and securely riveted in place both on the tip and with a lateral pin rivet. The handle furnishes a strong support to the screw and being oval in form fits the hand. All parts carefully case hardened by improved methods.

WRENCHES

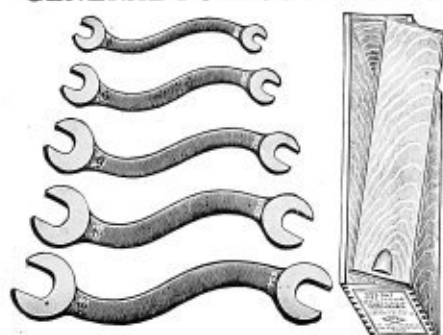

DROP FORGED GENERAL PURPOSE

Drop forged, semi-finished. Milled openings and hardened. $22\frac{1}{2}^\circ$ angle. For use on the farm—plows, carriages, wagons, etc., and for general service where a light, strong wrench is desired.

No. 475B.—Length $6\frac{1}{4}$ inches; heads $\frac{3}{8}$ inch thick. Openings $\frac{3}{8}$ and $\frac{1}{2}$ inch.....Per doz.	\$ 2.40
No. 477B.—Length $7\frac{1}{8}$ inches; heads $\frac{1}{2}$ inch thick. Openings $\frac{1}{2}$ and $\frac{3}{4}$ inch.....Per doz.	3.00
No. 479B.—Length $8\frac{1}{4}$ inches; heads $\frac{3}{4}$ inch thick. Openings $\frac{3}{4}$ and $1\frac{1}{2}$ inch.....Per doz.	3.96
No. 481B.—Length $9\frac{1}{4}$ inches; heads $\frac{3}{4}$ inch thick. Openings $\frac{3}{4}$ and $1\frac{1}{2}$ inch.....Per doz.	5.04
No. 483B.—Length $10\frac{3}{8}$ inches; heads $\frac{7}{8}$ inch thick. Openings $\frac{7}{8}$ and 1 inch.....Per doz.	6.12

GENERAL PURPOSE IN SETS

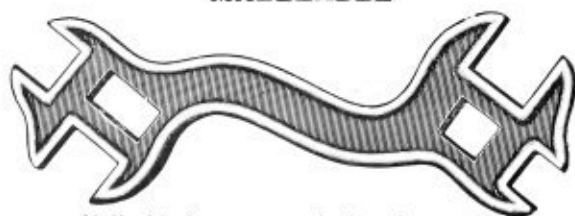

No. 3.—Assortment of general purpose wrenches. Semi finished. Consisting of one wrench each Nos. 475B, 477B, 479B, 481B and 483B as above described. In all 5 wrenches giving 10 popular milled openings—no duplicates—that will meet the requirements of ordinary work. Put up in a neat slide cover wood box as illustrated.....Per set \$ 1.85

RONSON

Ronson.—Length 6 inches; weight 8 ounces. High carbon steel, tempered and heavily nickel plated. In reality 9 wrench heads handling U. S. Standard nuts from $\frac{1}{4}$ to $\frac{7}{8}$ inch diameter as well as many set and cap screw sizes and Prestolite tank key. Extra thin, with wing nut adjustment. Invaluable for use about the automobile, motor boat, motor cycle or similar workPer doz. \$ 18.00
One-twelfth dozen in a carton.

MALLEABLE

Malleable buggy or agricultural wrenches.

Arnhold.— $7\frac{1}{4}$ inches long. Openings, $\frac{7}{8}$ & $\frac{1}{2}$ and $\frac{5}{8}$ & $\frac{3}{4}$ inches. Square hole $\frac{1}{2}$ inch opening; oblong hole $\frac{7}{8}$ by $1\frac{1}{2}$ inch openingPer doz. \$ 1.20
One dozen in a bundle.

WESTCOTT

Westcott adjustable. Malleable iron handle and forged steel jaw. Can be used in many places inaccessible to the ordinary screw wrench.

Nos.	76	78	80	82	84

No. 200

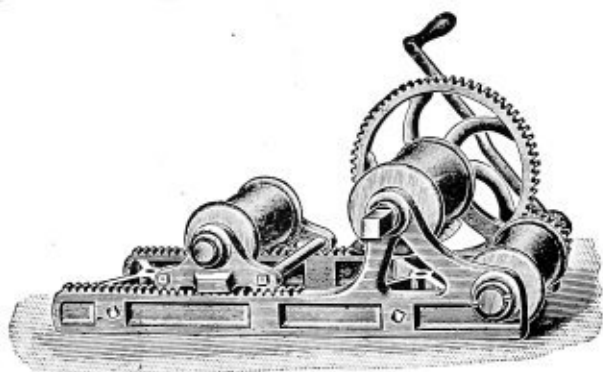

No. 200 $\frac{1}{2}$

- No. 95.— $1\frac{1}{8}$ -inch steel spindle with run of 3 inches. Drills holes up to $1\frac{1}{4}$ inches. Drills to center of 15-inch circle. Self-feed, 3 geared. Third gear gives second speed same turning direction of crank as first speed. Full back gears. Square, slotted lathe-turned table. High grade ball bearings. Spindle bored on the never slip chuck plan to take $\frac{1}{2}$ -inch round shank drills. Weight 115 pounds.....Each \$ 20.00
- No. 200.— $1\frac{1}{4}$ -inch steel spindle with run of 4 inches. Drills holes up to $1\frac{1}{4}$ inches. Drills to the center of a 16-inch circle. Combination automatic self-feed and lever feed. Double back gears. Two speeds, the crank on the second speed turning the same direction as the first. Ball bearing. Slotted lathe-turned table. The lever feed saves time and labor in drilling small holes, reaming, counter sinking, etc., and makes this drill a first class wood boring machine. Spindle has never slip feature and bored to take $\frac{1}{2}$ -inch round shank drills. Weight, 180 pounds.....Each 33.00
- No. 200 $\frac{1}{2}$.— $1\frac{1}{4}$ -inch steel spindle with run of 4 inches. Drills holes up to $1\frac{1}{2}$ inches. Drills to the center of an 18-inch circle. Combination automatic self-feed and lever feed. Double back gears. Two speeds which are changed by changing the gears. Ball bearing. Slotted lathe-turned table. Lever feed saves time on small work and makes of the drill a perfect wood boring machine. Spindle bored with never slip chuck feature to take $\frac{1}{2}$ -inch round shank drills. Weight 240 pounds.....Each 40.00

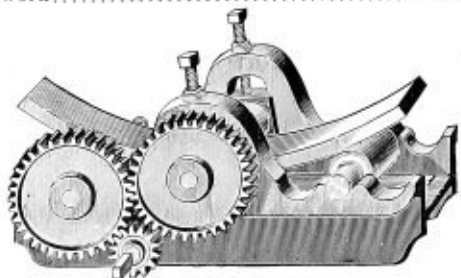

The never slip feature referred to above is positively interlocking with a square shoulder worked out of the solid metal in the upper end of the spindle. No loose or moving parts, as the square shoulder in the socket meets the flat side of the drill and the set screw has only to keep the bit from dropping or pulling out.

------------------------	-----------------	-------	---------	--------

10 pounds in a box.

CARBORUNDUM STONES

Carborundum is a combination of carbon and silicon—a manufactured abrasive the most perfect ever produced. Being very much harder than any other abrasive gives it great durability. Composed of small crystals which cut clean and fast, yet brittle enough to break slightly in use. This prevents glazing or filling up and gives to the stone rapidity and uniform efficiency along with durability.

With an initial order aggregating \$25.00 in list price a handsome counter display case is furnished free. This affords customers an opportunity to make their own selections of stones and yet avail themselves of this case.

SHARPENING STONES

Sharpening stones. Rapid cutting. Used dry or with water or oil. Porous and may be tempered in cutting by filling with wax or vaseline.

STEEL WOOL AND STEEL SHAVINGS

Steel wool. In packages containing about 2 ounces—
in size about 7x2 1/2 inches.

No.	Per doz.
No. 0.—For rubbing in place of pumice stone	\$ 1.80
No. 1.—Equal to No. 0 Sand Paper	1.80
No. 2.—Equal to No. 1/2 or 1 Sand Paper	1.80
No. 3.—Equal to No. 1 1/2 or 2 Sand Paper	1.80

One dozen packages in a carton.

Steel wool is a mass of fine fibres of steel, resembling curled hair. For rubbing off varnish, shellac, etc., and for various uses where sand paper, pumice stone, etc., are used, will do the work quicker and with less labor. Being soft and pliable, steel wool adapts itself to the shape of mouldings, etc. Will not clog or gum up.

Steel Shavings. In packages containing about 1 pound—in size 17x3 1/2 inches.

No.	Per package
No. F.—Fine	\$.60
No. M.—Medium	.60
No. C.—Coarse	.50

Steel Shavings are designed to do the work of coarser grades of sand paper—such as removing old paint, varnish, for scrubbing floors and cleaning bowling alleys, hardwood floors, etc. Also used for cleaning iron work, preparatory to painting.

Per dozen	\$ 2.00
-----------	---------

Three dozen in a case.

"STERLING BRAND FOR QUALITY STANDS"

BARRETT JACKS

Frame or base of malleable iron; rack of forged steel, with machine-cut teeth. Pawls drop forged open hearth steel of high carbon. Fulcrum pin, high carbon-rolled steel machined. Hardened steel bearings and selected ash or hickory handles. The large rectangular shaped base gives great lifting strength and admits of the jack being used in close quarters. The working parts are all accurately machine finished and when worn out can be easily removed and replaced at slight expense. Nos. 1, 6, 12, 17, 20 and 21 are provided with a trip, by means of which the load can be dropped instantly from any elevation, at the will of the operator. Trip jacks are recommended for track work only. For general lifting purposes we recommend the automatic lowering jack, as it lowers the load gradually, in the same manner in which it is raised. Of the jacks Nos. 17, 20, 48, 18, 19, 29 and 30 are single acting, and the remainder double acting. In the single acting jacks the lever operates only on the downward stroke, raising the load a full notch, while in the double acting jacks it raises the load a half a notch on both the upward and downward strokes. All of the jacks, with the exception of the Nos. 8, 28, 38, 48 and 30 are provided with a foot lift for grappling low-set loads.

The Duff-Bethlehem forged steel hydraulic jacks described on this page will work vertically, horizontally or in an inclined position. Can be continuously operated under severe services without expense, trouble or replacement.

The Duff ball bearing screw jacks described on this page are always ready for instant service, cover all requirements and may be readily applied to any lifting purpose.

"STERLING BRAND FOR QUALITY STANDS"

AUTOMOBILE AND WAGON JACKS

Barrett automobile jacks. Single acting, rapid, safe and economical. Workmanship the best and material the finest.

- No. 44.—Capacity 1500 lbs. Height, bar down 10 inches; raises 6 inches. Weight 5 lbs.....Each \$ 3.50
 No. 07.—Capacity 2000 lbs. Height, bar down 8 inches; raises 5 inches. Weight 7 lbs.....Each 5.00

HOISTS

CANTON

SURE GRIP

DIFFERENTIAL

DUPLEX

CANTON HOISTS

Galvanized. Simple in construction, strong, positive and effective. It elevates, lowers, locks and unlocks with one rope only, operator having both hands free to control the load. Can be used in any position—perpendicularly, horizontally or at any angle. The heavier the load the better it holds—it cannot slip. Useful on the farm, in factories, mills, etc. Prices include double sheave blocks above and below but no rope.

Nos.	41	37	33	27
For rope, inches	$\frac{3}{8}$	$\frac{1}{2}$	$\frac{1}{2}$ or $\frac{5}{8}$	$\frac{3}{4}$ or $\frac{7}{8}$

9-32	3/8	0.125	1.5	1.4	0.28	.03 1/4	.04

Iron transmission is used principally for the transmission of power. The wire is of the best Swedish iron.

Crucible cast steel transmission rope is particularly adapted for use in haulage systems. The rope is made of a high quality of crucible cast steel much stiffer than hoisting rope. The weight is the same as iron transmission but the approximate breaking stress and the proper working load are just double that of the iron rope.

TILLER

Six strands of forty-two wires each (252 wires in all), seven hemp cores.

Diameter, inches...	1	3/8	1/2	5/8	3/4	7/8	1	1 1/8	1 1/4
Weight per ft., lbs.	\$1.10	.84	.62	.43	.35	.28	.21	.16	.11
Iron, per foot....	.33	.27	.22	.17	.14	.11	.10	.09	.08
Cast steel, per ft.	.43	.36	.30	.24	.19	.17	.15	.14	.12 1/2

This rope is used for steering rope on vessels, for hand rope on elevators, and for other service where great flexibility is required. Care should be taken not to subject Tiller rope to severe abrasive wear.

Can furnish tinned or galvanized if required.

Iron hoisting is adapted for elevator service and may be used for running purposes where high tensile strength and resistance to abrasion are not essential.

Crucible cast steel hoisting rope is particularly adapted for service in mines, for logging, on elevators, derricks, hay presses, dredges, inclined planes, etc. The weight is same as iron hoisting, but the breaking stress and proper working load are just double that of the iron rope.

GALVANIZED STRAND

Seven steel wires twisted into a single strand. Galvanized.

Diameter, inches....	1-2	7-16	3-8	5-16	1-4
Weight per 100 ft., lbs.	51	41 1/2	29 1/2	21	12 1/2

1/2-inch and larger, base sizes..... Per pound \$.....
 3/8-inch Extra, per pound 1/2c net
 1-4 and 5-16-inch..... Extra, per pound 1c net

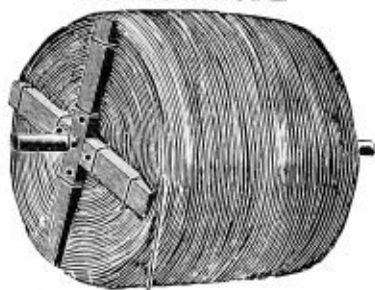

Sisal rope will not be cut. Manila rope, 1/2-inch and larger, cut at 1c per lb. extra net.

Manila fibre from which Manila rope is made is grown in the Philippines and is obtained from a species of the wild banana plant. The fibre is extracted and worked entirely by hand. Our rope is made from thoroughly cured and cleaned fibre, thus giving a fine texture and great strength.

Sisal fibre is obtained from a species of cactus. When extracted is white in color with occasionally a creamy tinge. The strength of Sisal rope is about 3/4 that of the better grades of Manila.

The estimated strength given above is based on Manila rope. Working strain is one-third of above strength.

COTTON ROPE

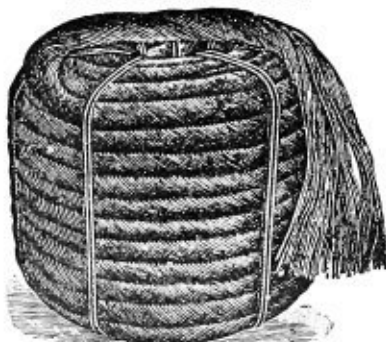

Twisted Cotton Rope. On Reels.

1/4-in. Special grade. Short fibre.....	Per lb. \$.30
3/8-in. High grade. Selected stock.....	"	.50

STANDARD HAIR FELT

Standard hair felt. Selected cattle hair formed by an improved felting process. In bales 6 feet wide containing 300 square feet.

Nos.	4	8	12	16	24	32
Thick, in. ...	¼	½	¾	1	1½	2
Per sq. ft.	\$.12	.15	.18	.20	.30	.40

ASBESTOS SHEATHING

Asbestos building felt or sheathing. A fire-proof sheathing or lining felt, and on account of its non-conducting qualities largely used for lining side walls, floors, wood partitions, etc. Will not disintegrate, is odorless and vermin proof. In rolls 36 inches wide and weighing approximately 100 pounds each.

No. 6.—6 lbs. per 100 square feet	Per lb.	\$.06
No. 10.—10 lbs. per 100 square feet	"	"	.06
No. 14.—14 lbs. per 100 square feet	"	"	.06
No. 30.—30 lbs. per 100 square feet	"	"	.06

ASBESTOCEL PAPER

Asbestocel corrugated fire-proof paper. Consists of corrugated paper, backed by a plain or flat layer of the same material. Being flexible it can be readily handled and cut any desired length, which makes it specially adapted for wrapping heater pipes and other surfaces requiring thin, flexible insulation. Prevents pipe from rusting and does away with the danger of fire from overheated furnaces and pipe. In rolls 36 inches wide containing approximately 250 square feet.

No. 1.—1 ply. About ¼ inch thickPer roll \$ 9.00

MINERAL WOOL

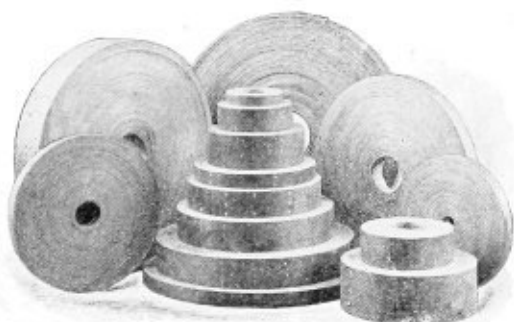

Select mineral wool. For fireproofing and cold storage insulation. Especially clean, long staple material free from sulphur and weighing about 12 lbs. per cu. ft. One pound will cover one sq. ft. about 1 inch thick. In sacks containing about 60 pounds.

No. 100.—Mineral WoolPer 100 lbs. \$ 3.00

Packing charges extra.

"STERLING BRAND FOR QUALITY STANDS"

LEATHER BELTING

Century and Fair Oaks Brands.

Century Brand.—Short lap, made from extra heavy center stock. Pure oak tanned, carefully curried and fully stretched.

Fair Oaks Brand.—Same tannage as Century, but lighter weight, and not as carefully selected.

"STERLING BRAND FOR QUALITY STANDS"

PACKINGS

SHEET

Rainbow Sheet.—Specially adapted for high pressure and is not affected by any degree of steam heat. In rolls 36 inches wide; 1-32 to 1-4 inch in thickness. Per lb. \$ 1.05

Rolls contain about 200 lbs.

2XL.—Medium grade sheet packing. Per lb. \$.30

Standard.—Fair grade sheet packing. Per lb. \$.24

Rolls contain about 200 lbs.

SQUARE DUCK

Square Duck.—Made alternate layers of rubber and duck in lengths of 12 feet. Sizes, $\frac{1}{4}$ to $\frac{1}{2}$ inches square. Per lb. \$.50

Square Hard Hydraulic.—Sizes as above. Per lb. \$.90

Square Pure Rubber.—Sizes as above. Per lb. \$ 1.15

EUREKA

Eureka.—The original gum core piston packing. Made from pure flax and high-grade rubber core. In boxes containing about 5 lbs., sizes, $\frac{1}{4}$ to 1 inch carried in stock; larger sizes to order. Per lb. \$.75

PEERLESS SPIRAL

Peerless Spiral.—For piston and valve rod packing. Will hold 400 lbs. of steam. In boxes containing 5 to 10 lbs. Sizes $\frac{1}{4}$ to 2 inches. Per lb. \$ 1.50

ECLIPSE GASKET

Eclipse Gasket.—Sectional rainbow gasket packing. Will not harden or blow out under the highest pressure. In boxes containing 5 lbs. Sizes, $\frac{3}{8}$ to $\frac{1}{2}$ inches. Per lb. \$ 1.50

DIAGONAL PISTON

Diagonal Piston.—Same construction and quality as Daniel's P. P. P. Specially recommended for piston or pump packing. In boxes containing 5 to 10 lb. Sizes, $\frac{1}{4}$ to 1 inch. Per lb. \$.85

CENTURY

Century Core.—An oval rubber core packing of the same construction as Eureka, but lower in grade. In boxes containing 5 to 10 lbs. Sizes, $\frac{1}{4}$ to $\frac{1}{2}$ inches. Per lb. \$.50

KEYSTONE FLAX

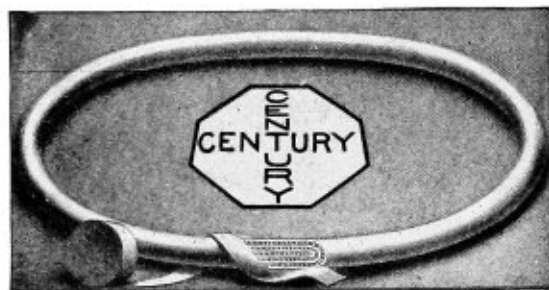

Keystone.—Square flax packing of selected long fibre flax all through. In boxes containing 5 to 10 lbs. Sizes, $\frac{1}{4}$ to 2 inches. Per lb. \$.50

"STERLING BRAND FOR QUALITY STANDS"

PACKINGS

Mogul.—For small valve stems. Twisted from strands of absolutely pure, long fibre, asbestos yarn. Each strand thoroughly lubricated. Made in all sizes. On one lb. spools or 5 or 10 lb. reelsPer lb. \$ 1.35

Century Gasket.—Any size handhold or manhole gasket made instantly and without waste. In square boxes of 12 foot lengths, with extra metal tubes and a roll of tape in each box. Per pound \$ 1.20

WASTE

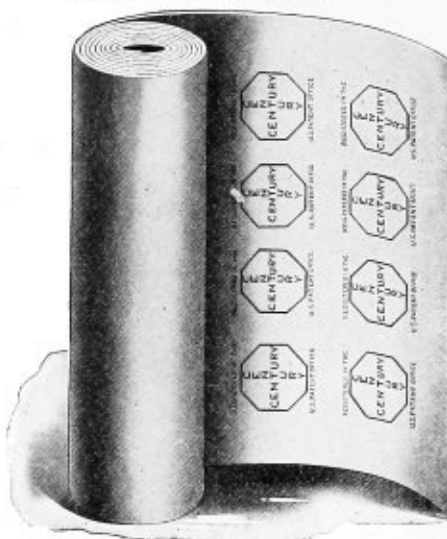

White Cotton Waste. Machined.
Standard.Per lb. \$.15
Syracuse." .13½
Colored Cotton Waste. Machined.
Fidelity.Per lb. \$.10½
U. S. Special." .10
In bales of medium size containing from 100 to 150 lbs.

OAKUM

No. 325.—Stratford's Best. Made of best Manila, for calking steamboats, barges, etc.Per bale \$ 6.50
No. 300.—U. S. Navy. For plumbers' use. For calking vent pipes, sewer pipe, etc.Per bale \$ 6.00
In bales of 50 lbs. each.

CENTURY SHEET

Century Sheet.—Extra high grade and free from all coloring matter. Will not crack. Especially adapted to construction work. In rolls containing 150 to 200 lbs. 1-32 to 1-4 in. thick. Per lb. \$.90

FRICTION TAPE

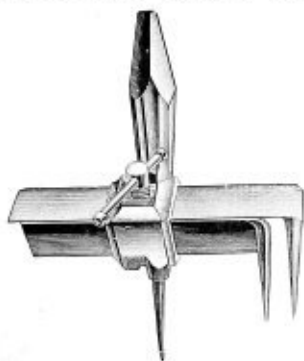

Sterling.—A first class friction tape for general all around use. Closely woven, uniform and of exceptional strength. Both sides heavily and evenly covered. In rolls ¾ in. wide containing ½ lb. Each in carton.Per doz. cartons \$ 3.00

No. JM.—First class tape for high grade construction work—central stations, power plants, street railways, etc. In half lb. rolls.Per lb. \$.90
Jomanco.—Strictly high grade. Recommended for permanent underground, sub-way, railway signal or any other system where the highest class of insulated joint is required. In half pound rollsPer lb. \$ 1.05

"STERLING BRAND FOR QUALITY STANDS"

TINNERS' MACHINES

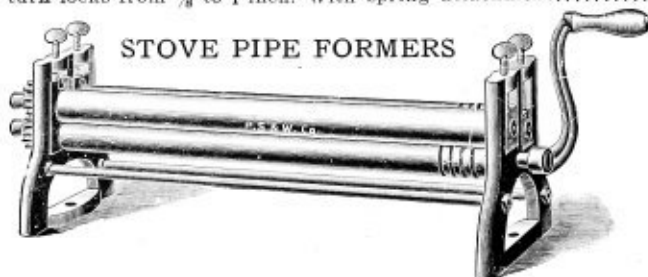

TIN FOLDING MACHINES

P. S. & W. new bar folders. Will turn locks from $\frac{1}{8}$ to 1 inch in width. The wedge that raises and lowers the wing is operated by a rack and pinion and is easily moved and adjusted. The gauge is adjusted by means of a drop lever in front of the machine; its adjustment is in fractions of inches, indicated by a graduated scale in front and on top. Movement instantaneous and fastened by thumb screw. Adjustment of folding bar for round or open locks is by means of socket wrench. Adapted for ordinary tin, but may be adjusted for material as thick as 22 gauge. Nos. 252 $\frac{1}{2}$ and 254 $\frac{1}{2}$ are practically the same as numbers 252 and 254, except fitted with a spring attachment for counter balancing the bar and giving rapid execution. This makes these machines of great value to lithographers and printers for binding or mounting show cards, calendars, etc.

No. 252.	—20 inches. Will turn locks from $\frac{1}{8}$ to 1 inch. Weight 100 pounds.....	Each \$ 30.00
No. 254.	—30 inches. Will turn locks from $\frac{1}{8}$ to 1 inch. Weight 190 pounds.....	" 40.00

One-half dozen in a box.

TINNERS' STEEL RULE

No. 101.—Tinners' polished steel rule. Length 36 inches, width 1¼ inches. A valuable article for the practical tinner. The upper line is the ordinary rule graduated by eighths of an inch. The lower line shows at a glance the exact circumference of any cylinder by simply ascertaining the diameter, i. e., a vessel 5 inches in diameter the rule indicates to be 15¾ inches in circumference. The reverse side contains much useful information, in large plain figures, regarding the sizes of 60 different articles—such as cans, measures, pails, etc., with straight or flaring sides, flat or pitched top, liquid and dry measures in quarts, gallons and bushels. First is given the dimensions for vessels holding 1 to 5 gallons, liquid measure; second, ¼ to 2 bushels, dry measure; third, cans with pitched top 1 to 10 gallons; fourth, cans with flat top, 1 to 200 gallons; fifth, vessels holding 1 to 8 quarts and ½ bushel to 3 bushels dry measure. Each \$ 3.50

STERLING PREPARED ROOFING

Two-ply consists of two sheets (AA) of the best quality of Tarred Felt, with a layer of waterproof composition (B).

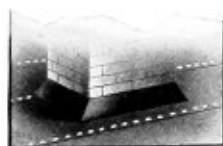

Three-ply consists of three sheets (AAA) of the best quality of Tarred Felt, with two layers of waterproof composition (BB).

Sterling prepared roofing. Composed of two or three sheets of tarred wool felt of long fibre, between each sheet a layer of water proof insoluble cement being forced. Should be laid on the same way as the roof boards run. Can be applied over old shingles, tin or sheet iron roofs without removing the old roof. Rolls contain 108 square feet, or sufficient to cover one square (allowing for lap). Rolls 32 inches wide.

No. 2.—2 ply. Weight about 40 pounds Per roll \$.90
No. 3.—3 ply. Weight about 60 pounds " 1.26

BLACK DIAMOND PREPARED ROOFING

Showing in Use Around Chimneys

Showing in Use in Gutters.

Black Diamond prepared roofing. Heavy, standard weight only. High grade. In rolls containing 108 square feet or sufficient to cover one square allowing for the necessary 2-inch lap. Rolls 32 inches wide.

No. 2B.—3 ply. Weight about 50 pounds Per roll \$ 1.08
No. 3B.—3 ply. Weight about 70 pounds " 1.44

AMATITE MINERAL SURFACE ROOFING

Amatite

ENLARGED SECTIONAL DIAGRAM

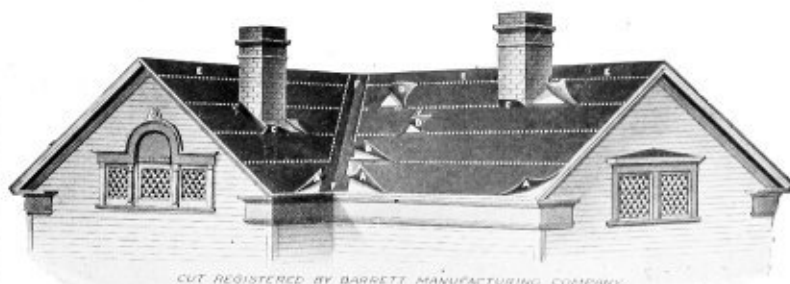

Amatite roofing. Consists of two sheets of long fibre wool felt thoroughly waterproofed and solidly cemented together with specially-run coal tar pitch. Finished with a heavy wear-and-weather-resisting surface of coal tar pitch into which is tightly embedded a uniform and even layer of Amatite (crushed stone). This mineral surface insures durability, makes painting unnecessary and presents an attractive appearance. Also is fire-retardant; will not take fire from sparks or embers falling on the mineral surface. Not affected by acid fumes, vapors or gases and will not taint rain water so often saved for various purposes—a feature commending it to the owner of farm buildings. Easily applied—can be laid over shingles or used for siding, etc. Rolls contain about 110 square feet or sufficient to cover one square allowing for lap. Rolls 32 inches wide.

No. 150.—Amatite. Weight about 100 pounds Per roll \$ 2.70

"STERLING BRAND FOR QUALITY STANDS"

AMAZON AND EVERLASTIC ROOFING

AMAZON

Amazon roofing. Strong, long fibre all wool felt, thoroughly and uniformly saturated with a non-volatile bituminous compound making a tough but pliable fabric. Absolutely impervious to all elements, being heavily coated on both sides. Has the appearance of rubber and is as thoroughly waterproof but made of roofing materials only. Not affected by heat or cold and remains flexible and pliable under all conditions. In rolls containing 108 square feet, (36 inches wide). Covers one square allowing for lap. Cement, combination nails and caps and full directions in center of each roll.

Everlastic roofing. All wool felt, thoroughly and uniformly saturated. Has the appearance of rubber and feels like it but made of roofing materials only. In rolls containing 108 square feet or sufficient to cover one square allowing for lap. Rolls 32 inches wide. Complete with nails, caps and cement for laps, all packed inside of roll with directions for applying.

SNOW GUARDS

FOLSOM

Model 1910—Nos. 1 & 2

		Showing method of applying "New Model" Guards	
		Per 100	\$
No. 1.—Model 1910.	Solid copper wire	"	6.00
No. 2.—Model 1910.	Extra galvanized steel wire	"	4.20
No. 3.—New Model.	Solid Copper wire	"	5.00
No. 4.—New Model.	Copper clad steel wire	"	4.50
No. 5.—New Model.	Extra galvanized steel wire	"	3.50
No. 6.—New Model.	Galvanized steel wire	"	2.75
No. 7.—Climax.	Solid copper wire. For old roofs	"	5.25

Folsom snow guards for protecting pitch roofs from sliding snow. Placed at intervals over the entire roof each guard holds its own quota of snow. Will not injure the roof. The Climax style is designed for use on old roofs and the guard is made in such a way that the weight of snow tends to twist the guard, thus locking it in place.

Snow Guards not carried in stock; shipped from factory direct.

PLAIN

SHINGLE BANDS

GALVANIZED

Standard shingle bands. Clean and evenly cut from the best sheet steel. In any gauge desired from No. 22 to 28. Tensile strength of 400 to 600 lbs. according to the size and gauge used. We advise the use of No. 27 gauge or heavier for there will be more body to the band thus stronger and stiffer. The regulation widths are $\frac{1}{2}$, $\frac{3}{4}$, or $\frac{1}{2}$ inch and vary in length from 8 to 22 inches. Two holes punched in each end. Furnished in black, galvanized or painted.

Can also furnish cut bands in any size, length or width up to 96 inch lengths for Nursery, Headings or Plain box bands.

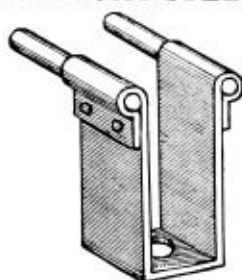

Can also furnish round edge bands or continuous length strapping for various uses.

Prices quoted upon receipt of specifications giving size, style, finish and quantity.

Juniata Calks are the latest and most improved patterns. The spur is far enough from the end to avoid striking the crease, and hard enough to insure driving into the shoe without bending. To secure best wearing qualities temper at cherry red heat just before driving. To secure best welding results, do not plunge in water, but allow shoe to cool gradually.

Pig Tin.—In pigs of about 125 to 150 lbs....Per lb. \$

Prices on Application.

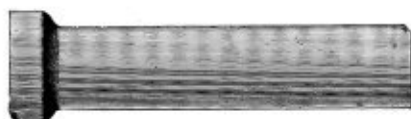

"STERLING BRAND FOR QUALITY STANDS"

LIME AND CEMENT

- Pearl White Lime.**—A cool lime especially adapted for plastering purposes. It works cool and smooth under the trowel enabling the plasterer to do more work than with a hot lime and no danger whatever from chipping. Put up in the very best cooperage. Per barrel \$ 1.80
- Gold Medal White Lime.**—The strongest lime, being 98 per cent. pure carbonate of lime. Makes about double the quantity of mortar made from the average barrel of lime. Per barrel 1.80
- Pearl Hydrated White Lime.**—A prepared lime especially adapted for finishing or skim coat in plastering. Will keep indefinitely without danger of deterioration from air slacking or chemical changes. For many purposes cheaper than lump lime because it requires less labor and can be used immediately. Put up in 40 pound paper bags. Each sack will cover twenty or more yards of skim coat. Per sack .45
- Vulcanite Portland Cement.** Highest grade. Perfect system of testing. Keeps the product uniform in quality. In paper, 4 sacks to the barrel. Per barrel \$ 3.00
In wood " 3.50
- Flint Rock Rosendale Cement.**—Special attention given to the grinding, makes it uniform and of great sand-carrying capacity. In paper, 4 sacks to the barrel. Per barrel \$ 1.85
In wood " 2.25
- Louisville Cement.**—In paper, 3 sacks to the barrel. " 1.50

"STERLING BRAND FOR QUALITY STANDS"

DYNAMITE

Judson RRP.—Granular form. Intermediate between low percentage dynamite and blasting powder. Used by railroad contractors and for blasting seamy rock, tough clays, etc. Per 100 lbs. \$
50 lbs. (4-12 1/2 lb. bags) in a case.

- 20%.—Red Cross. For soft clay and hard earth Per 100 lbs. \$
25%.—Red Cross. For shale and loosening earth to rejuvenate orchards " \$
30%.—Red Cross. For digging holes, excavating for cellars, breaking up hard soil and well digging " \$
35%.—Red Cross. For rock, shale, clay, gravel and sand when the formation is not extremely hard and compact Per 100 lbs. \$
40%.—Red Cross. Grade in most general use. Satisfactory for practically every kind of work except extremely hard rock. Particularly adapted for railroad construction, clay and ore mining, general quarry work and road building. Used largely also for stump and boulder blasting on the farm, shooting frozen ore, breaking log and ice jams and tearing down old buildings Per 100 lbs. \$
50%.—Red Cross. For hard rock in quarries, railroad construction, boulders, etc. " \$
60%.—Red Cross. For tunnel and shaft construction and all material that is very hard " \$

In cartridges 1 1/4 x 8 inches in size packed in cases containing 50 or 25 lbs.
On account of its low freezing properties **Red Cross Dynamite** commends itself to all who use explosives during the Fall and Winter months. Will not freeze until the temperature goes below 35° Fahrenheit. Cases are known where this brand did not freeze when the temperature was close to zero.

In addition to the standard size cartridge (1 1/4 x 8) above mentioned we can furnish from mill the following sizes: 3/4 x 8, 1 x 8, 1 1/8 x 8, 1 1/2 x 8, 1 3/4 x 8, or 2 x 8—as the particular needs of any user may require.

For any use not covered by the above list we will be glad to furnish special booklet covering practically every character of work.

BLASTING POWDER

DuPont blasting powder. For use in coal mining, clay mining, quarrying and hard soil. Ranges in 'action' from CCC (very slow) to FFFF (very quick). In kegs containing 25 lbs.

- FFFF, FFF, FF.—For use in coal mining, clay mining and the like. FF is frequently used in quarries where quicker powder than the larger sizes is needed. Per keg \$
F, C, CC, CCC. —For use in quarrying where a slow acting powder is necessary such as for dimension stone, etc. Per keg \$

In either steel or pulp kegs—pulp kegs are safer.

Under no circumstances can we ship dynamite or powder with hardware orders. Shipments must be made from magazine direct, to railroad points where agent is located (none to prepay points) and on certain days specified by the different railroad companies which frequently change. Get information from your local agent and give routing whenever possible.

Prices Change Frequently. Consult our Price Sheet or write us.

"STERLING BRAND FOR QUALITY STANDS"

BLASTING SUPPLIES

FUSE

Ensign Bickford Co. Safety Fuse.

Cotton.—For use in dry ground. Pliable. Per 1000 ft \$ 5.00

Beaver Brand.—For use in wet ground. Double wound and yellow finished. Combining the water-proof qualities of single tape while neater and more attractive in appearance. Per 1000 feet \$ 5.50
Single Tape.—For use in wet ground. " 5.75

Anchor Brand.—For use in very wet ground. Double wound and white finished, combining the water-proof qualities of double tape—neater in appearance. Per 1000 ft. \$ 6.50
Double Tape.—For use in wet ground. Per 1000 ft. 6.75
All above fuses except cotton, fit the standard high explosive cap.
1000 feet in a case; broken lots additional charge.

BLASTING CAPS

Blasting caps. Superior quality. Per 1000
No. 6.—DuPont. 1000 dms. fulminate to M... \$ 12.00
No. 5.—DuPont. 800 dms. fulminate to M... 10.80
No. 4.—Gold Medal. 650 dms. fulminate to M... 10.00
No. 3.—Silver Medal. 540 dms. fulminate to M... 9.00
100 in a metal box.

Weak caps result in incomplete detonation, causing lack of execution. For this reason we recommend nothing weaker than the number 6 cap.
Blasting caps cannot be shipped with dynamite or hardware orders.

CAP CRIMPERS

Cap Crimpers.—One straight side for punching hole in dynamite for inserting cap. Also fuse cutter. Crimps cap to fuse. Each \$.60

SQUIBS

Safety squibs. Part of the match is within the squib. Also with patent end. No seal to be cut-off. To be used as they are in the box. 100 squibs in a pasteboard box.
Powell.—100 boxes in a case. Per case \$ 13.50
Broken lots, additional charge.

BLASTING PAPER

No. 9.—Sterling blasting paper. Fibre. In rolls 9 in. wide containing about 1½ pounds. Per pound \$.10
About 150 pounds in a barrel.

Blasting caps and electric fuses cannot be shipped with dynamite or hardware orders. Thawing kettles shipped from factory direct.

ELECTRIC FUZES

Electric Fuzes

Double strength electric fuzes. For exploding dynamite with an electric battery.

WHEELBARROWS

TUBULAR STEEL

No. 4T.—Capacity 3 cubic feet. Tray of number 15 steel pressed from a single sheet without seam or rivet. Weight about 75 pounds. Edges of tray flanged and turned over a 5-16-inch steel rod. Heavy steel wheel $16\frac{1}{2}$ in. in diameter, $\frac{5}{8}$ inch axle bolt. For hauling dirt or light material.....Each \$ 8.00

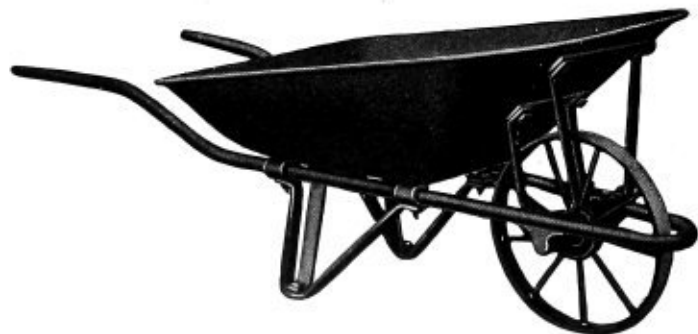

Tray of number 14 steel pressed from a single sheet without seam or rivet. Edges of tray flanged and turned over a 5-16-inch steel rod.

No. A5.—Capacity 4 cu. ft. Weight about 75 lbs. Steel wheel $16\frac{1}{2}$ in. in diameter, $\frac{5}{8}$ -in. axle bolt. For hauling dirt or light material Each 9.00

No. 7.—Capacity 4 cu. ft. Weight about 85 lbs. Heavy steel wheel $16\frac{1}{2}$ in. in diameter. Heavy legs and braces. $\frac{5}{8}$ -in. axle bolt. For foundry and mine use.....Each \$ 10.00

No. 12.—Capacity 6 cubic feet. Tray of number 15 steel pressed from a single sheet without seam or rivet. Weight about 95 pounds. Edges of tray flanged and turned over a $\frac{5}{8}$ -inch steel rod. Heavy steel wheel $16\frac{1}{2}$ in. in diameter. $\frac{5}{8}$ -inch axle bolt. For coal and coke useEach \$ 12.00

No. 17.—Capacity 6 cubic feet. Tray of number 10 steel pressed from a single sheet without seam or rivet. Weight about 150 pounds. Extra heavy wheel $16\frac{1}{2}$ inches in diameter with hub cast around spokes. $\frac{3}{4}$ -inch axle bolt. A practically indestructible barrow with massive legs, braces and axle clips. Designed for carrying heavy castings and will stand the roughest usage.....Each \$ 26.00

Above barrows all fitted with tubular frames of high carbon steel, giving strength and durability. Being in one piece serves as wheel guard and permits of forward dumping. Legs well braced and all parts fit perfectly. Of best material and workmanship.

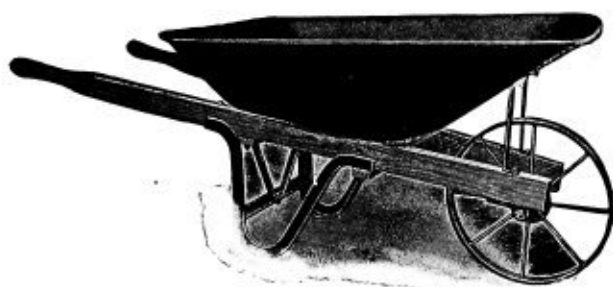

"STERLING BRAND FOR QUALITY STANDS"

WHEELBARROWS

STEEL TRAY

No. 400.—Concrete. Capacity 2 cu. ft. of wet concrete or 4 cu. ft. of earth. Heavy steel tray, riveted. Weight about 75 lbs. Heavy steel wheel 16½ inches in diameter and with ⅝-inch axle bolt. Heavy malleable axle clips. Forged steel dumping nose, angle shaped. Angle steel legs. Has narrow tray, permitting it to be wheeled through spaces of limited width. Round shovel shaped tray front affords easy dumping of concrete. Wheel well back under load.....Each \$ 9.00

Steel tray pressed from a single sheet without seam or rivet. Edges flanged and turned over a ⅝-inch steel rod. Steel wheels 16½ inches in diameter and with ⅝-inch axle bolt. Angle iron legs.

No. 300.—Capacity 6 cubic feet. Tray of number 15 steel. Weight about 72 lbs. For hauling coal, coke or ashes...Each \$ 9.00

No. 200.—Capacity 4 cubic feet. Tray of number 16 steel. Weight about 60 lbs. For hauling dirt or light material. Each 7.00

No. 210.—Capacity 4 cubic feet. Tray of number 16 steel, pressed from a single sheet without seam or rivet. Edges flanged and turned over a ⅝-inch steel rod. Extension handles with heavy steel shoes for forward dumping. Weight about 70 pounds. Steel wheel 16½ in. in diameter and with ⅝-inch axle bolt. Angle iron legs, well braced. Contractors' general purpose barrow.....Each \$ 7.50

No. 500.—Pan American. Capacity about 4 cubic feet. Tray of number 15 steel pressed from a single sheet without seam or rivet. Edges flanged and turned over a ⅝-inch steel rod. Steel wheel 16½ inches in diameter and with ⅝-inch axle bolt. Angle iron legs, well braced. The shape of tray makes the Pan American the most popular general purpose barrow on the market.....Each \$ 7.00

No. 600.—Star. Capacity about 3 cu. ft. Tray of number 18 steel pressed from a single sheet without seam or rivet. Weight about 45 pounds. Edges flanged and turned over ⅝-inch steel rod. Steel wheel 16½ inches in diameter and with ½-inch axle bolt. Legs and braces of hardwood, well bolted and braced. Each \$ 5.00

All above barrows are of the best material and workmanship throughout. Each of the foregoing designs being the result of careful study and practical experience.

Calcium Carbide is a manufactured product—a chemical compound consisting of lime and coke fused together in the electric arc furnace. The contact of water with carbide generates acetylene gas which when lighted produces the beautiful acetylene flame. Largely used in miners and automobile lamps.

The carbide is packed in steel drums or cans. Care should be taken to keep the stock in a dry place and the cover tightly on in order to keep the moisture from affecting the contents.

Scientific experiments as well as practical tests, covering a very wide field, prove that the size now offered and known as "Miners Lamp" is the ideal carbide for use in miners' lamps. Highest efficiency and greatest economy will be obtained by specifying and using Union Miners Lamp Carbide for this purpose.

No. 100.—Miners lamp. Size of grain ¼x½. In 100 pound drums	Per drum	\$ 6.00
No. 200.—Automobile. Size of grain 1 inch. In 100 pound drums	"	6.00

No. 24.—Miners or automobile. Size of grain ½ inch. In metal cans containing 2 pounds each. 24 in a case.	Per case	5.75

Not carried in stock; shipped from nearest warehouse to point of destination.

Sold only in full cases as quoted—we do not break cases.

MINERS SUNSHINE

Miners Sunshine. An illuminant that gives less smoke than Miner's oil. Produces about twice as much light as either Lard or Cottonseed oil. Gives a large white flame practically smokeless. Cannot be adulterated and no waste from leakage. Can be used in the closest workings. Easy to handle being in wax form and will burn as long as high grade Sperm Oil, Miner's Lard Oil or Cottonseed Oil. Gives the best light at the same time protecting the health of the user. As there is no waste by leakage and account of convenience in handling is largely in use through the mining sections.

Eclipse.—Rotary. Furnished with four discs graduating the feed or size of kernel. Two handle. Length over all 34 in. 9-in. sheet steel hopper, 4 in. in diameter. Positive feed and works with ease. Per dozen \$ 13.50
One-half dozen in a crate.

Segment.—Automatic slide type. One hand. Segmental pressed steel slide adjustable for number of kernels, running in steel track. Brush cut-off. Double coil steel spring, adjustable depth gauge, fixed dump lever, galvanized hopper with hinged cover, galvanized spout. Hardwood sides. Finished in vermilion. Length 33½ inches Per dozen \$ 15.00
One-half dozen in a crate.

Eagle.—Rotary. Four feed cups at all times exposed to the corn, thus giving each four chances to fill. Two handle. Length over all 34 inches. 11-inch steel hopper, 4 inches in diameter. Seasoned and selected hardwood uprights and steel blades. Per dozen \$ 16.50
One-half dozen in a crate.

American.—Burr Oak automatic. Fitted with adjustable seed disc and spring brass cut-off. The seed rests upon the disc in such a manner as to form a force feed, insuring uniform seeding. The points that penetrate are spread by pressing the handles together and are closed automatically by the spring between the staffs. Per dozen \$ 22.50
One-half dozen in a crate.

HAND SEED SOWERS

Cyclone

Little Wonder

Cyclone.—Sows all kinds of grain and grass seed perfectly. Fitted with sloping feed board and an oblong hopper which terminates in a metal edge. A steel feed plate oscillates on this which does not allow the feed to become clogged, but makes a positive force feed and insures a uniform flow and even distribution of seed. Supplied with interlock, double flange, non-solder tin distributing wheel and an automatic feed adjustment, so that the seed can be let on or shut off instantly. Heavy duck hopper. Per dozen \$ 20.25

Little Wonder.—Strong, rigidly built. Fitted with perfect shake feed plate, slope bottom and non-solder patent distributing wheel. The sack or hopper is made from heavy cotton duck and when filled the machine rests in an easy position in front of the operator. Designed for work with clover, timothy, millet or alfalfa Per dozen \$ 13.50
Each in a carton. One-third dozen in a crate.

"STERLING BRAND FOR QUALITY STANDS"

FEED CUTTERS

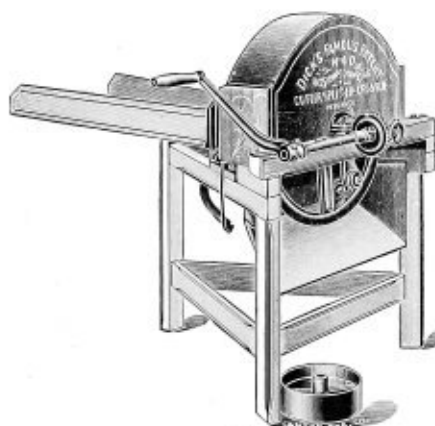

Orion.

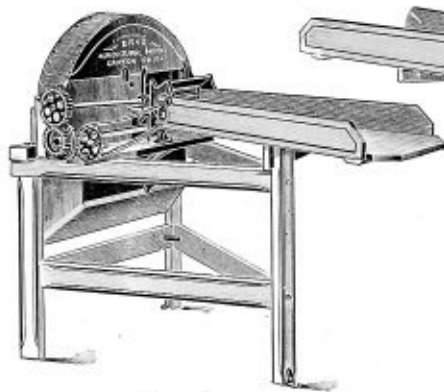

Eagle K. D.

Orion.—A simple well constructed cutter, with one knife and gauge plate for various lengths of cut. The box is made of hardwood and neatly finished. The knife is curved, can be readily removed and easily sharpened. Suitable for cutting hay and all kinds of fodder Each \$ 5.00

Eagle K. D.—Fitted with 11 inch spiral knife and heavy balance wheel. One turn of the crank makes three cuts. Thus a rapid as well as free and easy cut is obtained. Adjustable so that by simply changing the ratchet operator is enabled to get cuts of four different lengths. Comes knocked down for convenience in shipping. Weight 158 pounds Each 18.00

No. 2B.

No. 3C.

No. 5E.

No. 2B.—Hand Power Machine. Has two 7 1/2 inch steel laid knives secured to adjustable supports. Chilled hardened iron cutting plate. Interchangeable feed gears. Cuts five lengths, viz: 1/4, 1/2, 3/4, 1 and 1 1/4 inches. Very light running, handy, durable and strong and will cut any kind of material, from the finest blue grass to the coarsest corn stalks and do it in a first-class manner. Weight 160 lbs. Each \$ 27.00

No. 3C.—Hand Power Machine. Same style as No. 2B but larger and fitted with heavier fly wheel and 1 1/2 inch steel shaft. Has two 9 1/4 inch steel laid knives. Cuts five lengths viz: 1/4, 1/2, 3/4, 1 and 1 1/2 inches. The weight, strength, width of cut and size of fly wheel are all accurately proportioned so as to get the greatest amount of strength and durability with the least amount of friction. Weight 185 lbs. Each 31.50

No. 4D.—Hand or Power Machine. Has a set of gears for hand power with hand crank on right hand side of machine. Two 10 inch knives fastened on adjustable supports on arms of fly wheel. Cuts lengths, viz: 3/8, 1/2, 5/8, 1 and 1 1/4 inches. Has 12 inch pulley. Power required, light one-horse tread or from one to two-horse lever. When run by power the capacity is from 1500 to 2000 pounds per hour, varying according to speed, nature of material and length of cut. It can be run at a speed of 700 to 800 revolutions per minute. Weight 250 lbs. Each 45.00

No. 5E.—Hand or Power Machine. A popular style and size. Has hand crank attachment same as No. 4D; it also admits of extra crank attachment making of it a double hand crank cutter. 12 inch pulley; two 13 inch steel laid knives cutting lengths 1/4, 5/8, 7/8, 1 and 1 3/4 inches. Power required from two to three-horse lever or one-horse tread. When run by power capacity is from 2000 to 2500 pounds per hour varying according to speed, material and length of cut. This machine is well adapted for a limited amount of ensilage cutting, being built strong and cannot be damaged by over-feeding. Weight 350 lbs. Each 60.00

GREEN BONE CUTTERS

MANN'S

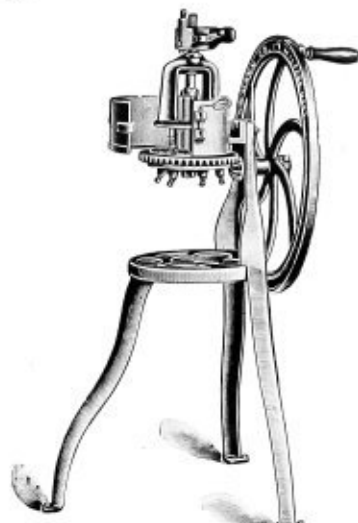

No. 5C.

No. 5B.

No. 5BM.

No. 7.

- No. 5C. —Cylinder 6 inches in diameter, 4 inches deep. Fitted with crank handle. Otherwise about the same as No. 5 B. Weight 35 pounds. Each \$ 9.75
- No. 5B. —Cylinder 6 inches in diameter, 4 inches deep. Same capacity as No. 5 BM. Without the iron stand. Weight 60 lbs. Each 12.75
- No. 5BM. —Cylinder 6 inches in diameter, 4 inches deep. Cutter plate has four knives. Mounted on iron stand with place for can to catch the bone. Has automatic governing spring feed. Weight 85 lbs. Each 16.50
- No. 7. —Large open-hinged cylinder, 7 1/4 inches in diameter, 5 1/4 inches deep, giving instant access to all working parts. Six special knives, gear guard and anti-clog device. Heavy balance wheel with adjustable handle. Mounted on iron stand, with large table for box or pan to receive cut bone. Capacity 1/2 to 1 pound per minute. Weight 107 pounds. Each 18.75

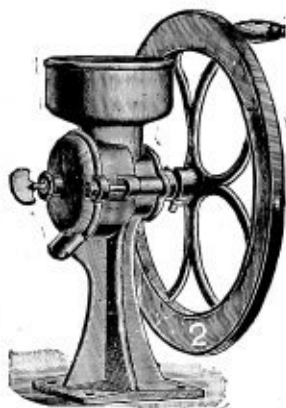

Mann's Green Bone and Vegetable Cutter adapts itself automatically to the operator's strength, the self-governing feed never feeding the bone to the knives faster than the operator can cut easily. Simple in construction, and the open-hinged cylinder gives easy access to the knives for adjusting or grinding, and to see if they are broken or dull.

GRINDING MILLS AND CORN SHELLERS

MODEL

BLACK HAWK GRIST

BLACK HAWK SHELLER

Model grinding mill. Chilled iron grinding burrs. Cast iron cylinder, hopper and stand. Easily adjusted to grind fine or coarse without the use of wrench or other tools. Can be bolted to bench or table. A good all around mill—grinds dry bone, shells, roots, bark, all grains, cereals, etc.

- No. 1 1/2.—Height 13 in. 12 1/2 in. wheel. Grinds 1/2 to 1 bu. per hr. Each \$ 3.00
- No. 2.—Height 16 in. 16 1/2 in. wheel. Grinds 3/4 to 2 1/2 bu. per hr. Each 6.00
- No. 3.—Height 18 1/2 in. 20 in. wheel. Grinds 1 to 2 bu. per hr. Each 9.00
- One in a box.

Black Hawk Grist Mills. Cast iron frame and hopper. Malleable iron crank. Adjustable grinders. With both bolt holes and slots for fastening to bench or table. Grinds from 1 to 1 1/2 bushels per hour. Will be found invaluable for use on the farm or in the household. Grinds all grains, cereals, etc., as well as coffee, spices, sugar. Makes buckwheat flour.

- No. BHG.—Black Hawk Grist Mill. Ea. \$ 3.75

One in a package.

Black Hawk Corn Sheller. Clamps to barrel, tub, box or bin. Enclosed hopper and separator, preventing the scattering of the shelled corn. Throws out the cob. Capacity 8 to 14 bushels per hour. The hopper, separator and crank are of malleable iron. The pressure is regulated by a heavy wire coil spring. The crank is long so that a child can operate. Substantially built throughout and easily kept in A1 working condition.

- No. 1903.—Black Hawk Sheller. Each \$ 2.50

One in a package.

LAWN MOWERS

NEW CLIPPER

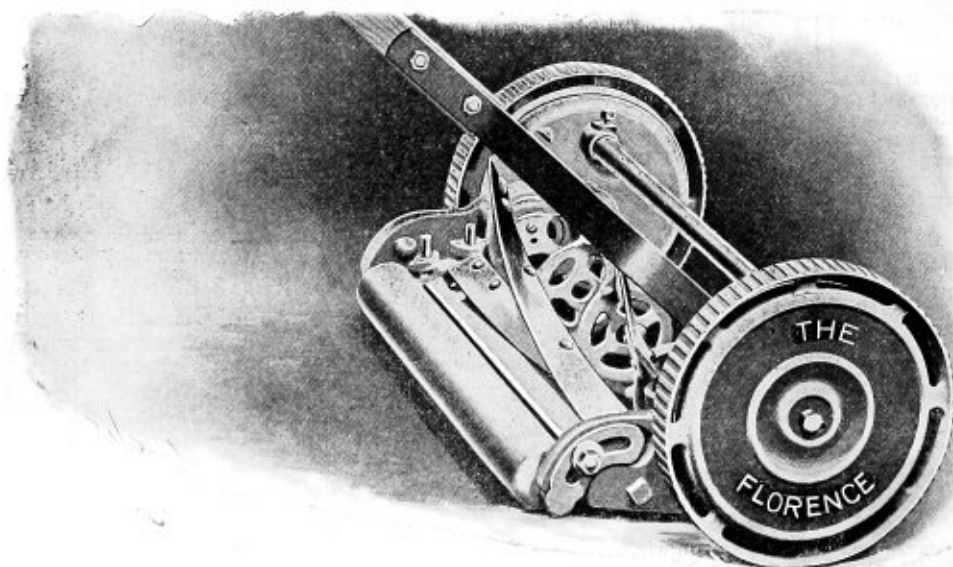

New Clipper. 8-inch wheels. 5-inch cylinder. 3 knives.

The New Clipper Mower is a good lawn mower to sell at a medium low price. It gives the purchaser full value for his money. Large drive wheels, 8 inches in diameter; internal, direct drive gears. Ratchets, sliding pawl in each drive pinion. Adjustable split brass bearings and adjustments equal to many of the high grade mowers. Revolving cutter or reel 5 inches in diameter, with 3 blades or knives. Tool steel stationary knife. Finished in a very attractive manner, pale green and black with gold trimmings, very neat.

Width of cut, inches.....	12	14	16	18
Each	\$4.50	4.75	5.00	5.50

FLORENCE BALL BEARING

Florence. 8-inch Wheels. 5-inch Cylinder. 4 Knives.

The adjustment of the bearings in this mower is accomplished by means of a single screw—very simple and positive. The drive wheels are 8 inches in diameter. Direct drive internal gearing, the ratchet consisting of a sliding pawl in each drive pinion. The cylinder or revolving cutter is fitted with four blades and measures in diameter 5 inches. Patent adjustable ball bearings used throughout. An extra quality ball bearing mower at a medium price. Finished in aluminum, trimmed with maroon and gold, making a very neat combination.

LAWN MOWERS

SPEEDWELL BALL BEARING

HIGH WHEEL.

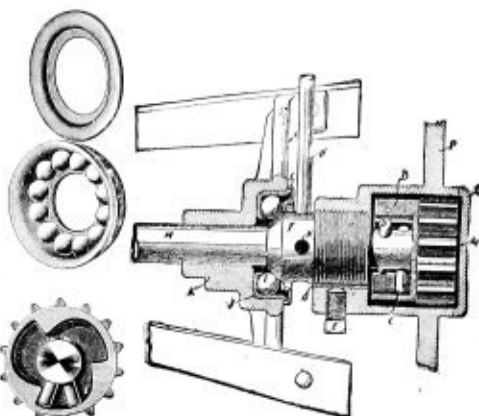

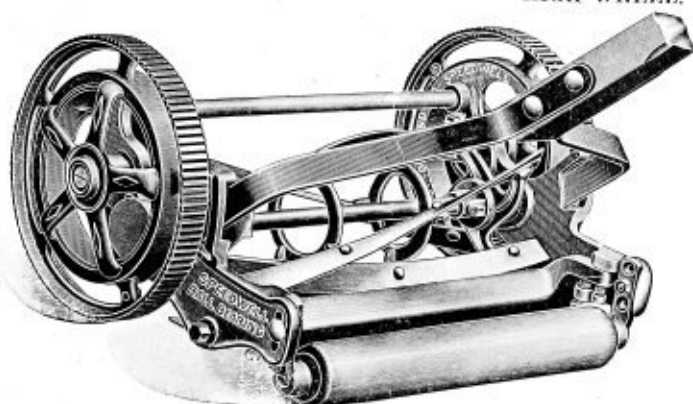

Fig. 1
Showing Special Features. Ball Bearings.

Speedwell. 9-inch Wheels. 5½-inch Cylinder. 4 Knives.

A good free cutting easy running mower with open wheel and frame made on the two gear principle. Gears well up from the ground and shielded to exclude dirt and cut grass. The drive wheels are 9 inches in diameter. The cylinder or revolving cutter fitted with 4 blades and measures in diameter 5½ inches. The lower blade is of crucible steel, oil tempered and hardened. High grade ball bearings. One large threaded cone takes up all wear in the reel journals. As shown in figures 1 and 2 two pawls are used in each pinion. Thus the pawls can engage the clutch part of the pinion. Altogether a strictly first-class mower at a popular price. Finished in gold and aluminum with olive colored wheels.

Width of cut, inches.....	12	14	16	18
Each	\$ 8.50	9.00	9.50	10.50

STERLING BALL BEARING

HIGH WHEEL

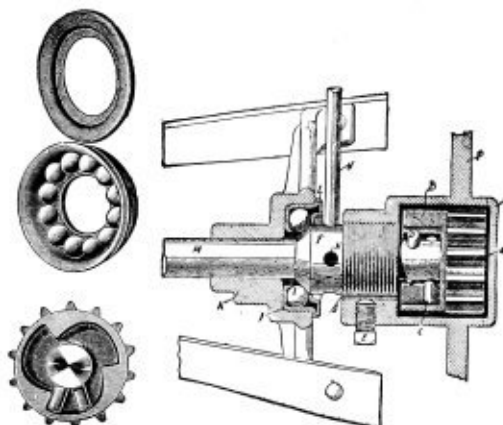

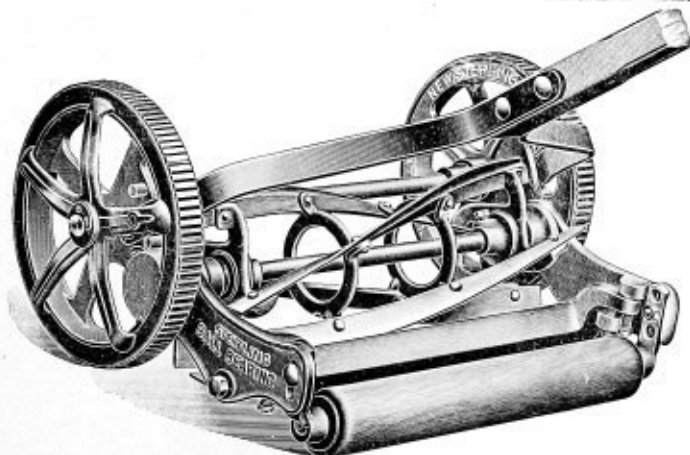

Fig. 1
Showing Special Features. Ball Bearings.

Sterling. 9-inch Wheels. 5½-inch Cylinder. 4 Knives.

A strictly high grade mower in every respect. Simple, perfect and positive adjustments. Large drive wheels measuring 9 inches in diameter give speed and power. 4 crucible steel knives form the revolving cutter or cylinder. The cutter bar is of hardened tool steel. Well speeded the mowers bite small and frequent, leaving a beautiful, velvety lawn. Highest grade ball bearings easily and rapidly adjusted. Double steel ratchet, rapid in action. By the use of two pawls in each pinion the chances of the pawls engaging the clutch part of the pinion are doubled and the durability is increased ten-fold. The owner of a Sterling mower finds mowing the lawn a fascinating pastime. Beautifully finished in aluminum and gold with maroon trimmings.

PENNSYLVANIA JUNIOR FEATURES

Ball Bearings

Self-Sharpening Lower Knife

Double Train of Gears.

Train of gears on both sides and equipped with ball bearings on each side. The adjustment of these ball bearings is most complete, yet simple and effective. This consists of a single screw in the cone with an eccentric point which fits into the cylinder axle. A fraction of a turn of this screw makes the adjustment; the cone is held permanently in place, at the same time taking up the wear. The stationary or dead knife is of crucible steel, of the raised edge pattern, and so constructed that it is self-sharpening until entirely worn out. The knives forming the cylinder are of crucible steel, hardened and tempered in oil. The gearing on both sides of the machine insure smooth work on the most uneven lawn. Neatly finished in green, red and gilt. Fitted with brackets on which the Braun grass catcher may be attached.

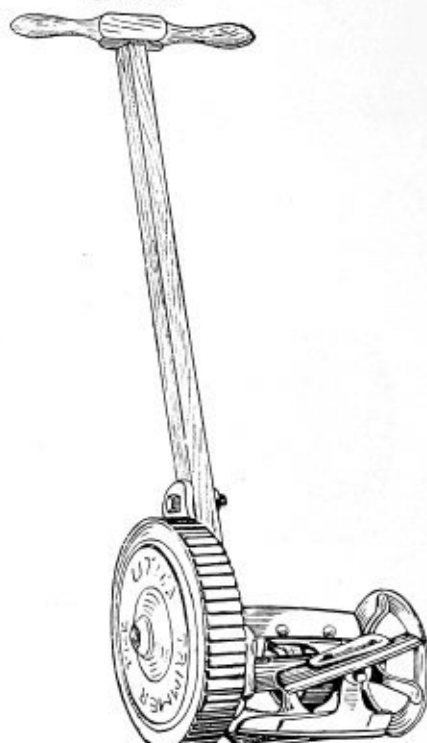

"STERLING BRAND FOR QUALITY STANDS"

LAWN TRIMMERS

PENNSYLVANIA

UTICA

No. 750.—Pennsylvania Ball bearing trimmer. 6 inch cut, 4 blades. Width over all 13 inches. Crucible cast steel blades, self-sharpening. Light running and easy to handle. Will cut to within $\frac{3}{8}$ of an inch of a wall, fence or tree. Neatly painted aluminum and gold with blue trimmings Each \$ 9.00

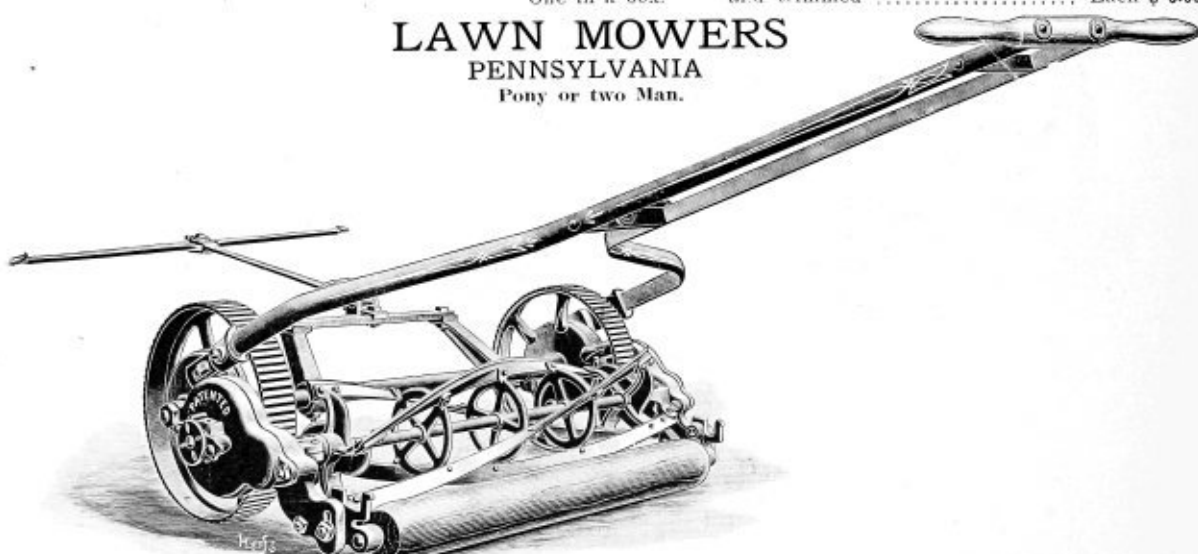

No. 600.—Utica trimmer. 5 inch cut. Crucible cast steel blades. Cast wheels and side plates. For trimming around the borders or edges of lawns as well as close up to walls, fences, etc. after mowing. A serviceable well built implement at a popular price. Takes the place of hand shears or clippers and saves stooping—easy on the back. Attractively painted and trimmed Each \$ 6.00

One in a box.

LAWN MOWERS

PENNSYLVANIA

Pony or two Man.

Pennsylvania Pony or two man mower. Drive wheels 11 inches in diameter. Cylinder $6\frac{3}{4}$ inches in diameter. Crucible cast steel cylinder and dead knives. Clutch at side enables user to throw it in or out of gear at will. A mower between the large size hand and regulation horse sizes. Can be handled by two men where a horse is not available—Such as on large lawns where the surface is broken by walks and shrubbery or is too hilly to use a regular horse mower. Fitted with lugs for attaching the Braun grass catcher.

No. 254.—25 inch cut. 4 knives. Yielding, self-sharpening lower knife, extra wide blades and large cylinder, adapting it for use in high grass Each \$ 50.00

No. 256.—25 inch cut. 6 knives. Upturned lower knife making it suitable for fine lawns and golf greens. Each \$ 60.00

No. 25.—Braun grass catcher. Galvanized bottom and canvas sides. Fits either of above mowers Each \$ 4.00

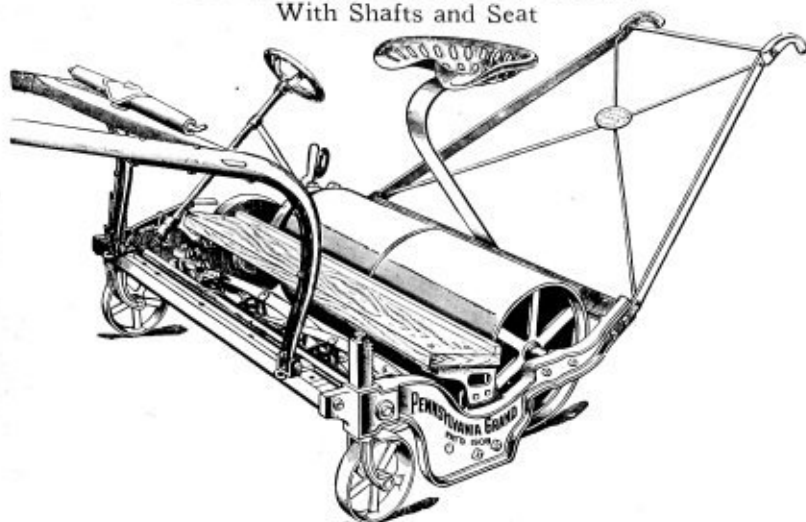

Pony mowers and catchers not carried in stock, shipped from factory direct.

"STERLING BRAND FOR QUALITY STANDS"

HORSE LAWN MOWERS

PENNSYLVANIA GRAND HORSE

With Shafts and Seat

Pennsylvania Grand Horse Mower. Cylinder $7\frac{1}{2}$ inches in diameter. Drum or roller 15 inches in diameter. Perfect cylinder adjustment. Split cylinder journals. Self-sharpening upturned stationary knife. Wheel at the right regulates the height of cut from $\frac{3}{8}$ to $2\frac{7}{8}$ inches. The most perfect horse mower on the market.

Complete with seat, shafts, etc., as illustrated.

"STERLING BRAND FOR QUALITY STANDS"

GARDEN HOSE

Sterling moulded. Seamless tube of high grade rubber. Over this is woven double a fabric of tightly twisted cotton yarn after which the cover of tough flexible rubber is applied. The hose is then moulded and vulcanized under powerful pressure which thoroughly imbeds the fabric into the rubber and makes a uniform, smooth and strong construction. All minute openings in either the fabric or rubber are thus closed, insuring an absolutely water-tight singlewall. As there are no wrappings or plys (the tube being one solid construction), it is impossible to injure by kinking either when empty or under water pressure. Put up on substantial wood reels containing 250 feet with the length stamped at every foot. This shows at a glance the number of feet remaining on the reel.

No. 712.—Sterling moulded. $\frac{1}{2}$ inch. Continuous length, 250 feet on a reel.....Per foot \$.28
No. 734.—Sterling moulded. $\frac{3}{4}$ inch. Continuous length, 250 feet on a reel.....Per foot .32
Sold only in full reels containing 250 feet.

Florence Moulded. Seamless continuous length rubber tube. Woven over this is a double fabric of twisted cotton yarn after which is applied a flexible rubber cover. The hose is then moulded and under powerful pressure vulcanized. This process makes a solid absolutely water-tight wall of smooth, strong and uniform construction. Impossible to separate the rubber from the friction (as in wrapped hose), insuring long life with no danger from injury by kinking, either when empty or in use. On wood reels containing 250 feet in one continuous piece with the length stamped at every foot. Thus at a glance the number of feet remaining on the reel may be noted.

No. 812.—Florence Moulded. $\frac{1}{2}$ -inch. Continuous length 250 feet on a reel.....Per foot \$.25
No. 834.—Florence Moulded. $\frac{3}{4}$ -inch. Continuous length 250 feet on a reel.....Per foot .28
Sold only in full reels containing 250 feet.

STERLING BRAND FOR QUALITY STANDS

CURB PUMPS

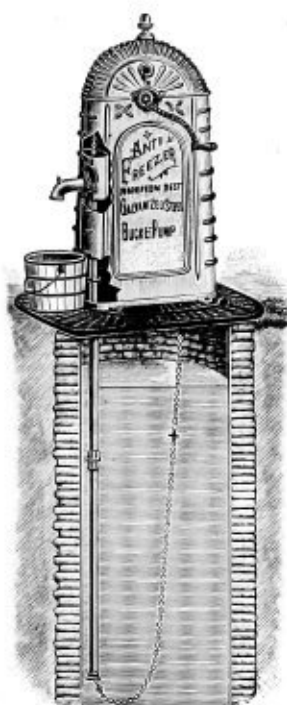

WOOD CURB

GALVANIZED CURB

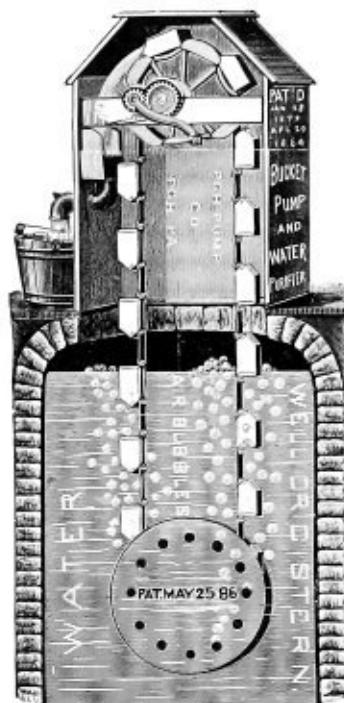

WATER PURIFIER

Union and Standard.

Galvanized.

Nos. 8 and 8G.

The rubber bucket pump is a combination of the common suction and chain pumps. Uses the endless chain, reel and crank for power, and with the rubber buckets so placed on the chain as to keep one or more constantly in the tubing, making a complete suction and throwing a constant stream of water.

Union.	—Curb, with castings	Each	\$ 3.50
Standard.	—Curb, with castings	"	4.00
Galvanized.	—Curb, with fixtures	"	6.00
Galvanized.	—Steel tubing	Per foot	.15
Galvanized.	—Tubing couplings	Each	.40

For wood tubing, chain and buckets see page 331.

Water purifier. Will purify any foul well or cistern in 10 days ordinary use. Warranted to thirty feet in depth; with special gearing and bottom wheel to 60 feet. The chain is of the best galvanized (no wire between) cups. With galvanized buckets and bottom wheel complete for 10 foot cistern.

No. 8.	—Cypress curb	Each	\$ 12.00

No. 8B.	—Galvanized buckets	Per lineal foot	.25

PUMP LEATHERS

Check Valves.

Plain Plungers.

Cup Plungers.

Pump leathers. For cistern and pitcher spout pumps and cylinders. High grade oak tanned leather.									
Size, inches	2	2 1/4	2 3/4	3	3 1/4	3 1/2	4		
Check valves	Per dozen	\$ 1.50	1.50	1.70	1.70	2.00	
Plain plungers	"	2.40	...	2.80	3.20	
Cup plungers	"	\$ 1.40	1.60	1.80	2.00	2.40	2.70	3.00	5.00

One dozen in a carton.

When ordering pump leathers kindly observe that—

Every pump requires at least two leathers—a plunger or cup and a check valve. The outside diameter of the cup is the same as the diameter of the cylinder—for instance a 2 1/2-inch cylinder will require a 2 1/2-inch cup, a 3-inch cylinder a 3-inch cup, etc. The check valve varies in size according to the style of cylinder. For brass body cylinders use a check valve 1/4 inch wider in diameter than the cylinder. The pitcher spout pump uses a check valve 1/2 inch wider in diameter than the cylinder. Iron or brass lined cylinders require a check valve 3/4 inches wider in diameter than the cylinder—hence,

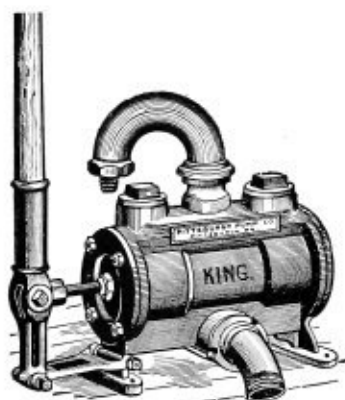

- with a 2 1/2 inch brass body cylinder use a 2 3/4 inch check valve,
- with a 2 1/2 inch pitcher spout pump use a 3 inch check valve,
- with a 2 1/2 inch iron or brass lined cylinder use a 3 1/4 inch check valve,

Plain plungers or leathers (resemble a washer), are used by many people in making cups or plungers and ordinarily should be ordered one inch larger in diameter than the inside measurement of the cylinder for this purpose.

"STERLING BRAND FOR QUALITY STANDS"

CONTRACTORS' PUMPS

KING

Nos. 1104½ and 2104½.

TWO CYLINDER

No. 104.

King. Double acting force. 5 inch cylinder. 5 inch stroke, fitted for 2 inch suction and 1 inch hose or 2 inch pipe discharge. The valve seats are brass, threaded and screwed in and the valves are metal, faced with rubber. Fitted with drip cocks to drain cylinder. Handle is reversible and can be used on either end. Will lift water 25 feet. Capacity 2 barrels per minute. Complete with suction strainer.

No. 1104½.—5 inch polished iron cylinder Each \$ 16.00
No. 2104½.—5 inch brass lined cylinder " 20.00

Two cylinder. Easily operated and well adapted for washing boilers and other purposes. It may be used to discharge upward through 2 inch pipe by screwing the top cap on end of spout in place of hose coupling. 4½ inch iron cylinder; 4 inch stroke. Suction 2 inch hose or pipe and discharge 1 inch hose or 2 inch pipe. Will throw about ½ gallon of water per stroke. The pump for contractors and well drillers.

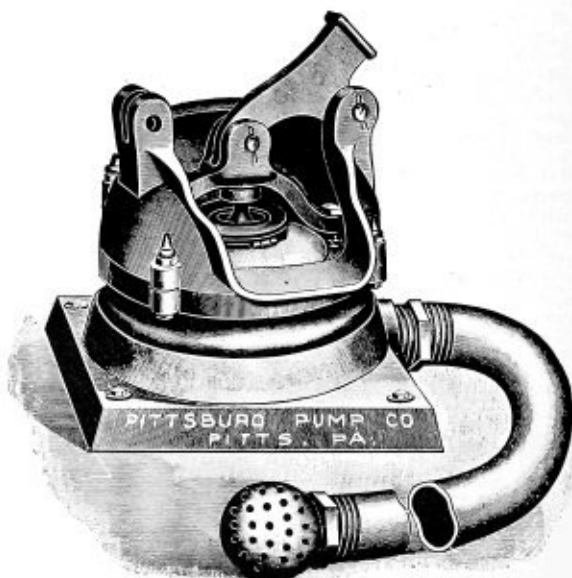

No. 104.—4½ inch iron cylinder. Complete with suction strainer Each \$ 20.00

TRIUMPH

Nos. 361 to 364.

HERCULES DIAPHRAGM

No. 10.

Triumph. Horizontal double acting force. Brass lined cylinder with plunger rod, valves and valve seats of bronze making all working parts non-corrosive. Brass plugs at each end of bed plate for letting water out of the cylinder and to prevent freezing. Extensively used in factories, warehouses, wharves, etc., for general purposes.

Nos.	361	362	363	364
Cylinder, inches	2½	3	4	5
Stroke, inches	4½	4½	4½	5

Hercules Diaphragm. Frictionless and non-chokable. Reversible lever, can be used on either side. Lower valve is of metal, rubber faced, easily accessible and readily removed. Diaphragm of best quality rubber. Particularly adapted for pumping water containing mud, sand, gravel or any semi-fluid matter. Has no equal for pumping out cesspools. Used by railroads and by builders of sewers and foundations. Suction hose of any length will be furnished and strainer attached when so ordered at best market price.

No. 10.—12½ inch diaphragm. For 3 inch iron pipe or rubber hose. Capacity, 1½ gallons per stroke..... Each \$ 44.00

"STERLING BRAND FOR QUALITY STANDS"

AIR PRESSURE SYSTEM

Pittsburgh Air Pressure system. This outfit requires but little space and is a favorite size for supplying water to kitchen, laundry or bathroom. The pump is especially designed for pumping both air and water and can be adjusted to pump either air or water. Will deliver water from a well or a cistern which is near by or several hundred feet distant but in no case place the pump more than 20 feet above the level of the water in the well. The tank has a total capacity of 295 gallons and will deliver 215 gallons of water when pumped to 40 pounds pressure. This outfit is a model of simplicity, combining strength with ease of operation. A few minutes pumping each day is sufficient for ordinary use.

- 1—36-in x6-ft. Pressure Tank.
- 1—Fig. 124 3-in. Brass Force Pump with Air Valve.
- 1—Pressure Gauge, $\frac{1}{4}$.
- 1—Water Gauge, $\frac{1}{2}$.
- 1—1-in. Brass Swing Check Valve.
- 2—1-in. Brass Globe Valves.
- 1— $\frac{3}{4}$ -in. Brass Stop and Waste.
- 4—galvanized Tees assorted.
- 5—galvanized Ells assorted.
- 17—galvanized Nipples assorted.
- 3—galvanized Unions assorted.
- 1— $\frac{3}{4}$ -inch Hose Bibb.

No. 180.—Outfit complete as described above

No. 124.—Pump only. No pipe or fittings

This system is intended to be used with Gas and Gasoline Engine, Wind Mill, or other power. The pump can also be operated by hand. Can be used in Deep or Shallow wells.

The tank can be buried in the ground at the well or be located in basement of house, or in other building at any distance from well.

Air can be pumped into the tank by simply turning spigot which is located near the base of pump.

OUTFIT INCLUDES

- 1 36-in.x10-ft. Steel Tank, total capacity 525 gallons, working capacity 350 gallons.
- 1 Fig. 7 "REX" 3 in 1 Pump with Cock Spout and Back outlet.
- 1 Fig. 218 Pittsburgh Jack.
- 1 3-in. Air Cylinder with Valves complete.
- 1 2 $\frac{1}{2}$ x14-in. Brass Lined Water Cylinder, for 1 $\frac{1}{4}$ -in. I. P., $\frac{3}{8}$ -in. Steel Rod.
- 1 Water Gauge, $\frac{1}{2}$ -in. pipe.
- 1 Pressure Gauge for $\frac{1}{4}$ -in. Pipe.
- 1 1-in. Gate Valve.
- 1 1-in. Swing Check Valve.
- 1 $\frac{3}{4}$ -in. Stop and Waste Cock.
- 1 1-in. Water Relief Valve.
- 1 $\frac{3}{4}$ -in. Hose Bibb.

Together with Pipe and Fittings as shown in cut, and fitted ready to set up.

No. 181.—Outfit complete as described above (no pipe or rod below the air cylinder) \$ 200.00

Larger or smaller tank at change in List can be substituted as will best fill particular requirements.

2-inch pipe with 1 $\frac{1}{8}$ -inch octagon wood rod and 1 $\frac{1}{4}$ -inch tubular well cylinder can be used with No. 70 pump as described on page 325.

The advantage of this is that the valves can be drawn out at the top of the pump for repairing without removing pipe from the well or disturbing any of the fixtures.

STERLING GAS OR GASOLINE ENGINE

The Sterling engine is of the hopper cooled type, doing away with the troubles incident to the air cooled engine. Accessibility to all parts is one of the main features. The bearings are all exceptionally large and made of the same high grade material and receives the same care in making as the higher priced engines.

Crank shaft is drop forged, the connecting rod having Phosphor bronze bushings at the piston end, the piston end being of hardened steel. A self-contained hard oil cup is used in the crank end of the connecting rod. The centrifugal single weight arm type of governor being used regulates the engine perfectly.

The valves are located in the cylinder head. Cylinder head and igniter are equipped with copper gasket instead of packing.

Water can be easily drained or by mixing calcium chloride with the water, draining is unnecessary as the water will not freeze.

STERLING GAS OR GASOLINE ENGINES.

A high grade standard engine. Well built, tested and guaranteed. Works satisfactorily, and is easily started and taken care of. Will be found invaluable for use about the farm doing all the odd jobs of the handy-man.

No. 1. —1 horse power. Horizontal hopper cooled Each \$ 50.00

No. 2 $\frac{1}{2}$. —2 $\frac{1}{2}$ horse power. Horizontal hopper cooled Each 90.00

No. 4. —4 horse power. Horizontal hopper cooled Each 142.50

Electric dry battery is furnished with each engine. In ordering always state whether gas or gasoline is to be used.

TELEPHONES

MAGNETO TYPE

Closed View

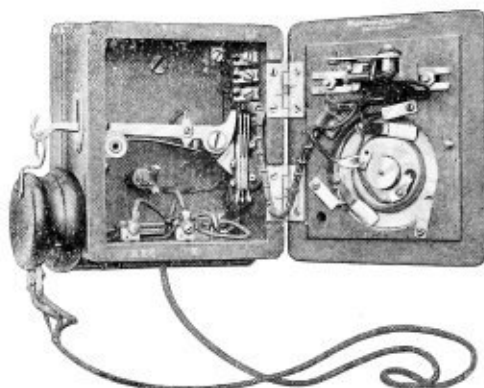

Open View

No. 1317H.—Magneto type. Shelf wall set adapted for use on bridging lines. Compact in form measuring 24 inches in height and 9½ inches in width. All working parts easily accessible. Oak finish case. The generator, ringer, switch hook and induction coil located in upper part of case and space is provided in the lower part for three 6-inch standard dry cells. Equipped with a 1000 ohm ringer, 3 bar, open circuit, alternating current generator and short self-contained switch-hook. Complete with batteries ready for installing..... Each \$ 15.00

INTER-PHONE

Closed View

Open View

No. 1327A.—Inter-phone. Walnut case 5 inches wide, 5½ inches high and 4 inches deep. Nickel trimmed. Carefully made—the workmanship and material being the best. Easy to install and the cost of maintenance is no more than that for an electric door bell. Three or four dry batteries will furnish the current for both signaling and talking. Furnished complete (except wire and batteries) ready for installing. Designed for use in the house between rooms or from house to barn, stable or garage. Each \$ 7.50

PONY INSULATORS

No. 9.—Glass pony insulator. ¾-in. groove.
Per 100 \$ 4.50

OAK BRACKETS

No. 12.—Standard oak brackets.
Made from selected live oak.
Per 100 \$ 3.50
250 in a sack.

LOCUST PINS

No. 9.—Locust pins. Made from selected black locust absolutely free from knots and chips.
Per 100 \$ 3.50
350 in a sack

For baling or bundling hay, straw, flax, tow, excelsior, broom corn, wool, cotton, cotton seed hulls, rags, lintels, shavings, sawdust, leather, headings, staves, etc. For use in any kind of press.

To get the length of tie required, add three inches to the measure around the bale, when under pressure.

Information as to Size Ties Used in Various Presses for Convenience in Ordering.

For 17 x 22 Perpetual Presses, use Ties 8, 8 $\frac{1}{2}$ or 9 feet long. No. 14 wire for heavy work, and No. 15 for light work. For 14 x 18 Perpetual Presses, use Ties 8, 8 $\frac{1}{4}$ or 8 $\frac{1}{2}$ feet long. No. 14 wire for extra or extreme heavy work, No. 15 for heavy and medium work, and No. 16 for light work.

For 12 x 15 Perpetual Presses, use Ties 7 $\frac{1}{2}$, 7 $\frac{3}{4}$ or 8 feet long. No. 15 wire for heavy work, and No. 16 for medium or light work.

For Upright Hand Presses, use No. 14 and No. 15 wire.

For Upright Light Horse Presses, use No. 14 wire.

For Upright Heavy Portable or Light Stationary Horse Presses, use No. 13 wire.

For Upright Heavy Stationary and Beater Presses, use No. 10, No. 11 and No. 12 wire, according to the size of Bale and number of Ties used.

In ordering specify Style Wanted, as well as Length and Gauge of Wire.

ANNEALED BALING WIRE

TELEPHONE AND TELEGRAPH WIRE

Birmingham Wire Gauge	Decimal Diameter	Bundles per Mile	Weight per 100 lb. Pounds	Weight per Mile Pounds	Weight per Mile Ohm.
6	.203	3	112	590	Extra BB
8	.165	2	74	390	4700 to 5000 lbs.
9	.148	2	60	314	BB
10	.134	2	49	258	5600 to 6000 lbs.
11	.120	2	39	206	Steel
12	.109	2	32	170	6500 to 7000 lbs.
14	.083	2	19	99	

Telephone and telegraph wire. High grade extra galvanized.
Extra BB.—Uniform in quality, pure, tough and pliable. Stands highest in conductivity.
BB.—Grade in most general use. Meets the requirements of local telephone companies for medium toll lines, etc.
Steel.—More expressly designed for short-line telephone service, where a measure of conductivity can be exchanged for tensile strength in a light wire.

To find the resistance in ohms in any grade and size, divide the weight per mile ohm of the grade in question by the weight per mile and the quotient will be the resistance in ohms per mile.

100 pounds in a keg.

TRUSS AND CABLE FENCING

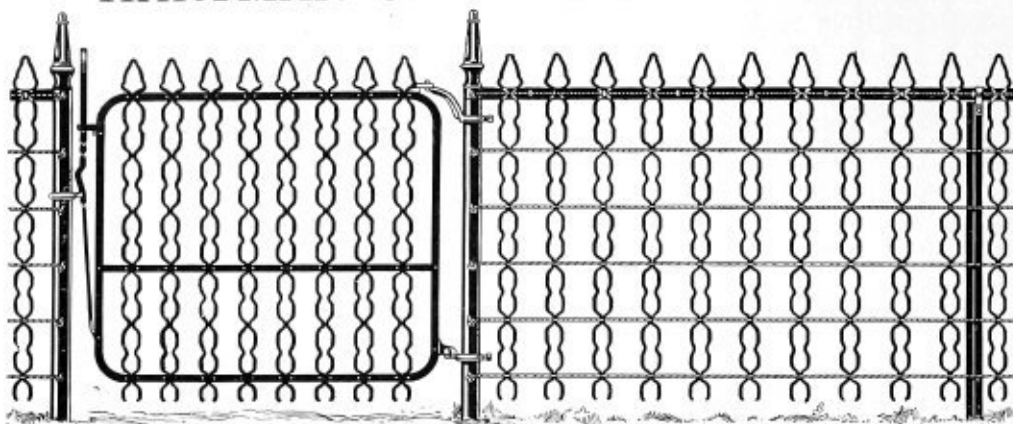

A very strong, handsome, durable and economical fencing.

As will be seen, each strand is composed of six wires thoroughly galvanized of superior quality. The strength of the strand is equal to the combined tensile strength of all the wires. The provision for stapling to the posts prevents the strands from stretching through the staples and causes the fence to stand and hold its shape. No loose saggy places; no skill or expensive special tools are required for properly erecting this wire. Put up in small and compact reels weighing 100 pounds each which are easily handled in the field and warehouse.

Truss and Cable.—2-inch strand. No. 13 wire is used in the cable, and No. 14 wire in the truss. Weighs 2 pounds to the rod. About 825 feet to the 100 pounds Per Pound \$.10

"STERLING BRAND FOR QUALITY STANDS"

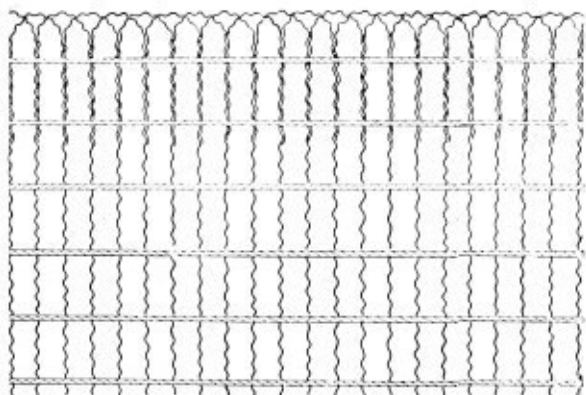

HARTMAN STEEL PICKET FENCE

Hartman steel picket fence style 1. Pickets of No. 6 galvanized steel wire, 3 inches apart. Cables consisting of 2 strands of No. 12 galvanized wire, 6 inches apart. An extra heavy high grade general purpose fence at a medium price. Easy to erect, has long life and is ornamental. Can be erected on wood frame. In rolls containing 300 lineal feet.

Height, inches	25	31	37	43	49	55	61	67	73
No. of cables	4	5	6	7	8	9	10	11	12
Per lineal foot	\$.32	.36	.40	.46	.54	.64	.74	.84	.94
Gates 3 feet wide	Each \$ 7.00	7.00	7.00	9.00	9.00	10.00	11.00	12.00	13.00

The above fence can also be furnished complete with steel posts and top rail. Walk gates $3\frac{1}{2}$ or 4 feet wide or drive gates 9 feet wide can also be furnished. Special booklet and prices on application.

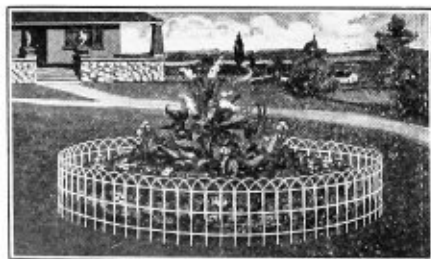

Crimped steel picket fence style 10. Pickets of No. 10 galvanized wire 3 inches apart. Cables consisting of 2 strands of No. 13 galvanized wire, 6 inches apart. A good general purpose lawn fence at a low price.

Height, inches	30	36	42	48
Per lineal foot	\$.16	.18	.22	.26

In rolls containing 200 lineal feet.

FLOWER BED GUARD

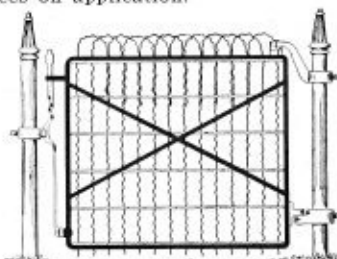

Flower bed guard and lawn border. Made of No. 10 galvanized wire. Cables consist of 2 strands of No. 13 galvanized wire twisted together. Requires no post and conforms to any shape of bed. Indispensable for lawns, parks and cemeteries. In rolls containing 150 lineal feet.

No. 16.—16 inches high	Per lineal ft. \$.10
No. 22.—22 inches high	.13

Not carried in stock; shipped from factory direct.

"STERLING BRAND FOR QUALITY STANDS"

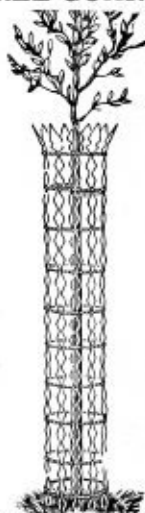

Crimped wire gates to match style 10 fence. 3 ft. wide.

Height, inches	30	36	42	48
Each	\$ 5.60	5.60	7.20	7.20

Can also furnish walk gates $3\frac{1}{2}$ or 4 feet wide or drive gates 9 feet wide. Prices on application.

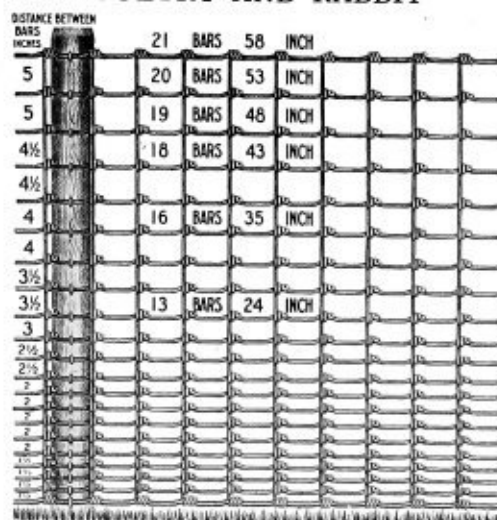

TREE GUARDS

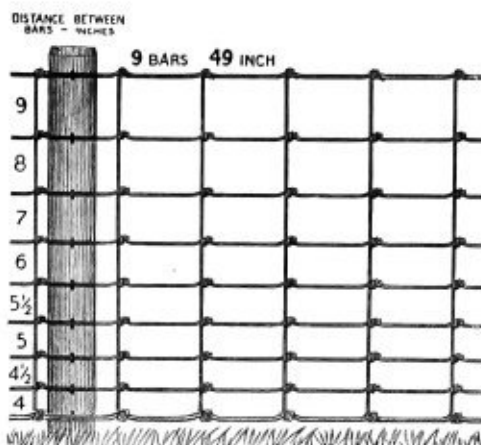

Hartman steel picket tree guard. Made of No. $8\frac{1}{2}$ galvanized wire with 2 strands of No. 12 galvanized wire for cables, spaced 6 inches apart. With springs for keeping the guard in shape as well as protecting the tree and allowing for expansion with growth of tree. Easily erected, very durable owing to heavy wire used, yet popular in price.

No. 285½.—Diameter 8 in. Height 5½ ft.	Per doz. \$ 22.00
No. 286.—Diameter 8 in. Height 6 ft.	24.00

In rolls containing 10, 20 or 30 rods.

National Field or Farm fence. Especially adapted for fencing fields and pastures. Economical and serviceable design and makes an excellent line fence. Top and bottom wires No. 9; intermediate wire No. 11; stay wires No. 12. All thoroughly galvanized.

No. 949x6.	—Height 49 inches.	6 inch stays.	Weight per rod about 12 lbs.	Per rod \$ 1.06
No. 949x12.	—Height 49 inches.	12 inch stays.	Weight per rod about 9.2 lbs.	“ .82
in rolls containing 20, 30 or 40 rods.				

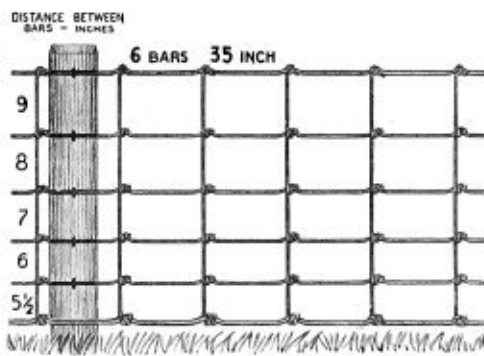

In rolls containing 20, 30 or 40 rods.

FIELD OR FARM

No. 845.

FIELD OR FARM

No. 635.

National Field or Farm fence. Especially adapted for fencing fields and pastures. When erected with one or two strands of barbed or smooth wire it makes a good fence for turning heavy stock. Top and bottom wires No. 9; intermediate No. 11; stay wires No. 12. All thoroughly galvanized.

No. 845x6.	—Height 45 inches.	6 inch stays.	Weight per rod about 10.9 lbs.	Per rod \$.96
No. 845x12.	—Height 45 inches.	12 inch stays.	Weight per rod about 8.3 lbs.	"	.74

In rolls containing 20, 30 or 40 rods.

National Field or Farm fence. For fencing horses or cattle, this style is economical and effective. Top and bottom wires No. 9; intermediate wires No. 11; stay wires No. 11. All thoroughly galvanized.

No. 635x6.	—Height 35 inches.	6 inch stays.	Weight per roll about 8.5 lbs.	Per rod \$.77
No. 635x12.	—Height 35 inches.	12 inch stays.	Weight per rod about 5.3 lbs.	"	.48

In rolls containing 20, 30 or 40 rods

National Fence is made of thoroughly galvanized wire and embodies all good features of the older style fences with many new improvements. The sizes of the wire are right; the spacing is right, making an ideal fence for all purposes. The **National stay** has no protruding ends at intersections to scratch and mutilate stock—one continuous piece of steel from one end to the other and from top to bottom. Cannot slip—just as secure at top and bottom as at other intersections.

Can be furnished in other heights, and made of heavier wire. Prices quoted on application.

Per 100 square feet, all sizes as above										\$ 5.50

Sold only in full rolls containing 150 lineal feet.

The lighter weights of 2 inch mesh netting are generally used for poultry yards. The 16 gauge makes a substantial and attractive lawn or division fence at a very low cost. A very desirable poultry yard fence consists of a 1 inch mesh next the ground, 1, 1½ or 2 feet high (to enclose small chicks) then regulation 2 inch mesh, 4, 5, or 6 feet high.

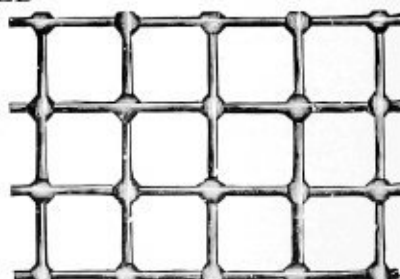

SQUARE NETTING, GALVANIZED

No. 4 MESH

No. 3 MESH

No. 2 MESH

Galvanized square mesh netting or hardware cloth. Galvanized after weaving, which prevents the wires moving at the intersection and makes a smooth joint. Used for window guards, sand screens, sieves, tree guards, etc. The number indicates the meshes to the square inch, thus No. 4 has 4 squares or openings to the inch in either direction.

No. 4.—22 gauge wire, galvanized. Widths 24, 30, or 36 in. In rolls containing about 50 lineal ft. Per 100 sq. ft. \$ 7.50

No. 3.—20 gauge wire, galvanized. Widths, 24, 30, or 36 in. In rolls containing about 50 lineal ft. " " 7.00

No. 2.—18 gauge wire, galvanized. Widths 24, 30 or 36 in. In rolls containing about 50 lineal ft. " " 7.00

24 inch rolls contain about 100 square feet; 30 inch, about 125 square feet; 36 inch about 150 square feet.

Rolls containing 100 lineal feet and widths narrower or wider than those listed can be furnished from factory direct.

OPAL GALVANIZED.

Made of selected wire No. 33 gauge. 12 mesh. Double selvage, no raveling. New double process of double thick zinc coating. Extra galvanized after weaving. By this process a far more uniform finish is produced which long retains its original color and appearance. The fabric is protected by more than twice the usual thickness of zinc coating and is therefore more than twice as durable.

Width, inches	24	26	28	30	32	34	36

PADLOCK ASSORTMENTS

YALE

No. 10A. Assortment. Yale padlocks. Sample board measuring 24x12 inches. Mahogany finish and of very substantial appearance. Supplied with heavy brass hooks, number plates and fittings. In addition in the center is a large Yale medallion—a very fine casting beautifully oxidized and relieved. The board (as the illustration shows) is intended to be attached to an upright of the shelving by means of the square hooks and screw eyes which are furnished. A price card is packed with each assortment giving the usual retail selling prices. The assortment consists of 6 dozen padlocks—selected from the most popular sellers. 16 different styles are included as follows:

1/6 dozen 840	1/4 dozen 585	1/2 dozen 225	1/2 dozen 115
1/6 " 843	1/4 " 605V	1/2 " 615S	1/2 " 671V
1/6 " 8454	1/2 " 326	1/2 " 453J	1/2 " 674N
1/4 " 805F	1/4 " 563	1/2 " 645C	1/2 " 9645J

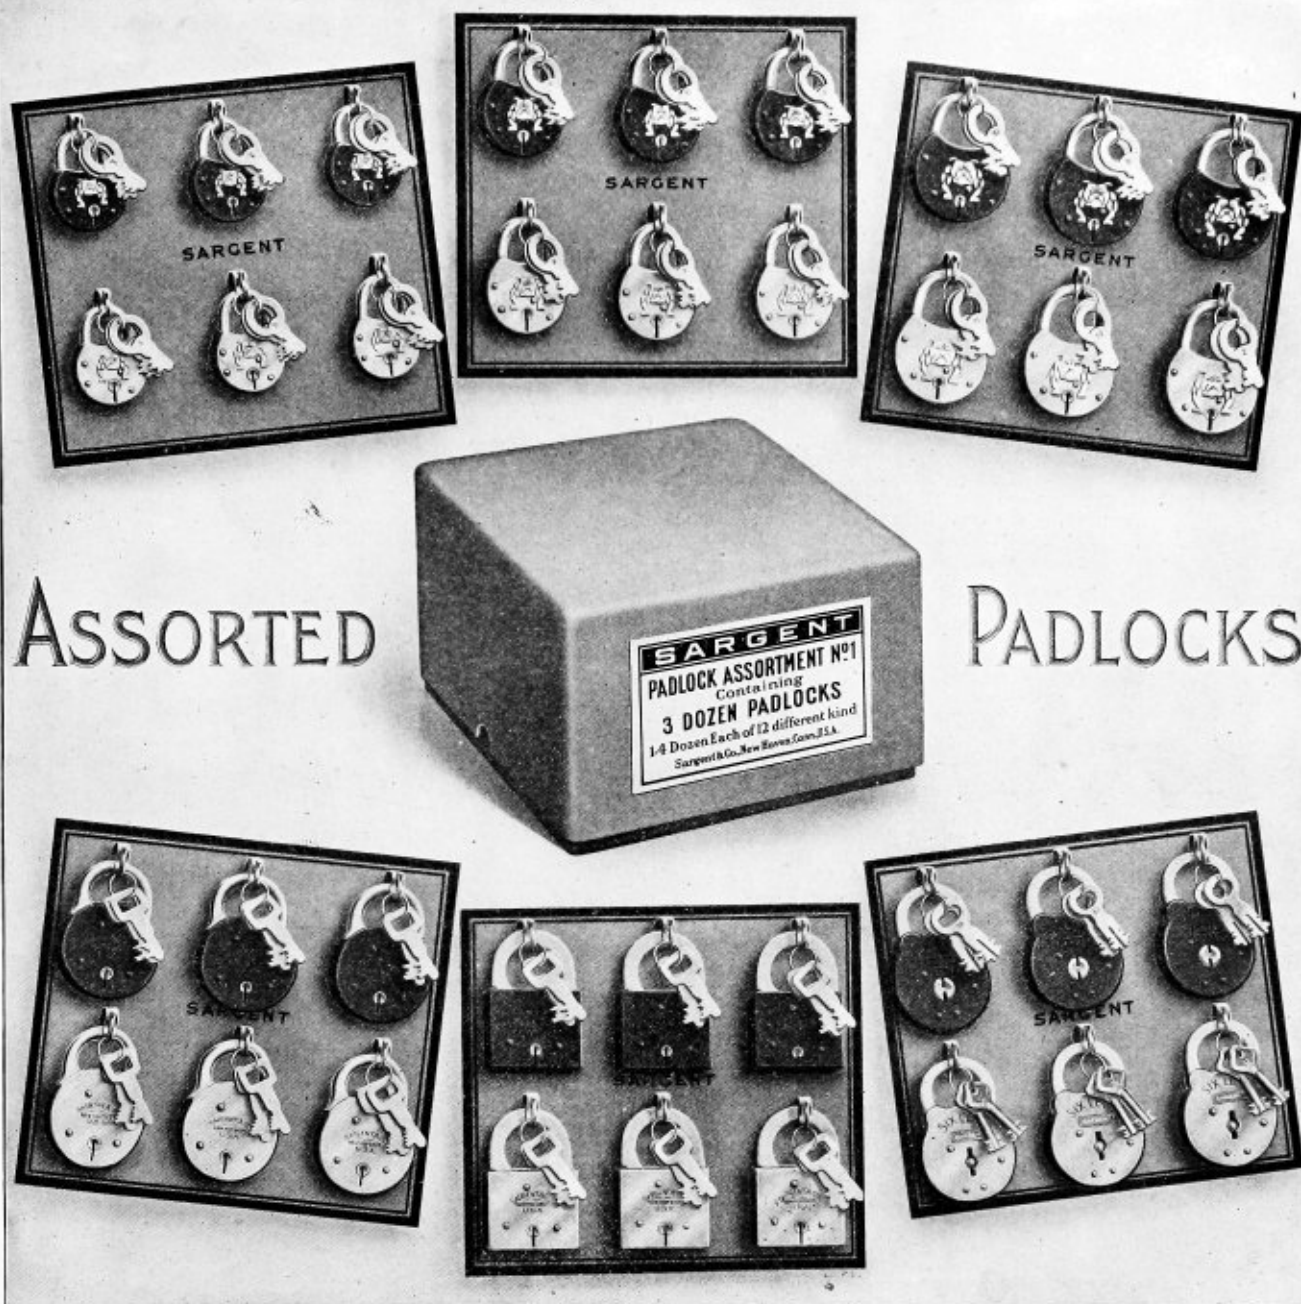

Many of these Locks will be found illustrated and more fully described on the following pages.

No. 10A.—Assortment. Yale padlock sample board. 6 dozen assorted padlocks as above together with handsome display board Per assortment \$ 40.00

One assortment in a case.

EAGLE CABINET LOCK STOCK CABINETS

FRONT VIEW

REAR VIEW

Eagle cabinet lock display and stock cabinet. Handsome dark oak finish case. Hinged back and recessed front. On this front are mounted 23 of the most desirable and best selling cabinet locks. Without ordering an excess quantity of any type of lock, the dealer is thus afforded a variety of styles and prices suitable to ordinary trade and which experience has taught are ready sellers. The cabinet measures 19 inches in height, is 16 inches wide and 11½ inches deep. The reserve stock is all stored in the cabinet and is accessible only from the rear. Keeps the stock clean, is convenient and handy. Shows at a glance what numbers are required for replenishing the stock.

The assortment contains a great variety of locks—drawer, locker, wardrobe, chest, etc. In steel, all brass and brass cylinder. Tumbler, flat key and double bitted key. By glancing over the retail price columns below, it will be observed that the majority of the locks are popular in price and while the assortment contains a variety of higher priced patterns, only a few of each number are included.

The cabinet is well made and handsomely finished and will add to the appearance of any store-room. Placed in a conspicuous location, it will prove to be a "Silent Salesman".

We give below a detailed list of the contents of the cabinet together with retail price of each. All locks included in this cabinet are regularly carried in stock by us and for fuller description or for re-ordering, refer to pages 372 to 385.

One-half gross in a box.

WINDOW FASTENERS

No. 212.—Tuscan bronzed fastener with $2\frac{1}{2}$ inch fast joint steel butts and $2\frac{1}{2}$ in. hook and eye. Complete with screws. Per dozen sets \$ 2.64
Each set in carton; one dozen in a box.

TRANSOM LIFTERS

Automatic Grip Transom Lifters. Either right or left hand, and suitable for all transoms.

Steel rods. Pekin finish (red copper).

Nos.	P2013	P2014	P2534	P2535	P2545	P2546
Length, feet	3	4	4	5	5	6
Diameter, inches	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{8}$	$\frac{1}{8}$	$\frac{3}{8}$	$\frac{3}{8}$
Each	\$.26	.26	.40	.47	.60	.68

Steel rods. Antique copper finish. Complete with screws to match.

Nos.	DA2013	DA2014	AB2534	AB2535	AB2545	AB2546
Length, feet	3	4	4	5	5	6
Diameter, inches	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{8}$	$\frac{1}{8}$	$\frac{3}{8}$	$\frac{3}{8}$
Each	\$.40	.43	.51	.60	.73	.83

Steel rods. Old brass finish. Complete with screws to match.

Nos.	OT2013	OT2014	OB2534	OB2535	OB2545	OB2546
Length, feet	3	4	4	5	5	6
Diameter, inches	$\frac{1}{4}$	$\frac{1}{4}$	$\frac{1}{8}$	$\frac{1}{8}$	$\frac{3}{8}$	$\frac{3}{8}$
Each	\$.40	.43	.51	.60	.73	.83

Can be furnished in lengths 7, 8, 9 or 10 feet by $\frac{3}{8}$ or 7-16 diameter from factory direct.

The above illustrations show how to apply. Notice that the guides for the rod are placed so as to act as stops, preventing the rod from pulling out when the transoms are open the full width. By the automatic grip, transoms can be opened easily and locked in any position desired. The same lifter can be used equally well for all transoms, whether hinged at the top, hinged at the bottom, swung on centers to pull down, or swung on centers to push up. Can also be used on transoms working vertically, and is suitable for either right or left hand without changing any of the parts.

$\frac{1}{4}$ -inch rods designed for light transoms; $\frac{1}{8}$ -inch for medium transoms; $\frac{3}{8}$ -inch for heavy transoms.

TRANSOM CHAINS

Transom chains. Steel chain, 12 inches long. Complete with screws to match.

Per set	\$ 3.15	3.80	4.55

One set in a box. Complete with wrench.

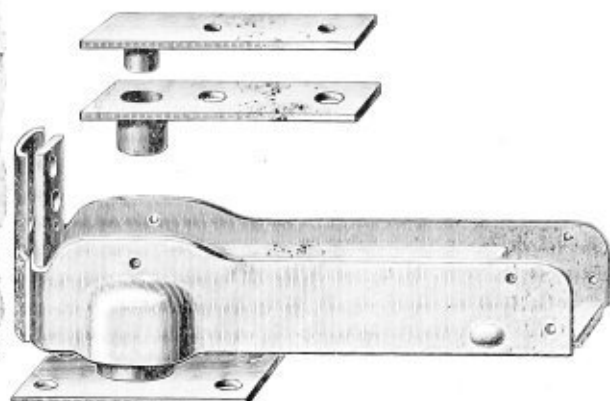

Can be fitted with the greatest ease to doors of any thickness, by reason of the adjustable shoe. The spring power being adjustable, the door will close automatically from either side, slow or fast as desired. Balanced on raised center post, the ball bearing gives a remarkably easy motion to the door and is protected from dirt and water. Are very compact and require but little room.

"STERLING BRAND FOR QUALITY STANDS"

SARGENT FLOOR SPRING HINGES

Sargent floor spring hinge applied to door, side plate removed.

Sargent floor spring hinge, with top pivot.

Sargent adjustable surface floor spring hinge requires no mortising into the floor, but is secured to the surface of the floor. Wrought steel, ball bearing, hardened steel raceway.

The spring tension is adjustable and may be easily changed for doors of varying sizes or subject to different conditions of draft. The hinge is a holdback and the door may be held open at an angle of 95 degrees. The screw at the forward end of the hinge is for adjusting the alignment of the door—a feature that readily commends this to the user.

The side plates are large enough to cover the hinge entirely, as well as any small defects in notching the door for the hinge. The plate at the back of the door gives a finished appearance to the work.

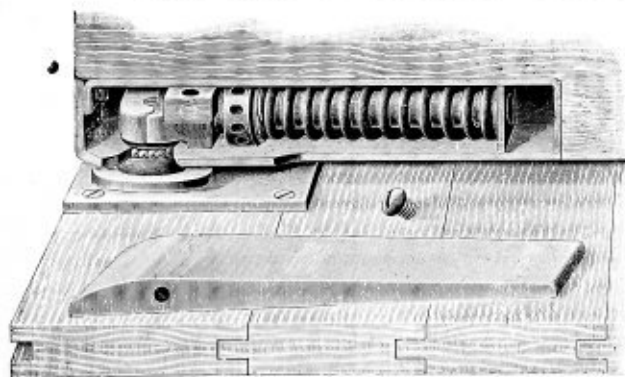

Note the wide range in thickness of door—one size taking any size door from $1\frac{1}{8}$ to 2 inches in thickness.

A set consists of hinge with side plates for bottom of door and pivots for top.

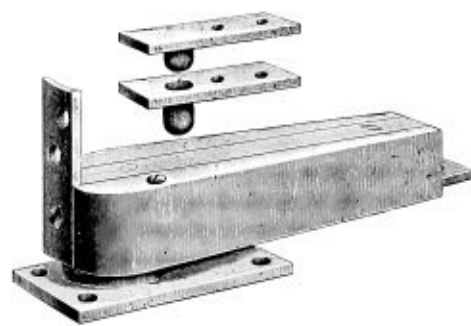

No. 4570.—Ivory black finish.	For doors $1\frac{1}{8}$ to 2 inches	Per set \$ 3.30
No. DA4570.—Antique copper finish.	For doors $1\frac{1}{8}$ to 2 inches	" 4.20
No. OT4570.—Old brass finish.	For doors $1\frac{1}{8}$ to 2 inches	" 4.20

Complete with screws. One set in a box.

SHELBY CHIEF FLOOR SPRING HINGES

Shelby Chief Hinge Applied to Door. Finished Plate Removed.

Shelby Chief Hinge.

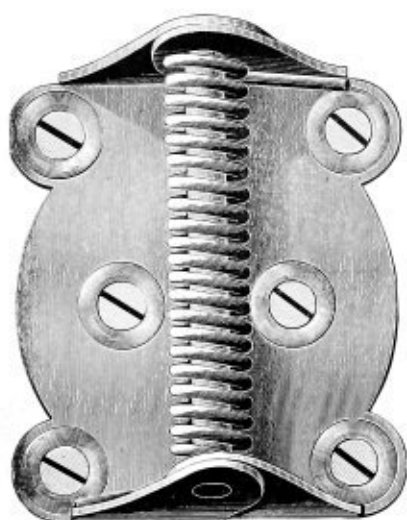

Shelby chief ball bearing floor hinges do not require amortise cut into the floor, but are secured to the surface of the floor. Water cannot get to the working parts of the hinge and rust them out. No metal box required for concrete, cement or tile floors. Can be used where steel beams come near the surface of the floor. Tension of spring can be adjusted at any time after the door is hung.

Japanned Steel, Nos.	F2	F4	F6

LANE'S HOUSE DOOR HANGERS

STANDARD

Nos. 600 and 300

BALL BEARING

Nos. 750 and 375

Lane's Standard parlor door hangers. All steel single track hanger to run noiselessly on a steel track. Quickly adjusted by turning only one screw with an ordinary screw driver. Noiseless, durable, quickly applied and easily adjusted.

No. 600.—Standard full set. For double doors, to slide 4 feet or less each. 4 hangers, including 14 feet of track, gravity stops, striking plates, floor guides and all screws Per set \$ 6.00

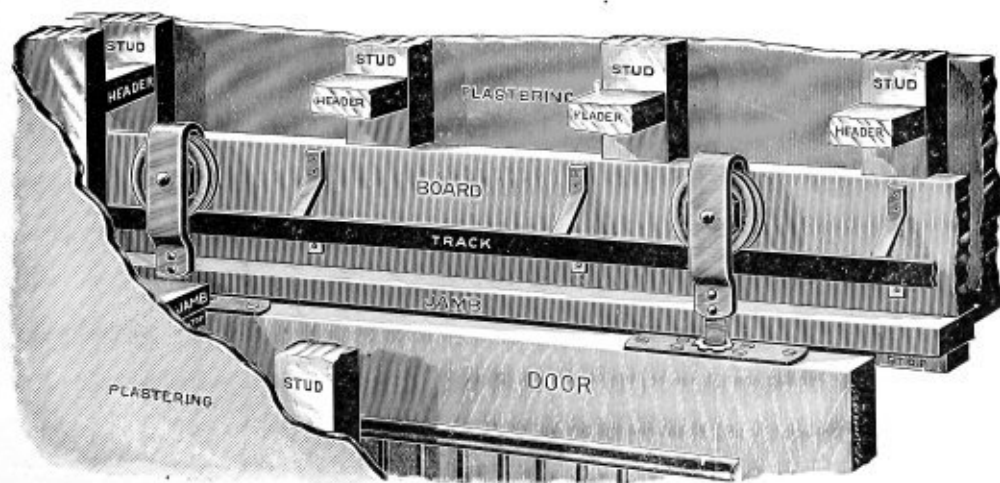

No. 300.—Standard half sets. For single doors to slide 4 feet or less. 2 hangers, including 8 feet of track, floor guide and all screws Per set 3.00

Lane's ball bearing parlor door hanger. All the advantages of the Standard hanger with the addition of the ball bearing feature. Cups and cones machined from solid steel and carefully hardened. The balls are made of the best steel hardened and polished.

No. 750.—Ball bearing full sets. For double doors, to slide any distance. 4 hangers, including 14 feet of track, gravity stops, striking plates, floor guides and all screws Per set \$ 7.50

No. 375.—Ball bearing half sets. For single doors to slide any distance. 2 hangers, including 8 feet of track, floor guide and all screws Per set \$ 3.75

NEW MODEL

Lane's New Model parlor door hangers. Frame entirely of steel. The wheel has noiseless fiber tread and roller bearings making it anti-friction and adapted for any length run. The adjusting nut extends through the base plate and has serrated projecting flanges, both above and below, by which it may be turned.

No. 500.—New Model full sets. For double doors to slide any distance. 4 hangers, including 14 feet of track, gravity stops, striking plates, floor guides and all screws Per set \$ 5.00

No. 250.—New Model half sets. For single doors to slide any distance. 2 hangers, including 8 feet of track, floor guide and all screws Per set \$ 2.50

All above, one set in a box.

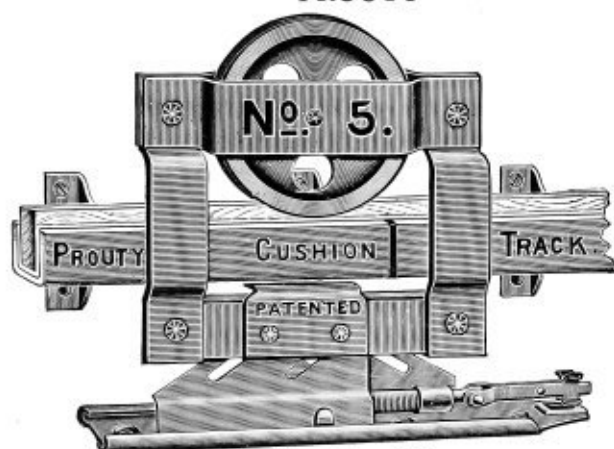

No. 9. —Rail for any of above hangers. $1\frac{1}{4} \times \frac{7}{8}$ inches. In lengths of 7 or 8 feet Per ft. \$.09

"STERLING BRAND FOR QUALITY STANDS"

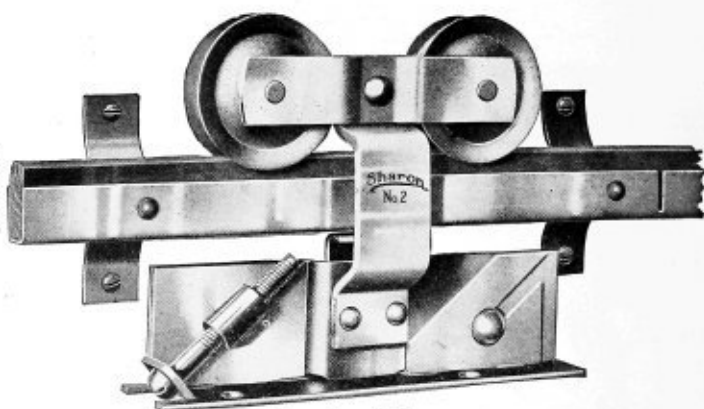

SLIDING DOOR HANGERS

PROUTY

SHARON

Nos. 5A and 5B

Nos. 2 and 2 1/2

Prouty cushion track house door hangers. Fitted with special noiseless bearings and tread turned true to fit track. Shaft is hardened and sound deadening felt compression washers, as shown in cut, prevent wheel from side play or rattle. Track is specially constructed—the hard maple rail thoroughly kiln dried and mounted in felt cushion supported by metal case. This makes the hanger absolutely noiseless. Horizontal adjusting screw and locking device, simple in operation and remains as adjusted. Rubber tired roller floor guides.

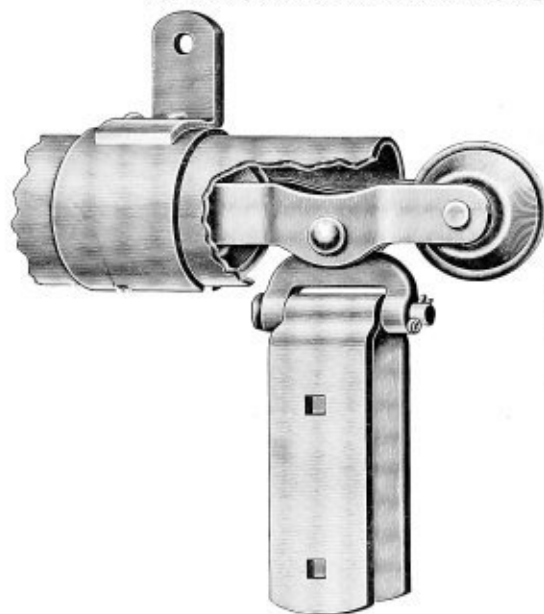

No. 5A.—For double doors complete with 14 feet (2-7 ft. lengths) of track Per set \$ 6.00
 No. 5B.—For single doors complete with 8 feet of track " 3.20
 No. 05.—Track only. 7, 8, 10, or 12 ft. lengths Per ft. .14

Sharon house door hangers. All steel. Wheels fitted with vulcanized fibre tread and steel flanges fitted with brass bushing. A steel lip on the hanger fits close under the track and makes it impossible to derail. Center stop attaches to jamb and rubber faced roller guides keep door in an alignment. Rail made from seasoned kiln dried hard maple reinforced by a heavy steel channel, making it impossible to warp either vertically or horizontally. These steel channels are notched at 6 and 12 inches from the ends, so as to furnish the desired length of track. With screws for hangers.

No. 2.—For double doors. With roller guides, stop and 14 feet of track Per set \$ 5.50
 No. 2 1/2.—For single doors. With roller guides and 8 feet of track " 3.00
 One set in a box.

No. 02.—Track only. 7, 8, 10 or 12 ft. lengths Per ft. \$.14

AUTOMATIC FIRE DOOR FIXTURES

WILCOX, SLIDING DOOR

Wilcox Fire Door Hangers and Automatic Fixtures. The hangers are malleable iron 21 inches long and $3\frac{1}{2}$ inches wide. Wheels 5 inches in diameter and roller bearing. Packed complete with all the necessary track, hangers, bolts and screws for attaching to door; heavy cast washers for wall bolts; wall bolts not included but will be furnished at market price if the thickness of wall is given. 16 pounds of counterbalance weights are included with each set. Underwriters require two hangers for doors up to 6 feet wide inclusive, and 3 hangers for doors over 6 feet. For this reason we quote below fixtures complete as required for the different sized openings.

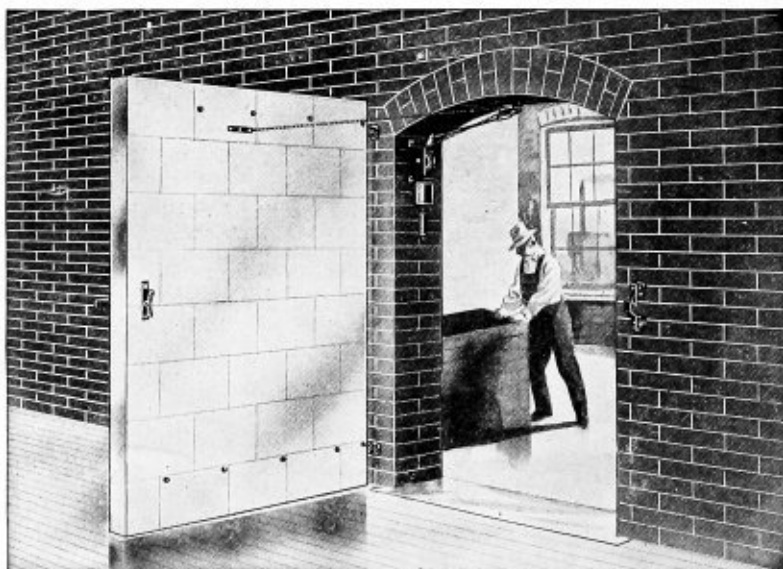

No. 501A.—For sliding doors. Hangers, track and automatic fixtures. Complete with bolts and screws (except wall bolts). With fuses which release the door from either side at 160 degrees Fahrenheit, causing the same to close.

4 ft., per opening (2 Hangers)	\$ 19.70	7 ft., per opening (3 Hangers)	\$ 24.00
5 ft., per opening (2 Hangers)	20.30	8 ft., per opening (3 Hangers)	24.70
6 ft., per opening (2 Hangers)	21.00	9 ft., per opening (3 Hangers)	25.30
		10 ft., per opening (3 Hangers)	26.00

Above fixtures examined under standard requirements of the National Board of Fire Underwriters and approved.

In ordering give thickness of doors and width of opening; doors must lap 4 inches on each side.

WILCOX, SWINGING DOOR

Wilcox automatic swinging door fixtures. Applicable for single or double doors. The small weight merely secures the tension in chain. When the link fuses at 160° Fah. it releases the heavy weight which drops on to the small weight and closes the door. In ordering it is necessary to give the exact width of opening, thickness of the wall and the three dimensions of doors. State at the same time whether single or double and if hinges are wanted so order.

Furnished complete with heavy latch and bolts and screws but no pintles or hinges, which are priced separately.

No. 208S.—For single swinging doors. Fixtures only

Per set \$ 10.00

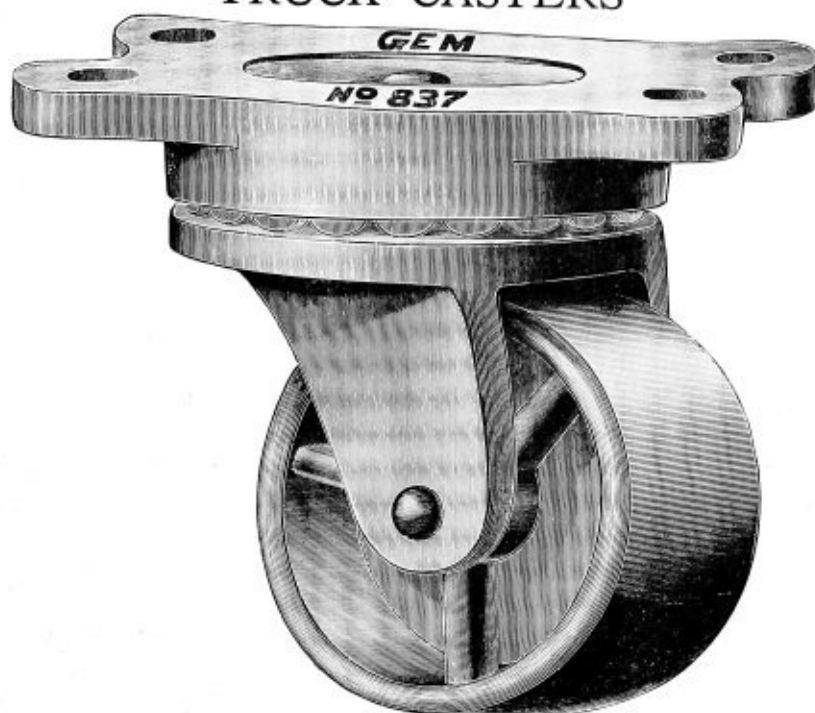

No. 208D.—For double swinging doors. Fixtures only

18.00

Not carried in stock; shipped from factory direct.

Bolt ends with hexagon nuts, 10 per cent. extra. Shorter than above standard lengths in lots of 100 and over will be charged at the price per 100 of machine bolts of same length, subject to same discount.

TURN BUCKLES

Wrought iron turn buckles. With right and left bolt ends. Inside opening, 6 inches.

Diam. stub in.	¾	1½	2	3	4	5
Each	\$.40	.45	.50	.63	.75	.88
Diam. stub in.	1½	2	3	4	5	6
Each	\$1.00	1.25	1.50	2.00	2.65	3.50

BOLTS WITH THREAD AND NUT EACH END

Bolts with thread and nut each end. Otherwise known as bridge and roof bolts. Furnished with square nut on each end or hexagon nut on each end. With plain ends or upset ends—the latter recommended. By putting an excess of metal in the upset screw ends over that in the bar the full strength of the rod is maintained even when threaded. Bolts can also be furnished with head on one end, nut on other, larger sizes than machine bolts above listed. Prices will be quoted upon receipt of specifications giving sizes and quantities.

"STERLING BRAND FOR QUALITY STANDS"

EXPANSION SHIELDS AND ANCHORS

SEBCO EXPANSION SHIELDS

SebcO expansion shields. For use with lag screws. Made of best malleable iron. No special thread required. Used with lag screws for fastening articles to slate, stone, marble, brick, concrete, etc., without the use of wood plugs, lead, etc. Price of shields only without lag screws.

WATER MOTORS

Divine. 4 inch motor. Develops 5000 revolutions on 80 pound pressure, delivering $\frac{1}{4}$ brake horse power. Complete with 4 inch beveled face emery wheel; blue felt buffing wheel; cake of silver polish and grooved wood pulley.

No. 1492E.—Eastern gauge Each \$ 5.50
No. 1492P.—Pittsburg gauge " 5.50

The Divine water motor will be found invaluable in a score of ways. Can be used for all kinds of light work about the kitchen or laundry and will be found a handy thing for light work in factories, stores and offices. Can be attached to any spigot or water pipe and placed at any desired angle. Keep the shaft well oiled and the motor will do all that is required.

Divine. 6-inch motor. Develops on 80 pound pressure, $\frac{1}{4}$ brake horse power. Intended for heavier work. Can be belted to small machinery, rotary washing machines, etc. Regularly furnished with pulley (for flat belt) as shown in illustration.

No. 1992E.—Eastern gauge Each \$ 8.00
No. 1992P.—Pittsburg gauge " 8.00

FIRE EXTINGUISHERS

PITTSBURGH

LA FRANCE

Pittsburgh. Tank made of heavy specially rolled copper, properly tempered and thoroughly coated inside with a mixture of lead and tin to prevent corrosion. Vertical seam riveted and re-inforced on inside with solder. Cage or acid bottle holder made of brass rods, $\frac{1}{2}$ inch diameter, lead coated and so arranged that the bottom may be easily removed and yet be absolutely secure when in position. Throws a steady stream equal in fire fighting value to about 100 gallons of water.

No. 10.—Polished copper, lacquered Each \$ 18.00
No. 12.—Oxidized copper, old brass or nickel-plated (specify which) Each 20.00

American La France. Spun dome and bottom fastened by locked joints. Wiped solder joints on inside of seams. Main sheet will rupture before joints will yield. Interior coated by immersion in molten metal insuring a thick even coating. All soldering is done by blow pipes giving an even heat throughout. Heavy cast brass bottle holder. Rawhide non-sticking, durable gasket at top. Ground joint at hose elbow. Heavy non-breakable pure lead stopper. Throws a stream a distance of about 50 feet and is 40 times as efficient as water.

No. 8.—Polished copper, lacquered. Each \$ 15.00

Exclusive design doors all made from well-seasoned, kiln-dried lumber free from damaging imperfections. All 3 inch stile doors are full mortised and the 4 inch stile, blind mortised. The bottom rail is about $\frac{5}{8}$ inches high and doors are made $\frac{3}{4}$ inch longer and a trifle wider than sizes as listed—to allow for trimming. The wire cloth is placed on the door by special machinery which stretches the cloth drumhead tight. The cloth is pressed into a groove in the wood, and covered with a flush beaded moulding mitered at corners, preventing it from becoming loose and baggy.

REFRIGERATORS

LEONARD

Shows Zinc Lining.

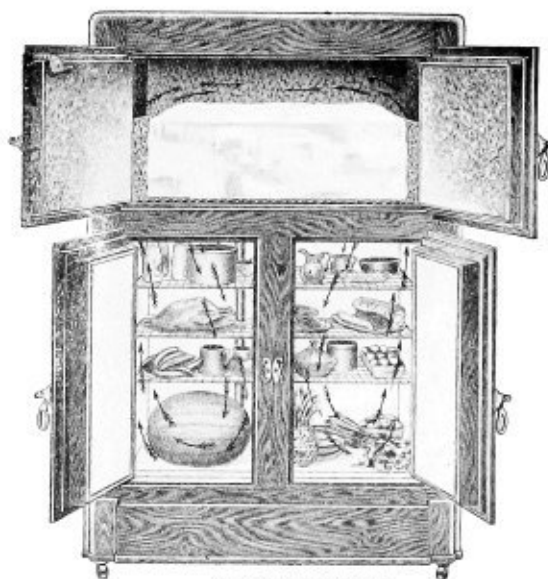

Shows White Enamel Lining.

Leonard refrigerators. Hardwood cases with front panels of quarter sawed oak showing the beautiful grain. The corners and edges are neatly rounded and the finish golden oak with finest grade of refrigerator varnish. Seven walls to keep out the heat as will be seen in illustrations above viz.: 1st, outside case. 2nd, charcoal sheathing. 3rd, dead air space. 4th, charcoal sheathing. 5th, inside case of tongued and grooved $\frac{3}{4}$ inch spruce. 6th, charcoal sheathing. 7th, zinc or white enamel lining soldered tight.

Ice racks of galvanized steel and retinned removable wire shelves. Most approved trap. Nickel-plated locks and hinges. Ball bearing casters. All interior parts easily removable for cleaning purposes.

Shows Cleanable Features

Shows Circulation

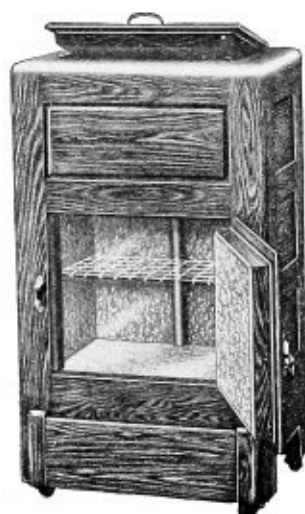

In the above illustration is shown how easily the refrigerator may be cleaned. Simply slip out the irons which make one side of the air passage and wash the flues as sweet and clean as new. The shelves and waste pipe can be taken out in a moment and readily cleansed. A few of the porcelain lined refrigerators have no flues but in these the air circulates around the whole interior.

The system of refrigeration consists of an arrangement of air passages, flues and ice rack to expose the largest possible cooling surface to the air in the ice chamber. This settles down on the provisions below as cold air is heavier than warm air. The warmest air in the provision chamber is forced upward to the top where it is drawn into the ice chamber by suction, through the flues or openings made for that purpose, to fill the vacuum left by the descending cold air. Thus established the circulation is kept up as long as ice remains in the box, the object being not only to cool the air but to dry it as well. The arrows in the illustration show the circulation.

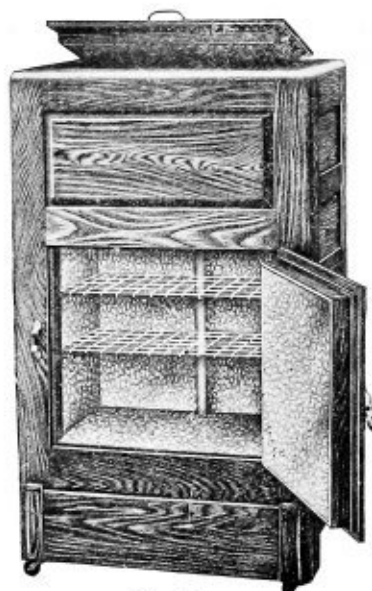

"STERLING BRAND FOR QUALITY STANDS"

REFRIGERATOR AND KITCHEN TABLE

LEONARD, ENAMEL LINED

Combination kitchen table and refrigerator. Something entirely new and convenient. Two useful articles combined in one, saving space in the kitchen. Another place where it is useful. Many households already have a refrigerator which is not large enough. Put this in place of the kitchen table and use two refrigerators. The cost for ice will be no more than for one large refrigerator and the food can be separated viz.: milk, butter, cream, lard, eggs, etc. in one, and meats, vegetables, etc. in the other. The satisfaction in having all these handy and just where you want them should not be overlooked. 7 walls for insulation. Nickel-plated locks and hinges. Wire shelves. White enamel lined. Hardwood, satin walnut finish and birch top.

No. 879.—Length, 44 inches; depth, 27 inches; height, 32½ inches. Large provision chamber 17¼x17x22 inches. Small provision chamber 17¼x17x8 inches. Ice capacity 85 pounds. Weight 220 pounds Each \$ 52.80
Not carried in stock; shipped from factory direct.

REFRIGERATORS

LEONARD, PORCELAIN LINED

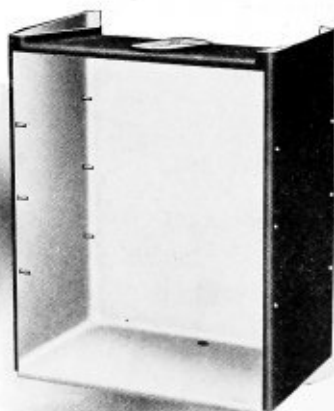

Shows Insulation of Porcelain Lined Refrigerators.

Full size sectional view of one wall of a Leonard Cleanable Porcelain Lined Refrigerator

Side Icing.

Overhead Icing

INTERIOR CONSTRUCTION.

Leonard porcelain lined refrigerators. Observe the twelve separate and distinct walls separating the contents from the outside air. Dead air cells are the ideal barrier to transmission of heat and the ideal insulating material against either heat or cold is the one combining the maximum number of dead air cells. In addition polar felt is largely used, and this in all working tests has proven superior to other insulating materials in point of ice saving and in maintaining low temperatures.

PORCELAIN LINING.

Each compartment is all one piece, and the corners are rounded to facilitate cleaning. The compartments are connected by an air tight joint cover. Shelf supports fasten from the outside. This method of construction gives a lower temperature with less consumption of ice than ever before. Refrigerators fitted with this lining represent the acme of perfection and while much lower in price are vastly more serviceable than those lined with tile, opal glass or solid porcelain. The enamel is fused on to the sheet at a temperature of 2500 degrees—and is there to stay.

LEONARD TRAP.

Trap and waste pipe made of solid nickel-plated brass which will not rust or corrode. Trap made with cup at both the upper and lower ends catching any water from accidental leakage or from spilling in either the ice chamber or provision chamber. Note the depression in the upper part of provision chamber. Easily accessible from the inside and can be readily removed for cleaning. This same trap and waste pipe with another system for returning water from accidental leakage is used in the plain refrigerators.

TRIMMINGS.

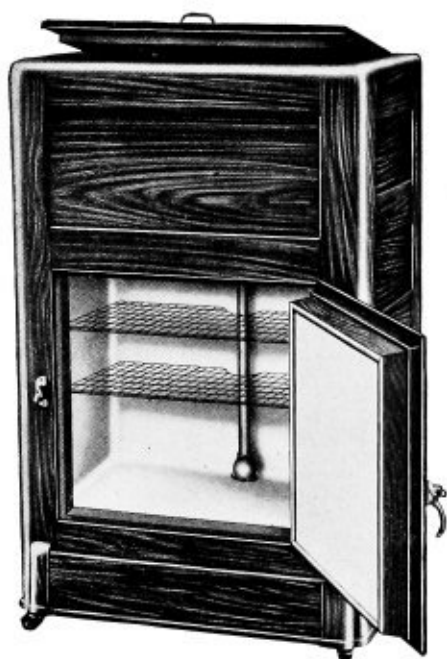

Solid cast brass, nickel-plated. The Ideal lock is constructed on the most scientific principle. Holds the door positively air tight with no strain on the rivets. A slight lift on the lever throws the door open. A key furnished with each lock. The hinges are substantial and match the lock in pattern and finish.

The Leonard Cleanable refrigerator is the best that can be made.

Janus Vacuum Bottles will keep liquids cold without ice, for 72 hours, and liquids hot without fire for 36 hours.

The secret of this is in the vacuum. The glass receiver within the metal case is really two bottles—one inside of the other. Air in the thin space between these bottles would act as a conductor of heat or cold. Take that air out completely and no conductor is left—in other words there is a vacuum.

As shown in illustration the bottle can be taken apart instantly which permits of sterilization. The glass receiver is not held in place by any adhesive but its bottom rests securely on a cushion and fits closely into the case. This form of construction minimizes the danger of breakage from strain or vibration due to a sudden jar. In the event of the glass filler being broken a new one can be readily obtained and easily inserted. The inner sides of the fillers are mercurized which produces a fine silvered effect. All bottles except the 1/2 pint size are furnished with patent laminated corks fitted with aluminum tips; 1/2 pint size fitted with plain cork tips.

The Janus bottle is made for every day use and is built throughout on scientific principles and by expert workmen. Every bottle thoroughly tested as to temperature and strength before leaving the factory.

ICE CREAM FREEZERS

DANA PEERLESS

Nos. 1 to 12

DP Toy

Nos. 16 to 25

Dana Peerless. With crank. High grade material throughout. Selected tubs. All metal parts coming in contact with the cream are heavily plated with pure block tin. All outside parts are galvanized. By a most simple arrangement all the gearing is enclosed, both top and bottom, in a ball-like frame, so it is impossible for it to catch ice or salt. The dasher is made on scientific principles, having two rows of leaves, screw-like in form on opposite sides of the stem. At right angles to them are four arms carrying two hardwood scrapers, which scrape cream from sides of revolving can before it becomes frozen hard, throwing it to the center against leaves, which lift it up and force it out again to the sides with a rolling motion—thus giving four separate motions with one revolution of the crank.

		WITH CRANK.

Securely wrapped in heavy paper, affording protection in shipping.

Dana Peerless. With fly wheel. Especially designed for use in small hotels, cafes and ice cream parlors. $1\frac{1}{4}$ -inch tubs with heavy galvanized hoops. Can made from extra heavy steel plate coated with pure tin and with strong steel ring around the top and heavy cast iron bottom, well tinned. The gear frame is extra heavy and thoroughly galvanized. Furnished with crank and fly wheel.

		WITH FLY WHEEL.		
Nos.		16	20	25
Quarts		16	20	25
Each		\$ 20.00	24.00	30.00

WHITE MOUNTAIN

WM Toy

White Mountain. With crank. Tubs of carefully selected second growth white pine, absolutely free from imperfections. The can is made of the best charcoal tin plate and every part that comes in contact with the cream is plated with pure block tin. The inside castings, or the beaters are of malleable iron, tin-plated. All outside castings are cast iron well galvanized to prevent rust. The mechanism is simple, yet efficient. A combination of three cog wheels produces the triple action. The can moving in one direction, the outside beater in the opposite direction and the inside beater opposite to that of the outside. Thus the cream is thrown from the center to the sides of the can and back again continually, thoroughly beating every particle and making the grain fine and smooth. The operation of the freezer is a very easy matter.

		WM Toy	01	02	03	04	06	08	010	012

"STERLING BRAND FOR QUALITY STANDS"

WASHING MACHINES

UP-TO-DATE

Up-to-date.—High grade tub with overlapping lid. A rotary motion without the turning of a crank. A continuous motion without constant exertion and high speed with the least possible effort. Combines the fly wheel with the lever motion. With every motion of the lever the fly wheel makes seven revolutions and the dasher turns almost completely around. No jerking or unusual wear on either the machine or the clothes. The castings are extra heavy and the machine is nicely finished and thoroughly built throughout Each \$ 13.00

REX

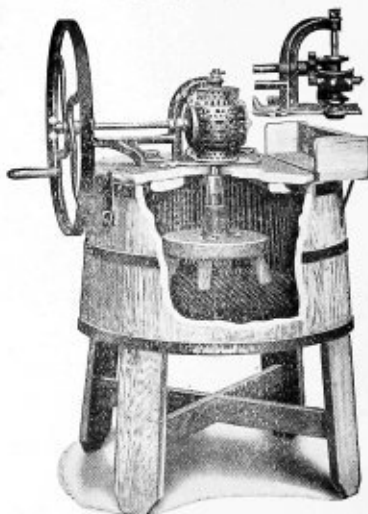

Rex.—Large tub of Louisiana Red Cypress. Double thickness overlap lid. Dasher fitted with new device preventing clothes from catching and tearing. The castings, where extra strength is required are made malleable, insuring against breakage. High speed fly wheel and fast revolving dasher. Castings so balanced that by lifting with the lever the cover opens very easily. When open allows plenty of room to put in or take out clothes. Finely finished....Each \$ 13.00

IMPERIAL ROTARY

Imperial Rotary.—Flaring bottom, best grade tub. Stave leg. High speed and easy to turn. Most improved gearing, reducing friction to a minimum. Roller bearings, making it when loaded practically noiseless. Dasher post of cast iron, heavily galvanized. Dasher of hardwood. New overlapping lid. Equipped with detachable collar for inside dasher which positively prevents the clothes from becoming torn. Will take large size wringer. Finely finished throughout, all castings aluminum bronzed Each \$ 10.50

BANNER ROTARY

Banner Rotary.—High grade Louisiana Red Cypress tub, natural finish and varnished. Stave leg. Dasher block of Cypress—will not warp or split. Telescope dasher post forces the dasher into the clothes. Gearing fitted with roller bearings and all iron parts coming in contact with water galvanized to prevent rust. Covered gears eliminate danger of catching the fingers in the mechanism. Neatly finished throughout. Will take large size wringer.....Each \$ 11.00

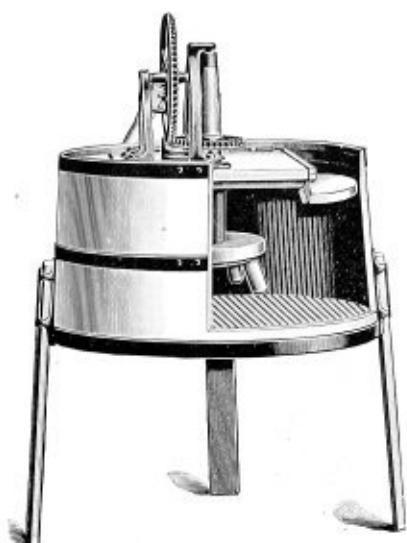

STERLING BRAND FOR QUALITY STANDS

WASHING MACHINES

PAN AMERICAN

ORION

Pan American.—Flaring bottom tub made from choice selected stock. Stave leg. Corrugated sides and bottom and fitted with three heavy iron hoops. Strong and substantially made gearing, lever type. The castings are aluminum bronzed and the wheel gold bronzed. The post and dasher are made from well seasoned and selected stock which will not warp or crack. One of the original ideas in washing machine construction embodying many of the modern features as regards strength and durability. Ea. \$ 7.00

Orion.—Flaring bottom tub with full corrugated sides and bottom. Made full size and with plenty of room for wringer. Fitted with three legs to be bolted on and with three heavy iron hoops. Furnished with new improved gearing attached to patent panel, doing away with the necessity of setting up or adjusting any of the castings. The castings are substantially made and of sufficient weight to withstand wear. The washer throughout is well made and nicely finished Each \$ 6.50

WESTERN

BOSS

Western. High grade selected stock, no danger of warping. Corrugated sides. Well seasoned dasher and post. Lever pattern. The castings are all heavy and smoothly finished. The gearing is finished in aluminum bronze and the wheel gold bronzed. Fitted with extension bench and capable of holding large wringer.

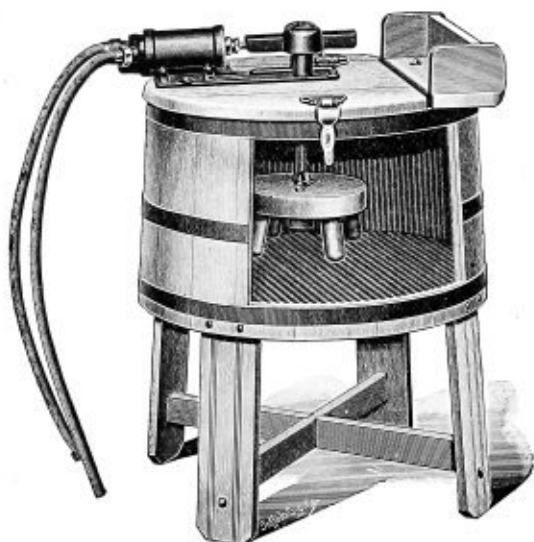

No. 2W.—Family size Each \$ 6.50
No. 3W.—Hotel or large family size..... " 7.00

Boss. Louisiana Red Cypress, natural finish. Iron parts exposed to water galvanized to prevent rust. Clothes are placed between oscillating rub-boards. Will not tear the finest fabrics—laces and silks, and yet will wash large and small garments with equal facility.

No. 1B.—Small family size..... Each \$ 10.70
No. 2B.—Medium family size..... " 12.20
No. 5B.—Large family or hotel size..... " 13.60

"STERLING BRAND FOR QUALITY STANDS"

MOTOR WASHING MACHINES

STERLING MOTOR

Sterling Motor. Large tub of Louisiana Red Cypress—the most durable wood for washing machines. Equipped with Sterling safety dasher—no tearing of clothes. Will wash the finest as well as the coarsest fabrics without injury. The motor is made of a solid brass casting and is rust-proof. Every part is carefully machined and tested. But one valve is used in the construction of the Sterling motor. The piston is made of a double hydraulic leather cup. The gear rack and gear are fully protected by shield or cover. Guaranteed to operate successfully if the water pressure is 20 pounds or over. This feature commends this type to all users in localities where the water pressure is low—yet at the same time it will work admirably on higher pressures. Regulate feed to produce 60 strokes per minute and the outfit will give you complete satisfaction.

Sterling Each \$ 20.00

MAGIC MOTOR

Magic Motor. Large flaring bottom tub of Louisiana Red Cypress. Stave leg. Improved dasher. The motor is substantially made of brass which prevents rust and is perfectly machined to provide against wear. It has no small parts to get out of order—in fact it is simply constructed throughout. Requires but a very small quantity of water to make the machine give the greatest efficiency. Will give satisfaction where the water pressure is 35 pounds or greater—under no circumstances use this machine where the pressure is less than 30 pounds. Regulate the faucet so as to give the motor 60 strokes per minute and the most satisfactory results will be obtained.

Magic Each \$ 22.00

IRWIN MOTOR

Irwin Springless Motor. Full sized flaring tub, stave leg and of high grade material. Improved internal construction—which does not catch or tear the clothes. The motor is of new design entirely of brass. No springs to get out of order and easily "packed" to prevent water leakage (loss of power). The wear from the load is taken up in the solid double bearings of the dasher shaft and does not affect the motor proper. Will work satisfactorily on a water pressure of 30 pounds or more. The feed should be regulated to give 60 strokes per minute to the motor and when this is done satisfactory results follow.

Irwin Each \$ 22.00

POINTS TO REMEMBER IN OPERATING WATER MOTOR MACHINES.

Be sure your pressure is sufficient to operate motors as above specified.

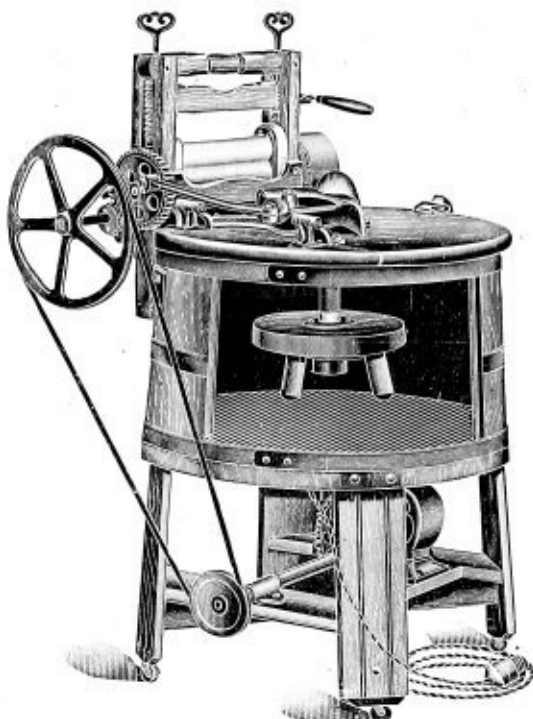

Regulate the feed (at the faucet) so as to give 60 strokes per minute to the motor. This means 60 revolutions of the dasher and the machine will give better results than if running at a higher rate of speed. Further the wear on the motor will be greatly reduced.

Remember that there is a limit to the quantity of clothes that can be washed at one time. Best results are obtained by not over crowding.

Treat the motor fairly and its work will please you.

WASHING MACHINES ELECTRIC MOTOR

ELECTRIC MOTOR.

ALTERNATING OR DIRECT

CURRENT.

SIMPLE IN OPERATION.

LEVER CONTROLLED.

SPEED REDUCING

GEAR MECHANISM.

GUARANTEED WRINGER.

ENCLOSED COGS.

REVERSIBLE.

LOUISIANA CYPRESS TUB.

LARGE SIZE.

OVERLAPPING LID.

SECURELY BOLTED

AND BRACED.

Motor. The best that can be made and with ordinary care will last for years. Rawhide pinion provides better insulation from iron work of washer and makes a positive, practically noiseless transmission of power. Provided with speed reducing gearing mechanism for reducing the speed as applied to the power shaft. With cord and plug for socket.

Gearing Mechanism. Attached to the hardwood wringer frame—more desirable than attaching to cover or body.

Tub. Louisiana Red Cypress. $\frac{3}{8}$ -inch thick. With interior, both sides and bottom, fully corrugated. 3 extra heavy steel hoops. Capacity about 22 gallons—inside dimensions being 23 inches at bottom, 22 inches at top and 11 inches deep. Heavy 2-ply overlapping lid, $1\frac{1}{4}$ inches thick—prevents twisting and warping. Finished in natural.

Wringer. Guaranteed 5 years. Rolls $10 \times 1\frac{3}{4}$ inches. Cogwheel shields protect the fingers. Reversible—works forwards or backwards by turning the lever. If clothes become caught or wound around the rolls, a simple movement of the lever immediately stops the wringer and causes it to reverse.

Operation. Power for both washer and wringer controlled by 2 levers placed together on the side of the machine from which the cover opens. Thus the operator may stand on the side opposite from the hinged edge of the cover and have access to the interior and to the wringer without danger of coming in contact with driving belt or gearing. Simple movement of levers to right or left starts or stops either washer or wringer.

Voltage and Current. Ascertain from your power company first the voltage—second the current—whether alternating or direct. If alternating advise number of cycles and phase. **Don't forget this.**

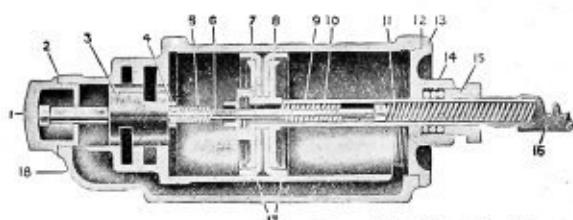

No. 50.—Blackstone electric machine complete with wringer..... Each \$ 50.00

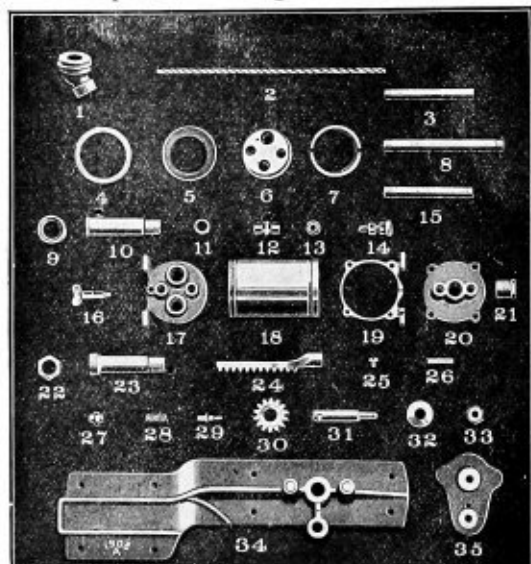

Mission.—High grade tub. All inside castings galvanized, doing away with the possibility of rust getting on the clothes. Tub swings in one direction on hardened steel ball bearings and the inside rubber, or dasher, turns in the opposite, thereby cleansing the clothes in the shortest possible time. Inside dasher, or rubber, perforated. Supplied with two powerful steel springs placed underneath the tub, which perform most of the work, just a little help being required by the operator at each swing. With folding hardwood bench braced with steel braces, furnishing a convenient stand for basket or rinsing tub.....Each \$ 13.00

The ball bearing feature permits the above wringers to be turned with half the labor necessary for the regular bearings. Having outside openings all moisture and water drain out.

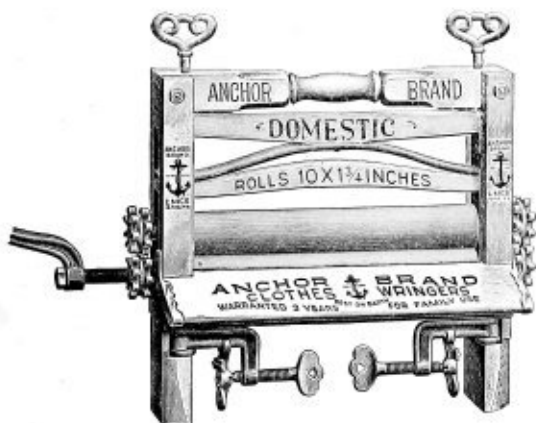

The cog shields on numbers 790, 791, 770, and 771 are inside of the frame and the bearings are unobstructed so that they can be easily oiled or cleaned. Account of the wider frame a greater spring capacity is given which permits heavy articles to be wrung with less strain on the roll than on the exposed gear machines.

The hold fast tub clamp fastens the wringer securely to either galvanized, wooden or fibre tubs.

STEP LADDERS

STERLING

Sterling. Made of wide and heavy material. Truss rod under each step—a block being inserted under the step and above the rod. This prevents the steps from loosening and the sides from spreading. A strictly high grade ladder. When the nuts are turned up on the rods, it is as one piece. Both leg and step sections are thoroughly well braced. Double flanged steel hinge brackets riveted to tops and sides. Angle iron folding lock brace. With pail shelf.

Showing Sterling Features.

STRAIGHT

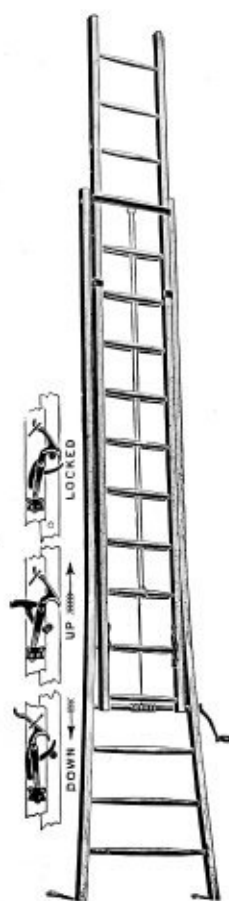

Sterling Straight single ladders. Standard construction. 14½ inches wide at the top; 20 to 36 inches wide at the bottom. The sides are of Southern pine 2¾ inches wide, 1¾ in. thick, and bored to save all the strength of the timber. The rungs are regularly made of beech, 1½ inches full in diameter and soaked in hot oil to preserve and strengthen. Blind tenons are used to save the strength of the sides and to preserve the ends of the rungs from the weather. Natural color or stained yellow.

No. 12L.—12 feet	Each \$ 3.00
No. 14L.—14 feet	" 3.50
No. 16L.—16 feet	" 4.00
No. 18L.—18 feet	" 6.00
No. 20L.—20 feet	" 7.00

Sterling Extension Ladders. Sides of Southern pine 2¾ x 1½ inches. Hardwood rungs, soaked in oil. Provided with double roller top irons—the upper section of the ladder is raised and lowered by rope and pulley with windlass. Self-locking hook. Instead of being bolted or screwed to the sides one of the rungs passes through it—cannot become unfastened and lost. Finished in natural wood or stained yellow.

	Each
No. 28.—28 ft. 2 sections, each 14 ft., extends to 25 ft.	\$ 10.00

REGINA PNEUMATIC CLEANERS

ELECTRIC MODEL B

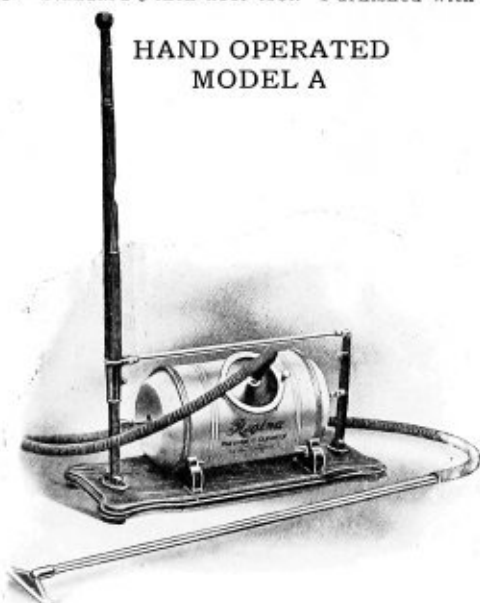

Regina Model B. With electric motor. Contains two separate diaphragms or pumps which are operated by a quiet easy running powerful electric motor. These work alternately, each pumping air on the upward stroke, the result being a continuous suction of great power. Eccentrics operating pumps run in ball bearings, reducing friction.

The dust bag is large to overcome the necessity of frequent emptying, is easily removed, and being placed beneath the pumps prevents dust or dirt getting to the mechanism. Extremely simple in construction and all parts interchangeable. Handsomely finished throughout. All component parts strong and durable. Weight 47 pounds and mounted on casters. Guaranteed to do perfect work. In ordering specify the current (alternating or direct) the voltage and cycles.

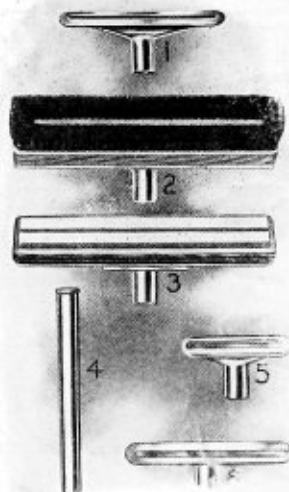

Regina Model B.—With attachment B1 for carpet cleaning. Each \$ 110.00
Regina Model B.—Complete with all attachments. " 125.00

HAND OPERATED
MODEL A

ATTACHMENTS FOR MODEL A

Regina Model A. Hand operated. Large duplex pumps creating a strong suction by both forward and backward strokes. Easy to handle—a child can operate it. Removes every particle of dust and dirt not only from the surface but from the body of the fabric as well. Occupies but little space, measuring only 26 inches in length, 12 in. in width and 13 inches in height, not including the handle. Weight 25 pounds. Dirt easily removed—no troublesome bolts or screws. Handsomely designed, beautifully finished and fully guaranteed.

IMPROVED STERLING SEWING MACHINES

No. 10.—Oak case, 5 drawer semi-drop cabinet. 18 inch inlaid tape measure on front of table. Sewing head raised to position with one movement of the arm and is locked in place by simple and effective device. Strong and well braced stand. All bearing points hung on hardened steel cones. Arm sufficiently high to give ample room for handling the class of material utilized in family sewing. Features of importance include the following—positive double width, four motion, steel forged feed; improved stitch regulator; tension release, automatic bobbin winder; perfected take-up; self threading shuttle and self-setting needle. Set of attachments for ruffling, tucking, binding, etc, with needles, bobbins, tools and book of directions with each machine. A good machine at a low price.....Each \$ 22.50

No. 20.—Oak case, 4 drawer cabinet. Combination chain and lever lifting device automatically raises head to position with one motion of the arm. 18 inch tape measure inlaid in table. Ball bearing stand—the bearings operating in hardened steel cones. Automatic belt replacer. Sewing head has full sized arm and makes the double lock stitch—a stitch that is always smooth, even and perfect. Features include—spring tension with convenient release; improved take-up; positive double width four motion feed; automatic winder and self-threading shuttle; self-setting needle; gear releasing device and improved stitch regulator. Set of attachments in velvet lined box for ruffling, tucking, braiding, hemming, etc, together with tools and a book of directions with each machine. A popular medium priced machine Each \$ 27.00

"STERLING BRAND FOR QUALITY STANDS"

IMPROVED STERLING SEWING MACHINES

No. 30.—Case of finest quarter sawed mirror finished oak. 4 side and 1 center drawers. Inlaid tape measure in table. Steel chain and lever automatic lifting device. Stand has ball bearings in wheel and pitman. Operates noiselessly. Ingenious device automatically re-belts both wheels when head is raised to position for use. Extra high arm—the actual clear space underneath being $8\frac{3}{4} \times 5\frac{1}{2}$ inches. This allows room for handling the most heavy and bulky materials. Features include disc tension; positive take-up; gear releasing device; positive feed; steel capped needle bar; self-threading shuttle; stitch regulator, etc. Set of attachments packed in velvet lined metal box include ruffler, tucker, binder, braider, feller, quilter, shirring slide together with tools, bobbins, etc. and a book of instructions. A high grade machine Each \$ 31.50

No. 40.—New Model case of quarter sawed oak. 6 run length side drawers. Drop front piece. Automatic lifting device. Ball bearing stand—a marvel of simplicity, noiselessness and speed. Non-binding steel Pitman. Automatic belt replacer—eliminates all the fussing and straining incident to belting the average machine. The head forms the reliable and time tested double lock stitch. Extremely high arm and equipped with improvements and labor saving devices as follows—disc tension with automatic release; double width positive four motion feed; steel capped needle bar and presser bar. Improved stitch regulator; automatic winders, gear releasing devices, etc. Set of attachments in velvet lined metal box include tucker, ruffler, braider, binder, hemmers, feller, quilter, shirring slide, etc., as well as needles, tools and book of instructions. A machine the equal of any ever made—no matter what the price Each \$ 36.00

FARM BOILERS

PROFIT

PROFIT FARM BOILER

Kettle is cast very smooth and has an extra thick bottom. Constructed of the best cast iron. Is simply a furnace, with a caldron which dumps as shown in illustration below. This enables the operator to empty the boiler in a moment. Serves also as a manufacturers' furnace and kettle. Very economical of fuel. The kettle, when dumped, exposes all the flues—a feature peculiar to this boiler, and one that aids in keeping the flues free from dirt.

SOLON

SOLON STEEL BOILER.

Furnace and caldron designed to meet the wants of farmers, butchers, contractors, etc. Supplied with regular caldrons, well-finished and durable. The jacket or shell is made from heavy sheet steel, with edges banded, and has no bottom, as the boiler is intended to be used on the earth or to be filled with brick or clay up to the bottom of the feed door. Provided with double doors, so that it can be conveniently used as a coal burner when supplied with coal fixtures.

No. 400.—Size $14 \times 19\frac{1}{4} \times 10$ inches.	Blued steel. Hotel or restaurant size	" 36.00

No. 400, one-sixth dozen; others one-fourth dozen in a carton.

Savory roasters are seamless and perfectly smooth inside. Self-basting and easy to keep clean. Nos. 200 and 400 are made with close fitting separate jackets, others pan and jacket drawn from one piece.

CORONA

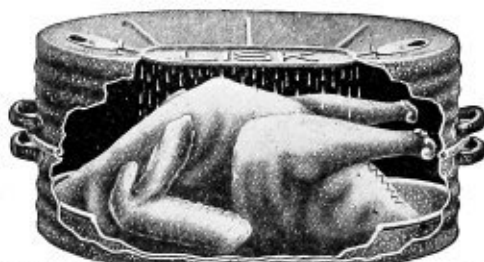

Corona. Oval pattern. 18 inches long, 11 inches wide and $7\frac{1}{2}$ inches deep. Absolutely seamless and easily cleaned. Outer fold of pan distributes the heat uniformly. So constructed that the bottom does not touch the oven. Even on the top of the stove nothing burns in it. As good for a pot roast as an oven roast, as all the steam drops back.

No. 300.—Blue glazed steel Per dozen \$ 20.50
One-fourth dozen in a carton.

OVAL OAK

Oval oak. Seamless. Size $10\frac{1}{2} \times 16\frac{3}{4} \times 7\frac{1}{2}$ inches. Around the edge of pan is space for gravy to collect. Roast is held above the gravy on a raised panel. No soaking or burning. Makes the roast tender and juicy.
No. 87.—Blued steel Per dozen \$ 12.00
One-half dozen in a crate.

Lisk Imperial. Seamless. Dark gray enameled inside and out. Self-basting with extra inside pan.

STERLING FOOD CHOPPERS

Sterling food choppers. Nicely tinned. All parts closely fitted, accurately gauged and interchangeable. Cutter plates of steel, reversible and self-sharpening. Strong and rigid clamp. Large hopper. Has the greatest capacity for its size, turns with the least exertion and will not choke or clog with the toughest kind of meat.

The Sterling chopper will cut any kind of meat, raw or cooked; all kinds of vegetables, coarse or fine. Leaves no uncut food in the machine and no drip on the floor. It chops rapidly and easily without mashing, squeezing or tearing.

Sterling choppers numbers 10, 20 and 30 are furnished with 4 cutter plates (as illustrated above)—the No. 4 plate being reversible—thus in reality furnishing plates for 5 different classes of work. No. 40 is furnished with 3 round hole plates—1 each with $\frac{1}{8}$, $\frac{1}{4}$ and $\frac{3}{8}$ inch holes.

Attached to each chopper is a tag giving directions for putting together, cleaning and using the various plates; also a receipt book giving some valuable hints to the user. All sizes except No. 40 are packed one each in substantial heavy cardboard boxes very attractively labeled—a feature commending this line to the dealer as well as the user.

No. 10.—Small family size. Will cut 2 pounds of meat per minute Per dozen \$ 12.00

STERLING OIL

STERLING OIL.
 The perfect household lubricant. Oils all parts of the sewing machine—bearings, treadle, shuttle, hand wheel, etc. Just the thing to use on the clock—reaches the most minute joints and bearings. Lubricates perfectly the talking machine. Makes the lawn mower run noiselessly. Reaches every action point of the gun or revolver. In fact, it has been prepared for use on the finest and most delicate machinery and will be found to fill the requirements much more satisfactorily than any other lubricating agent.

STERLING OIL.
 Made only from the highest grade materials, properly blended to produce a superior lubricating oil. Will serve as a preventive of rust as well as brightening and renewing the finish of rusted articles. Will not gum or become hard and never becomes rancid. Wherever light machinery is in use—on the farm, in the factory, about the automobile, motor boat, etc., Sterling Oil will always give satisfaction. Put up in attractively labeled combination spout and screw cap cans containing a full half pint.

1148	2,500x $\frac{1}{2}$	26x34	89.00

FULL CAPACITY SINGLE BEAM

Full capacity single beam. Does away with loose weights and insures rapid and accurate weighing. Handsomely finished—brass parts nickel plated. Agate bearings in beam support. Graduated to $\frac{1}{2}$ lb. marks only for all capacities and adapted to scales from 600 to 3000 lbs. capacity.

No. 12.—Full capacity beam. Extra list for any scale on this page fitted with this beam \$ 12.00

OBLONG WITH VIBRATORY AXLE

Adapted especially for weighing dry hides, light bar iron, or any articles which are likely to hang over the side of the scale. As it is raised on high wheels, any such articles will not touch the floor or the wheels. Beam weighs 100x $\frac{1}{2}$ lbs. Index counterpoise. Vibratory axles.

Nos.	Capacity, Lbs.	Platform, Inches.	Height of Platform, Inches.	Each.
1192	1,000x $\frac{1}{2}$	18x27	15	\$ 57.00

No. 7.—Sterling. Body 42 in. long, 27 in. wide and 10 in. deep, bound with band steel and angle iron running to the handle. With drop end board. Wheels 30 in. in diameter, containing 28 spokes of $\frac{7}{16}$ -inch wire, and having half oval steel rims, $1\frac{3}{8} \times \frac{7}{8}$ inch. With heavy 18-inch front wheel. Axle $\frac{7}{8}$ -inch in diameter. With three leaf springs. Heavy steel standard. Extra heavy throughout and made to withstand rough usage. Neatly finished. Shipping weight 112 pounds....Each \$ 15.00

One in a crate.

Special attention is called to the wheels on all above carts. One piece of wire forms 2 spokes. This, together with the manner in which the wire is held between the hub flanges, gives the strongest possible construction. Heavy hub flanges, spokes and rims make a wheel for push cart use that is par excellence and adds long life to the cart.

ENTERPRISE BEEF SHAVER

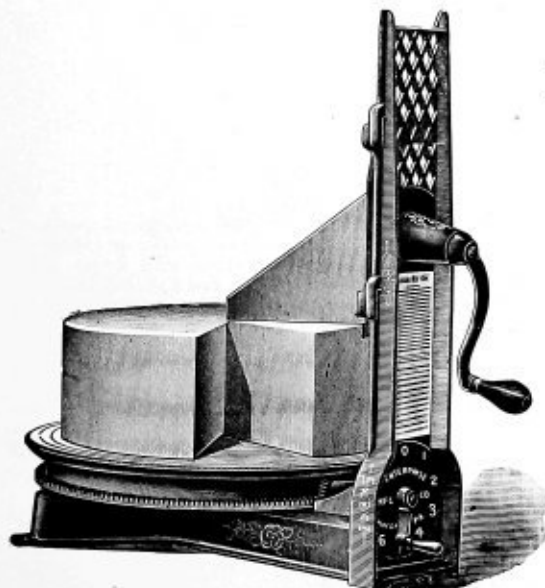

No. 23.—Enterprise Smoked Beef Shaver. With self-sharpening device. Japanned finish. The knife is suspended pendulum like and each stroke cuts a slice cleanly and quickly, requiring but a few moments to shave down a pound of beef. The automatic feed can be regulated to cut from shavings as thin as tissue to slices one-eighth of an inch thick, by adjusting a small bolt holding connecting rod

Each \$ 8.00

One in a crate.

ENTERPRISE CHEESE KNIFE

Enterprise Self-Gauging Cheese Knife. Lift of knife 10 inches. Diameter of table 19 inches. This machine obviates the hard labor of cutting with a hand knife. Is not designed to cut mathematically correct as to weight, but if a pound or more is wanted, the customer can be accommodated with one piece which will be within a fraction of the desired weight. The small crank measures the required amount and by turning the large crank the knife descends, cutting evenly, cleanly and easily. Beautifully finished in colors with gilt ornamentation. The blade is tinned.

"STERLING BRAND FOR QUALITY STANDS"

ROLLING STORE LADDERS

Myers' cushion tire store ladder. Ladder constructed of best clear Georgia pine, nicely finished, filled and varnished. Open panel sides, 5 inches wide and with 5-inch step supported with malleable dowel Tee. Width of ladder 12 inches. The trolley is self-adjusting and made of malleable iron fitted with turned steel bearings and 3-inch anti-rattler wheels, turned and bored on lathe and fitted with special rubber tires. The floor travelers are 5 inches in diameter, composed of metal sides with rubber cushion tires clamped in such a position as to be impossible to get off or come loose. These wheels are placed on a steel axle which revolves with one of the wheels, the other running loose. In this manner the ladder will adjust itself to the floor. The track is double angle steel rail, very neat and strong and suspended from ceiling by means of lag screws, either jointed or rigid or by flanged plates and wood screws. This places the track close to the ceiling and makes the job of leveling on an uneven ceiling a very easy one.

The length of track or tracks, number of ladders and height of ceiling, all the information required when sending in the order.

No. 775.—Ladder and trolley complete..... Each \$ 20.00
No. 30.—Track complete with hangers..... Per foot .30

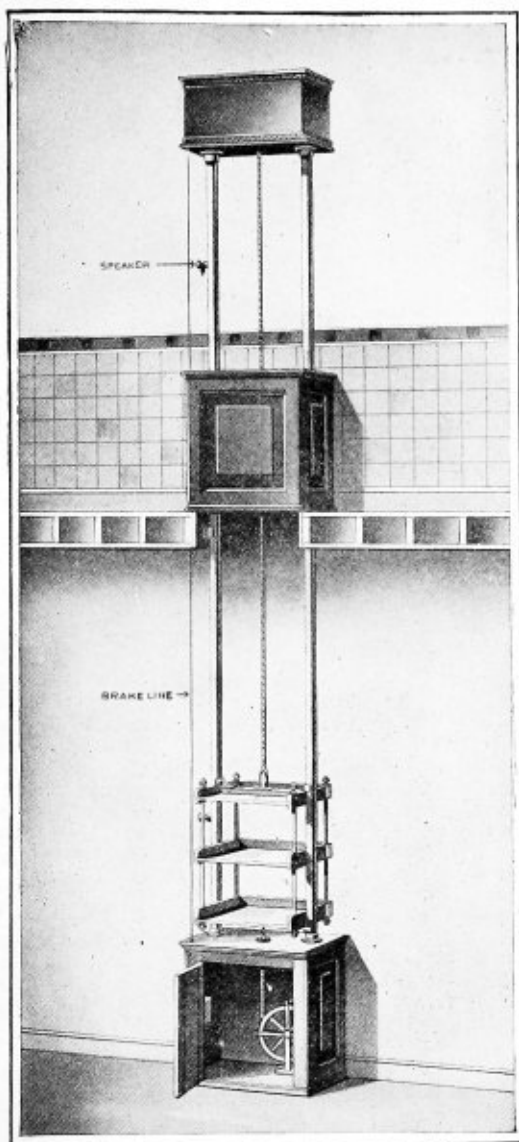

DIRECTIONS FOR FITTING STORE LADDER.

To find the required length of store ladder for any room, subtract from the height of the room 11 inches (this being the amount of space required by hangers, track and trolley); multiply the remainder by one and one-tenth; the result will be the length of the ladder from hole at top to bottom of ladder.

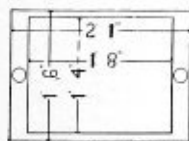

Not carried in stock; shipped from factory direct.

"STERLING BRAND FOR QUALITY STANDS"

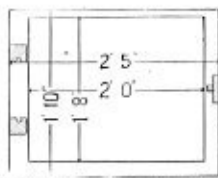

DUMB WAITERS

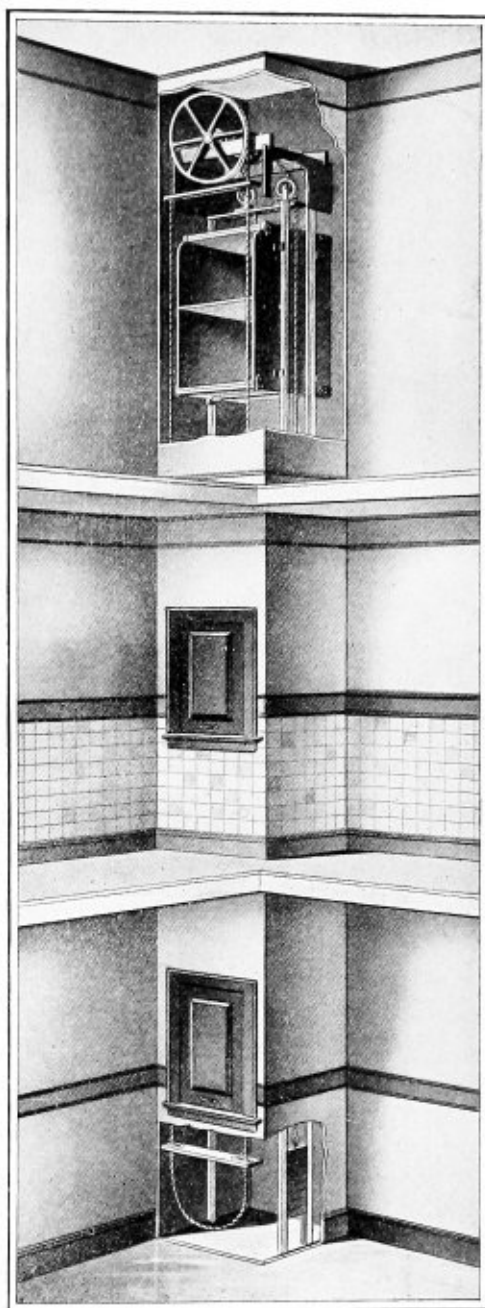

No. 2

Shaftway Plans for No. 2

Shaftway Plans for No. 3

No. 3

- No. 2.—Little Beauty dumb waiter. Capacity 25 pounds. Car of highly finished hardwood trays with polished brass fittings. Runs on polished brass tubes, one of which contains the counterweight balancing the car while the other is used as a speaking tube. Operating gear consists of hemp rope passing over iron wheels, one at top, one at bottom. Controlled by self holding brake applied or released by one line from any floor. Designed for use in restaurants, hotels, cafes or offices. Includes box at top in which the wheel and brake are set ready for use (but not the closet at the bottom nor the enclosure around the opening of the upper floor) for a run not exceeding 10 feet and a car not over 20x16 inches. This size car with two compartments and finished in golden oak will be shipped where no other kind is specified Each \$ 60.00
- No. 3.—Energy dumb-waiter. Capacity 100 pounds. Automatic lock, anti-friction roller bearings, wire hoist rope, adjustable guide shoes, exposed weights. Car of well seasoned hardwood, neat in design. Does not require a weight box, the weight being placed inside the well and taking up no extra room. Designed for dining room service in the residence. Machine, ash car (any size up to 24x20 in.), sectional counterweight, rope eyelets, hand rope, hoist rope, car runs, weight runs, for 1 story travel Each \$ 34.00
- If conditions require any different style of lift or any higher lift, write us for special booklet.

Not carried in stock; shipped from factory direct.

"STERLING BRAND FOR QUALITY STANDS"

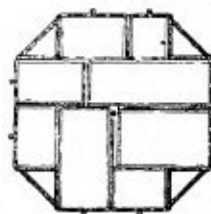

BROWN'S PERFECTION BOLT CASES

No. 130

No. 40

Plan.

Brown's Perfection Bolt Cases. As will be seen by plan, the drawers are oblong, not triangular, completely filling the case and leaving no vacant space in the center. This makes the case hold more bolts than the average case. Drawers of various sizes to suit different size bolts. Revolving feature of simple construction always works easily. Made of oak, hard oil finish.

Nos.	130	112	40
Each	\$60.00	48.00	24.00

Heller's galvanized steel shelf boxes. With ¼ in. wood fronts and backs. The sides and bottom are pressed of one piece of cold rolled galvanized steel. The steel is imbedded in the wooden ends by patent process and secured by brads driven from inside through both metal and wood—no rough edges on the outside. Top edges double turned, strengthens and prevents buckling. Depression on side near front enameled upon which cost and selling price of contents can be marked, erased or changed without injuring the enamel. With an assortment of boxes is furnished a liberal supply of both wood and steel divisions for boxes 3 in. deep, such as is required for general hardware. These boxes can also be furnished, 10, 14, 15, 16, or 18 in. long—in fact any size desired, and with any kind of wood fronts, either finished or unfinished. Prices will be quoted upon receipt of specifications giving this information and quantity.

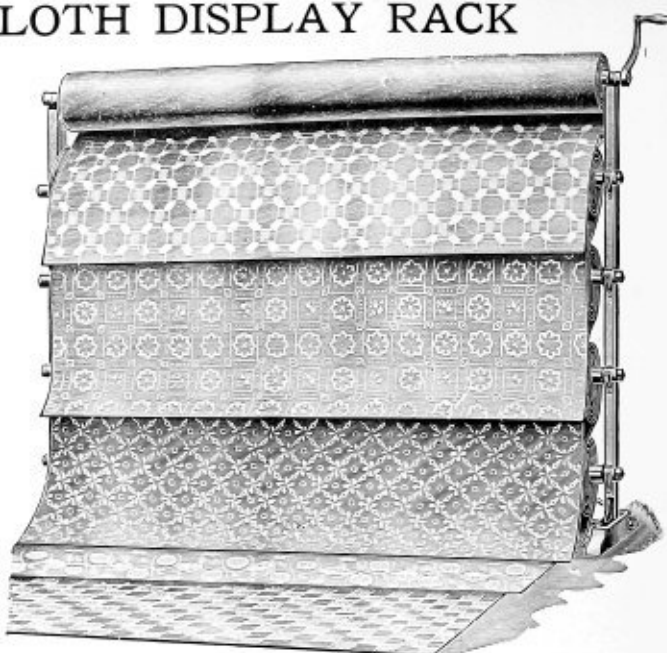

Not carried in stock; shipped from factory direct.

Crown Kraft Paper

This Sample is 24x36 — 27 Lbs. to 480 Sheets.

THIS PAPER is manufactured of absolutely pure Cellulose of a special quality and contains no chemical pulp and no filling materials whatever, such as china clay, pearl hardening, colors or others. On account of its remarkable strength, for weight, it affords a great saving over ordinary wrapping papers which generally require over 50 per cent. additional weight, 35-lb. Kraft having greater strength and serviceability than the 50-lb. paper customarily used.

The manufacturers of "Crown Kraft" guarantee it absolutely free from acids, chlorides, and other injurious chemicals, making it a valuable wrapping for iron, steel and plated goods, acting as a superior protection against moisture and rust.

It is the only proper substitute for Rope Papers which, owing to the permanent scarcity of old rope, now commands prohibitive prices.

We are to-day selling large quantities of "Crown Kraft" as a substitute for Rope Papers costing nearly double.

This paper is well adapted for printing or writing, it has enormous strength and toughness and is the most perfect wrapping paper known. We recommend a trial not only for wrapping purposes but for box strays, silverware, insulating, sample and catalogue envelopes; in fact, for every purpose requiring lightness, strength and economy.

Body of safe made of one continuous sheet of heavy wrought steel, forming top, bottom and two sides, securely riveted at the bottom and to two heavy wrought steel front and back angle frames. Doors covered with solid plates of wrought steel and are closed by heavy round bolts which extend from both sides of the door into the jamb. Door frames have from 3 to 7 flanges or offsets. The fit of the doors is as close as is possible without binding and gives the least open crack for the admission of heat or water. Cabinet has sheet steel covering so that the fire-proof filling is contained between steel plates. All bolt parts, hinge tips and safe handle heavily nickel-plated. Cabinet made of yellow poplar, imitation cherry finish. Drawer fronts of solid oak and door jambs and door frame finished in silver or aluminum.

Not carried in stock. Shipped from factory direct.

- No. 26. —Height $46\frac{1}{2}$ inches, width $21\frac{1}{2}$ inches, depth $14\frac{1}{2}$ inches. Double burners. Exclusive design with large fire box, Mica encased Each 28.50
- No. 28.—Height 48 inches, width 24 inches, depth $14\frac{1}{2}$ inches. Handsome in appearance and finish. Double burners. Large fire box, Mica encased Each 31.00
- No. 30. —Height $49\frac{1}{2}$ inches, width 27 inches, depth $14\frac{1}{2}$ inches. Extra large fire box, Mica encased. Double burners, adjustable valves. Beautiful in appearance and finish Each 34.00

Nos. 26, 28 and 30 fitted with adjustable flue ring, adjustable valves and for $\frac{1}{2}$ inch pipe connection.

PALACE POINTS AND SECTIONAL VIEW

Illustrations show the interior of the Palace heater. The capacious fire box is well filled with artificial fuel (indestructible fire clay) which is retained in a cast iron grate and directly beneath which the burners are placed. The fuel becomes incandescent from the heat and imparts a ruddy glow giving a sense of warmth and cheerfulness, characteristic of the hard coal fire. The products of combustion or fumes take the course as shown by the arrows (black) going nearly to the top of the heater where they escape into the hot air chamber. The opening for its escape from this chamber is nearly at the bottom of the opposite side, thereby compelling a thorough circulation before it reaches the flue. The air is drawn from the room into the chamber at bottom of stove and follows the course shown by the arrows (white), passing over the fire-box into the tubes in the hot air chamber. In this course it comes into contact with a large heating surface and practically every heat unit is utilized.

Absolutely free from odor when properly connected to flue. All joints perfectly tight and sealed with asbestos cement.

DRUM GAS HEATING STOVES

ORION

No. 0

No. 10

No. 100

No. 150

- No. 0.—Orion. Plain finish. Height 18 in. Drum 6 in. 6 arm star burner. Tubing connection Each \$ 1.60
 No. 10.—Orion. Plain finish. Height 18 in. Drum 6 in. 6 arm star brass burner. Hose cock " 1.80
 No. 100.—Orion. Aluminum finish. Height 19 in. Drum 7 in. 6 arm star brass burner. Hose cock " 2.50
 No. 150.—Orion. Aluminum finish. Height 23 in. Drum 7 in. 6 arm star brass burner. Hose cock " 3.00

The Orion drum heating stove is made with cast top and base and polished steel drum. Fitted with star burners made of seamless brass tubes screwed in a solid cast head. The burner is drilled for illuminating, 5 jets in each arm and is fitted for either gas.

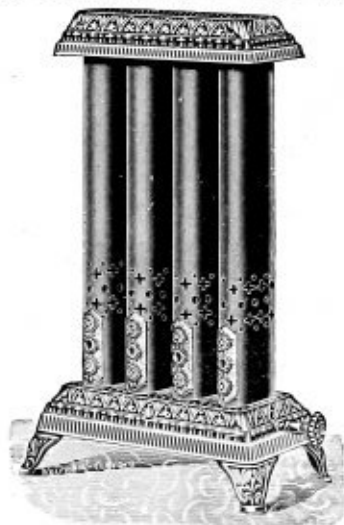

PITTSBURG BATH ROOM HEATER

Pittsburg bathroom heater. Cast base frame and top. Sheet steel jacket or body. Height 18 inches, width 13 inches, depth 5 inches. A convenient little heater built on the order of a radiator, and which on account of its shape will be found very convenient for use in the bathroom or any small hall rooms. An efficient heater—neat in appearance and built for service.

- No. 650.—Plain finish Each \$ 6.00
 No. 651.—Nickel finish " 7.00

PURITAN DOWN DRAFT GAS RADIATORS

- No. 16.—Puritan. Bronzed finish. 4 double tubes of large size. Height 32 inches. Length 18 inches. Width 9½ inches. Burns either natural or artificial gas. Consumes from 12 to 18 feet of gas per hour. Fitted with convenient lighting device Each \$ 9.00

- No. 18.—Puritan. Bronzed finish. 6 double tubes of large size. Height 32 inches. Length 25 inches. Width 9½ in. Burns either natural or artificial gas. Consumes from 18 to 25 feet of gas per hour. Fitted with convenient lighting device Each \$ 12.00

In the down draft radiators each tube has 6 jets, and, as tubes are very large, capacity is very great. Each tube has a small inside tube through which heat ascends and is then carried down and discharged through perforations of the outer tube.

Are fitted with Basket Grates and are made for hard or soft coal. If wanted with Duplex Grate add \$1.00 to above lists.

"STERLING BRAND FOR QUALITY STANDS"

GRAFTON STEEL RANGES

Nos. 716 to 920.

Nos. 716R to 920R.

Grafton Steel Ranges for Hard or Soft Coal or Wood.

With nickel-plated steel edge band; wood door; shaker door; ash pit door; clean out door; oven door frame, handle, catch and supports; oven door panel; name plate; corner strips.

The body is made of heavy planished steel of a refined quality. All parts that are exposed to the direct action of the fire are of double thickness, with an asbestos mill board between, all securely riveted together. The top frames are cut in four sections to prevent cracking and warping. They are bolted together and are made to receive panel sections, which are interchangeable. The ovens are made of 14 gauge wrought steel and are extra large and high. The flue box is made of cast iron, with corrugated back section, to prevent cracking. The construction of the oven damper permits the heating of the entire top of the range without the heat passing around the oven, and gives the user absolute control of the fire. The direct draft damper, operated from the top of the range, insures a quick fire. The fire box is of good capacity, the fixtures being interchangeable for all sizes. All collars made for 7-inch pipe.

WITH HIGH CLOSET AND CAST IRON BASE, RIGHT OR LEFT HAND.

No. 9150.—All cast. With water heater. Top burner equipment same as No. 5150	" 65.25

Sterling elevated oven gas ranges fill a long felt want in the kitchen. Designed to save labor and stooping on the part of the cook and at the same time to give greater capacity. Note that the elevated oven is very wide and that the height over all from floor to top of range is only a little over 5 feet. Built for service and neat and attractive in design. Adjusted for natural gas.

HOT PLATES

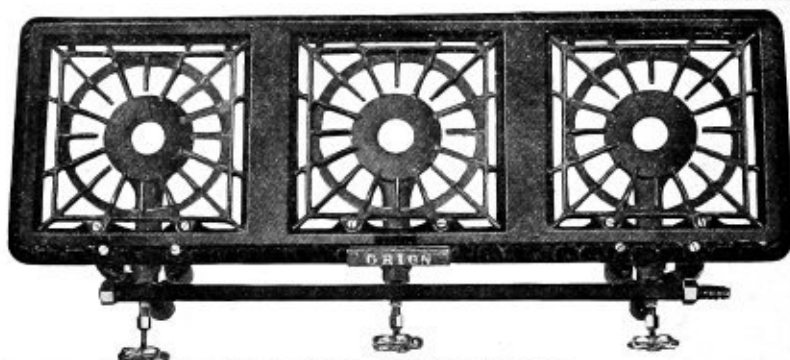

ORION

No. 501.—Orion. 1 burner. Size of top $10\frac{1}{2} \times 10\frac{1}{2}$ inches. Height $5\frac{1}{2}$ inches. Each \$ 1.80
Four in a crate.

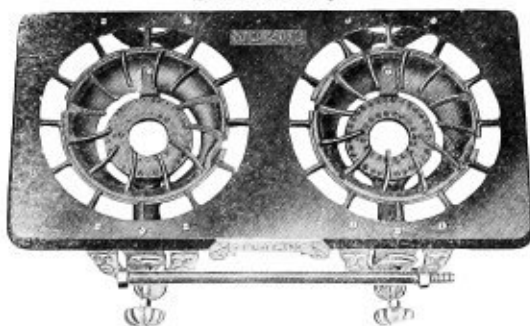

No. 502.—Orion. 2 burners. Size of top $10\frac{1}{2} \times 20$ in. Height $5\frac{1}{2}$ inches. Each \$ 2.70
Two in a crate.

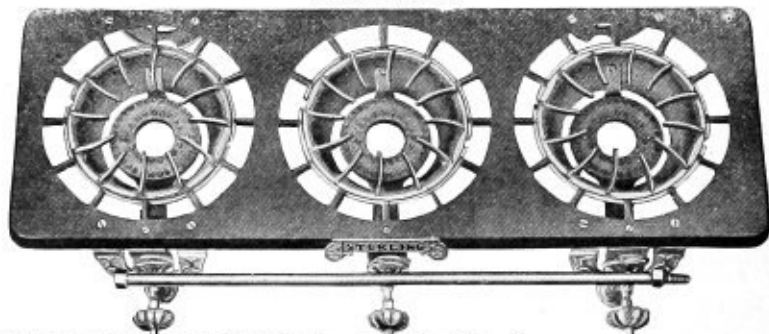

No. 503.—Orion. 3 burners. Size of top $10\frac{1}{2} \times 30$ inches. Height $5\frac{1}{2}$ inches. Each \$ 4.00
Two in a crate.

Orion hot plates. Round cast burners. Strong frames, of neat design and finished in black Japan. Fitted with needle valves and nickel-plated wheels. Full size and substantially made at a popular price.

STERLING

No. 202.—Sterling. 2 burners. Size of top 12×25 inches. Height $6\frac{1}{2}$ inches. Each \$ 5.00
One in a crate.

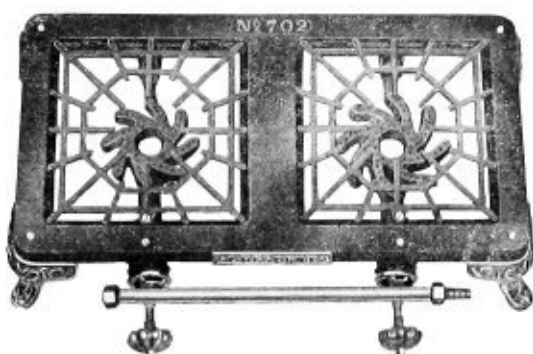

No. 203.—Sterling. 3 burners. Size of top 12×35 inches. Height $6\frac{1}{2}$ inches. Each \$ 6.50
One in a crate.

Sterling hot plates. Double ring drilled burners with center draft ring or wind shield. This creates a forced draft greatly increasing the heating power. Frames made extra heavy and with truss legs. This brings the feet closer together, allowing the plate to be set on a small table or range top. Finished in black and nickeled trimmed. With needle valves. Extra high grade throughout with exceptional heating qualities.

One in a crate.

No. 840.—Crescent. 4 burners. Size of top 22×22 inches. Height $6\frac{1}{2}$ inches Each \$ 8.00
One in a crate.

Crescent hot plates. 8 arm tangent burners, star-fish shape with drilled holes. Each plate has one Jumbo or extra large burner. The frames are substantially built and finished in black with nickel-plated legs. Supply pipe and valve wheels nickel-plated. Needle valves. A hot plate extremely strong, handsome and efficient at a moderate price.

STERLING BRAND FOR QUALITY STANDS

STERLING WATER HEATERS

Sterling water heater. Jacket of heavy polished steel or brass, asbestos lined. Single coil. Large heavy cast burner, one piece, including mixer. Copper coil, ground joint brass unions. Cast top and base, black Japanned finish. Fitted with nickel-plated cock for manufactured gas; needle valve for natural gas. The water is contained in a coil of copper tube, thin yet strong and durable, and the heat is instantly transmitted to the water. The coils are seamless drawn copper tubing and guaranteed for any city pressure. The requirements for hot water varying with practically each installation, the size of heater will have to be determined by the particular need of the case. Nos. 0, 1 and 1½ are usually used with 30 gallon boilers; No. 2 with 40 gallon; and No. 3 with 50 gallon.

When ordering be sure to specify whether for natural or manufactured gas.

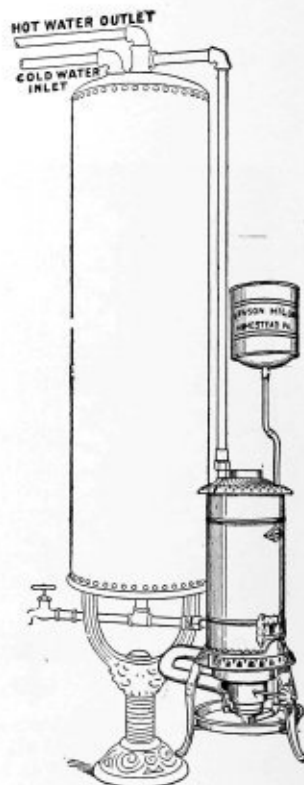

No. 0.	—Steel jacket.	Diameter 7½ inches.	Height 12½ inches.	¾-inch tube.	For natural gas only.	Each \$ 11.00

No. 2B.	—Brass jacket.	Diameter 7½ inches.	Height 20 inches.	¾-inch tube for manufactured gas; 1-inch tube for natural gas	Each 24.00
No. 3.	—Steel jacket.	Diameter 7½ inches.	Height 24 inches.	¾-inch tube for manufactured gas; 30 inches, 1-inch tube for natural gas	Each 30.00
No. 3B.	—Brass jacket.	Diameter 7½ inches.	Height 24 inches.	¾-inch tube for manufactured gas; 30 inches, 1-inch tube for natural gas	Each 35.00

GASOLINE WATER HEATERS

Gasoline water heater. Modern systems of water supply give running water to the bathroom or kitchen in the country home as satisfactorily as the waterworks do in the city house. In construction, except for the burner, this heater is identical with heaters 1, 2 and 3 above described. A coil of copper tube fills the iron jacket, and through it the water passes. The operation of the heater is extremely simple, only one valve on the burner to operate. Lighting the heater takes but a moment and thereafter no attention is required. The gasoline can is of a special safety type, there being an inner container which lifts out and may be removed from the house for filling. Guaranteed perfectly safe and within insurance restrictions.

It is customary to use the No. 1G heater with 30 gallon boilers; No. 2G with 40-gallon and No. 3G with 50 gallon. The cut to the right shows method of connecting heater to boiler.

No. 1G.	—Height to flue connection 24 inches.	Diameter 7½ inches.	Steel jacket	Each \$ 25.00
No. 2G.	—Height to the connection 29 inches.	Diameter 7½ inches.	Steel jacket	" 28.00

DRY BATTERIES

- Sterling.**—Extra special dry cell. Size $2\frac{1}{2} \times 6$ in. Voltage 1.50 to 1.53; amperage 16 to 20. Specially constructed and guaranteed to be the best battery on the market for any and all general purpose uses Each \$.40
- Orion.**—High grade dry cell. Size $2\frac{1}{2} \times 6$ in. Designed for use on door bells, telephones, fire alarms, medical batteries, etc. A battery at a popular price and possessing qualities that make it good value for the money Each .30
- No. 6.**—Rock Island dry cell. Size $2\frac{1}{2} \times 6$ in. Hand made and high grade. For general all around use. High grade material and workmanship throughout Each .40
- All above 125 in a barrel.
- No. 7.**—Rock Island dry cell. Size 3×7 in. Voltage 1.52 to 1.55; amperage 17 to 22. Specially constructed for ignition purposes where a larger size cell on account of its size or weight cannot be used Each .70
- 75 in a barrel.
- No. 8.**—Rock Island dry cell. Size $3\frac{1}{2} \times 8$ in. Voltage 1.53 to 1.56; amperage 19 to 24. Specially recommended for ignition work and wherever this size and weight can be used it will be found economical in the end. Tests have proven the life of a set of this size to be 3 or 4 times as long as the small size cell. Each 1.00
- 50 in a barrel.
- No. 6S.**—Sparker Ignition dry cell. Size $2\frac{1}{2} \times 6$ in. Voltage 1.51 to 1.53; amperage 17 to 23. Specially constructed for automobiles, motor boats and all gas and gasoline ignition purposes Each .50
- 125 in a barrel.
- No. 7S.**—Sparker Ignition dry cell. Size 3×7 inches. Voltage 1.53 to 1.56; amperage 18 to 24. For ignition purposes, the size to use if unable to utilize the 8 inch cell Each .80
- 75 in a barrel.
- No. 8S.**—Sparker Ignition dry cell. Size $3\frac{1}{2} \times 8$ in. Voltage 1.53 to 1.56; amperage 20 to 25. A large sized ignition cell possessing long life and lasting qualities Each 1.20
- 50 in a barrel.

Nos. 7S and 8S not carried in stock. Shipped from factory direct.

The dry cells above listed are strictly high grade in every sense. Only heavy gauge zinc and nine cylinder corrugated carbon used in the construction. Every cell is constructed entirely by hand and tested four times during process of manufacture.

The initial amperage has long been a misleading proposition—a great many people thinking that the higher a cell is in initial amperage the better it is. This is a very grave mistake, as every test made by competent authorities has proven that a set of batteries which run from 16 to 18 amperes will last from 10 to 12 per cent. longer than a set testing 27 amperes. As a matter of fact a set of batteries having 16 amperes will give satisfactory spark for ignition—27 amperes will do no better work and will have a very much shorter life.

The **Sterling** cell runs from 16 to 20 amperes—occasionally in a barrel a few may be found running a trifle lower and a few a trifle higher.

The **Sparker Ignition** cells are designed and constructed with a view of giving to the user of a gas or gasoline engine, the best battery for ignition purposes that skill and experience can produce.

BATTERY CONNECTORS

- No. 1.**—Quick action battery connectors. One piece flexible annealed copper perfectly and permanently insulated. Attaching ends ribbed to provide stiffness and cushion and furnished with a slotted hole. Length about 4 in. Per 100 \$ 2.00
- 250 in a box.

AMMETERS

- No. 0.**—Pocket ammeter. Diameter 2 in. Registers 0 to 30 amps. For testing current strength of batteries Each \$ 2.00

FLASH LIGHTS

Nos. 2616 and 2619.

No. 6909

- No. 2616.—Miner's Flash Light. Extra large lens and reflector. $2\frac{1}{2}$ volt Mazda A bulb. With new Tungsten battery. Vulcanized fibre case. Both intermittent and permanent connections. Size of case $1\frac{1}{2} \times 6\frac{1}{2}$ in. Guaranteed life of battery, 10 hours continuous or 20 hours intermittent. Each \$ 2.10
- No. 2619.—Miner's Flash Light. Extra large lens and reflector. $3\frac{1}{2}$ volt Mazda A bulb. With new Tungsten battery. Vulcanized fibre case. Both intermittent and permanent connection. Size of case $1\frac{1}{2} \times 8\frac{1}{2}$ in. Guaranteed life of battery, 10 hours continuous or 20 hours intermittent. Each 2.75
- This type spreads and intensifies the light in a manner that better adapts it for many purposes. The lens is of large diameter and the light is provided with a powerful reflector. Used by miners to advantage in underground passages and satisfactorily meets the requirements in camp life.
- No. 6909.—Vest or Coat Pocket Flash Light. Convenient size and shape for personal use. $3\frac{1}{2}$ volt Mazda A bulb. With new Tungsten battery. Vulcanized fibre case, $1 \times 2\frac{3}{4} \times 3\frac{1}{2}$ in. Guaranteed life of battery, 4 hours continuous or 8 hours intermittent. Each 1.70

Nos. 2606 and 2604

No. 6900

- No. 2606.—Tubular Flash Light. Straight lens. $3\frac{1}{2}$ volt Mazda A bulb. With new Tungsten battery. Leatherette covered case. Both intermittent and permanent connections. Size of case $1\frac{1}{2} \times 8\frac{1}{2}$ in. Guaranteed life of battery, 20 hours intermittent or 10 hours continuous. Each \$ 1.75
- No. 2604.—Tubular Flash Light. Straight lens. $2\frac{1}{2}$ volt Mazda A bulb. With new Tungsten battery. Vulcanized fibre case. Both intermittent and permanent connections. Size of case $1\frac{1}{2} \times 6\frac{1}{2}$ in. Guaranteed life of battery 10 hours continuous or 20 hours intermittent. Each 1.80
- A convenient and compact light for those who work at night or are obliged to visit dark places.
- No. 6900.—Midget Vest Pocket Flash Light. Smallest flash light in the world. $2\frac{1}{2}$ volt Mazda A bulb. With new Tungsten battery. Nickel plated brass case, $2\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8}$ in. Guaranteed life of battery, 1 hour continuous or 2 hours intermittent. Smaller in size than the average match case and will be found invaluable in a number of ways. Each 1.25

No. 4701

Extra Battery.

- No. 4701.—Watchman's Lantern. Extra large lens and reflector. Mazda A bulb. With new Tungsten battery. Polished nickel case. Guaranteed life of battery 10 hours continuous or 20 hours intermittent. Useful everywhere as wind and storm have no effect on them. Each \$ 5.00
- Tungsten Batteries. Retain strength four times longer than the ordinary flash light battery. Each battery guaranteed as to life and service according to guarantee placed on every one. Will stand on the shelf without depreciating more than 10% for from 2 to 9 months according to size.
- No. 700.—Size $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8}$ in. Continuous service 1 hour, intermittent service 2 hours. For No. 6900. Each \$.30
- No. 790.—Size $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8}$ in. Continuous service 10 hours, intermittent 20 hours. For Nos. 2616 and 2604. " .30
- No. 705.—Size $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{8}$ in. Continuous service 10 hours, intermittent 20 hours. For Nos. 2619 and 2606. " .40

- No. 710.—Size 5×3 in. Continuous service 10 hours, intermittent service 20 hours. For lantern No. 4701. " .75

When inserting new battery see that brass contacts of battery and of bulb are bright and clean to insure perfect connection. Keep batteries in original packages—not in flash light cases. Care should be taken to see that the bulbs are firmly but carefully and gently screwed in to insure a good contact.

CLARK CARRIAGE HEATERS AND COAL

No. 5B.—Clark Heater, 12 inches long, and weighs but 4 pounds. Covered with fine Brussels carpet. Is light and handy, yet very durable and slightly. Heats quickly though with a mild and comfortable temperature. Is extensively used by mail carriers and milkmen Each \$ 2.50

No. 3D.—Clark Heater, 14 inches long and weighs 7 pounds. Asbestos lined and covered with a good grade of Brussels carpet, bound with braid. The ends are of triple strength white metal. May be easily cleaned by brushing. One of the most popular patterns, being strong and very durable Each \$ 3.50

No. 7D.—Clark Heater, 14 inches long and weighs 9 pounds. Cold drawn steel ends, heavily nickel plated and covered with superior Brussels carpet. A well known and popular style, having flat, slanting top and both side and end ventilators. Owing to this construction, it can be adjusted to throw out as much or as little heat as may be desired Each \$ 4.00

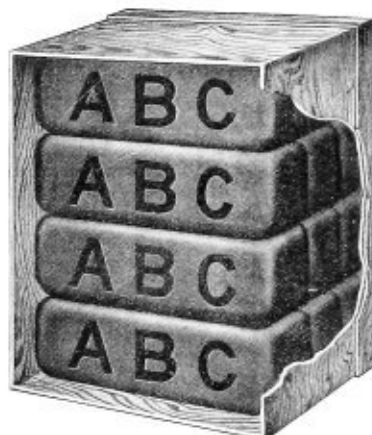

No. 7X.—Clark Heater. Designed especially for automobile use. 14 inches long and weighs 9 pounds. Extremely handsome in finish being covered with Maroon Mohair plush. The ends are of heavy stamped steel, quadruple nickel plated. With both side and end adjustable ventilators Each \$ 7.00

Clark Coal. Made from the purest ingredients and in the most careful manner. Bricks measure $7\frac{1}{2} \times 2\frac{1}{2} \times 1\frac{1}{4}$ inches in size, and each cake will burn from 12 to 15 hours. One dozen bricks in a cardboard carton.

No. 75.—Clark Coal Per dozen \$ 1.40

ABC Coal. A good grade carbon fuel that ignites easily. In bricks measuring $7\frac{1}{2} \times 2\frac{1}{2} \times 1\frac{1}{4}$ inches in size. For use in any Clark heater. One dozen bricks in a cardboard carton.

No. 60.—ABC Coal Per dozen \$ 1.20

FOOT WARMERS

Soapstone foot warmers. Selected stock and smooth finish. Furnished with wire bail or handle. Retains the heat a long time.

No. 810.—8x10 inches Per dozen \$ 6.00
One dozen in a crate.

DIRECTIONS FOR USING CLARK HEATERS

Place a piece of Clark coal in a brisk fire until it has become red throughout. Then take it out and leave it for a few seconds until the little flame which appears, has died away. Afterwards place it in the sheet metal box or drawer and insert same in the heater. Coal can be extinguished with water and used again until entirely consumed; or, in our adjustable draft heaters, by simply closing off the drafts. It can then be relighted and used until entirely consumed. One third of a cake is sufficient for an ordinary drive.

Crescent. Crucible cast steel. Mirror finish. Deep swaged blades. Three large brass rivets. Assorted 2 each ebony, boxwood and cocobolo handles to the box.

Crescent.—Inches	6	7	8
Per dozen	\$ 8.00	9.00	10.00
One-half dozen in a box.			

Perfect. Solid ebony handle. Metal bolster and "in-to-stay" fastener illustrated and described below. Deep swaged blade and extra fine finish.

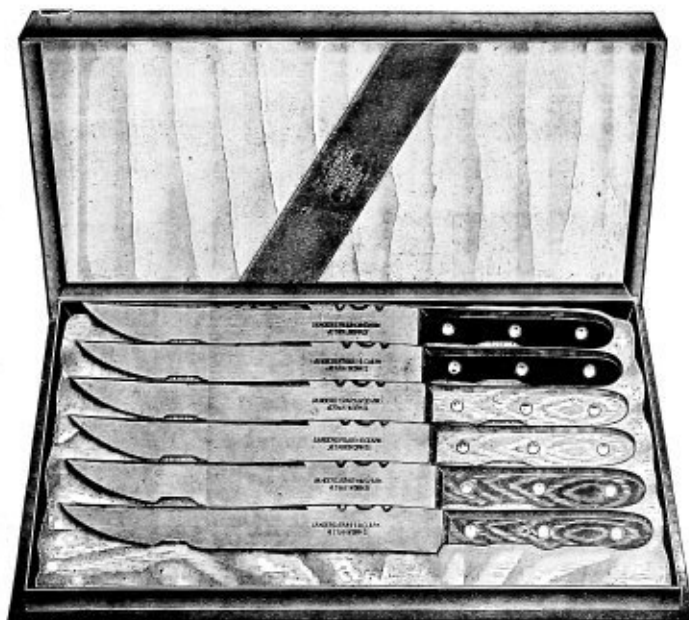

No. 3908.—Inches	6	7	8
Per dozen	\$ 8.00	10.00	12.00
One-half dozen in a box.			

This patent "in-to-stay" bolster on knife 3908 makes it handsome, practical and sanitary. The peculiar construction makes the blade, handle and bolster one solid piece. Without crack or crevice for dirt to work into and handle fastened so as to not work loose. Made to fit the hand and preserve the "hang" of the knife.

No. 2279.—Inches	6	7	8
Per dozen	\$ 9.00	11.00	13.00
One-half dozen in a box.			

No. 283A.—Assortment. 9-inch blade. Household carvers or kitchen slicers. Three large metal rivets. Contains 6 knives assorted, 2 each cocobolo, ebony and boxwood handles. In handsome satin lined display case

Per assortment \$ 4.00

One-half dozen in a box.

GIBFORD'S RED-E-FOR-USE RAZOR STROPS.

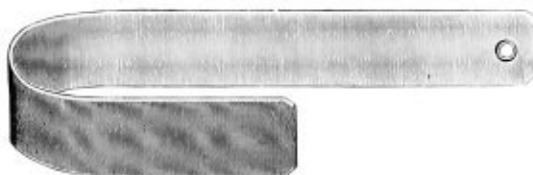

The correct principle of a first class razor strop requires two stropping surfaces to produce perfect results. One surface, for use when a razor is dull, must be of a relatively coarse texture, the other of a softer, finer texture. This will produce a smooth keen edge so necessary to perfect shaving.

The coarser surface we term the **SHARPEN SIDE**, while the softer, finer surface we call the **FINISH SIDE**.

All stropps are packed securely in boxes of sufficient length to permit each strop to lie straight without folding or doubling. Each strop, bag and box is stamped with its respective number.

"STERLING BRAND FOR QUALITY STANDS"

SHAVING BRUSHES

No. 600.—Assortment. Contains 12 Rubber-Set brushes assorted as follows:

5 No. 400.	Retail value	\$.25 each.
2 No. 221.	Retail value	.50 each.
2 No. 492.	Retail value	.60 each.
2 No. 249.	Retail value	.75 each.
1 No. 222.	Retail value	1.00 each.

Every brush a ready seller and good value for the money. Packed in handsome display case as illustrated, substantially made, covered with glass top and furnished with slide drawer. Also includes cut-open brush showing features of the "Rubber-Set" Construction.

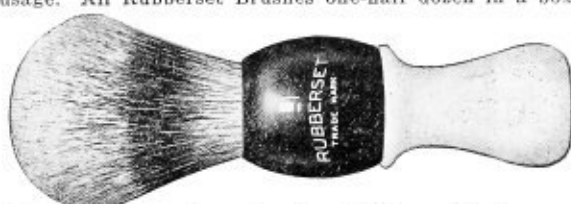

Brushes in above assortment described in detail below.

No. 600.—Assortment. 12 Rubber-Set brushes and display case. Each \$ 8.00

All brushes illustrated on this page (except Pageant and Pyramid) are "Rubber-Set" make. The butt ends of the bristles are first imbedded in a solid head of soft rubber. This head is then bound with a strong metal belt, placed in a die and vulcanized (hardened) under heat and pressure. The result is a solid vulcanized head in which the bristles are so thoroughly anchored that it retains every single one until the brush wears out. Guaranteed to stand hot water, cold water, soap and hard usage. All Rubber-Set Brushes one-half dozen in a box.

No. 332.—White Ivory handle, highly polished. Pure badger hair, very full brush. Per dozen..... \$ 36.00

Winchester. Model 1897 Riot. Rolled steel barrel bored expressly to shoot Buckshot. Plain pistol grip stock. Adopted by U. S. Army for sentry duty. Holds six shells.

No. R1897.—12 gauge. 20 inch barrel. Solid frame Each \$ 25.00

WINCHESTER TOURNAMENT. MODEL 1897.

Winchester. Model 1897 Tournament. Barrel of the celebrated Winchester rolled steel. Handsomely matted on the top and bored to shoot a close, even pattern with any trap load. All barrels are tested and none are sent out which will not shoot at least 290 pellets of shot inside a 30 inch circle at 40 yards, with a load of 3¼ drams of smokeless powder and 1¼ ounces of 7½ chilled shot. The stock is of handsome selected Walnut and has a well shaped grip, which is checked and a rubber butt plate. The comb is heavy and rounding which is a great help to quick and accurate shooting. Altogether the gun will appeal to and meet the requirements of the most exacting trap-shooters.

No. 1897T.—12 gauge. 30 inch barrel. Tournament take down Each \$ 42.00

"STERLING BRAND FOR QUALITY STANDS"

12 GAUGE.

Load Number	Drams Powder	Ounces Shot	Size Shot	Per 1000
SLX7D7 1/2	3	1 1/8	7 1/2	\$ 40.00
SLX7D6	3	1 1/8	6	40.00

UMC Nitro Club Scatter Load Shells give uniform pattern with greater penetration at 25 yards than is obtained with regular loads at 40 yards. The advantage will be apparent to brush and field sportsmen who have often missed or mutilated game at short range with choke bored guns.

WINCHESTER REPEATER BRUSH

Loaded with L. & R. Infalible Dense Smokeless Powder.

12 GAUGE.

Load Number	Grains Powder	Ounces Shot	Size Shot	Per 1000
R76L7 1/2 B	24	1 1/8	7 1/2	\$ 40.00
R76L6 B	24	1 1/8	6	40.00

The above is a new shell for field and brush shooting. So loaded as to give uniform pattern at ranges of from 25 to 30 yards when used in choke bore guns and for that reason desirable for bird shooting. The special advantage in these shells lies in the fact that the open and even pattern is obtained without loss of velocity, penetration or uniformity.

All Shells 25 in a box; 500 in a case.

GUN GREASE

- No. 80.—Stevens gun grease. Anti-rust. 2-ounce tubes. For cleaning and protecting fire arms and bright metal of any kind. One dozen in a display box. Per dozen \$ 1.20

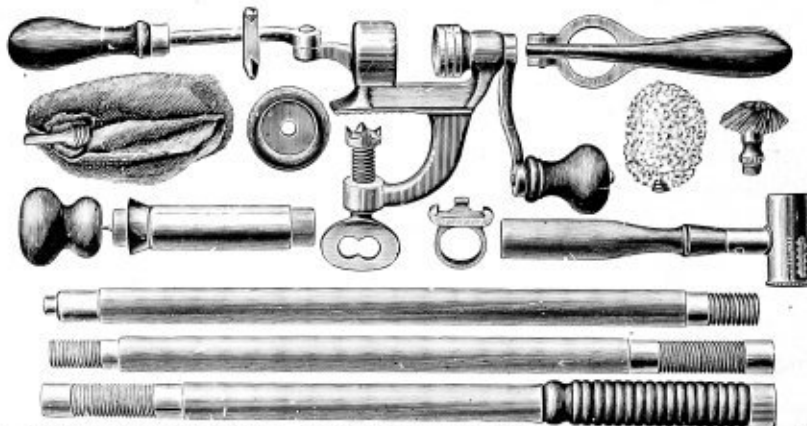

Maxim Silencers. Blued steel. Can be attached by any one without tools to any 22 caliber rifle, old or new. Any 22 caliber cartridge can be shot quietly. Can be fastened on or taken off a rifle by one twist of the wrist. The Silencer has no moving parts and cannot wear out. It needs no cleaning unless black powder cartridges are used. The slight weight of the Silencer (about 6 ounces) does not impair the balance of the gun. It is in fact an aid in target shooting. Smokeless cartridges are well adapted for rifles equipped with this Silencer.

- No. 500.—Maxim Silencer, 22 caliber..... Each \$ 5.00
One in a box.

In ordering specify the model and make of rifle for which Silencer is desired. Silencers suitable for larger caliber rifles can be furnished from factory direct. Write for information.

- No. 2.—Men's size. Brown Tan leather, well stuffed with hair. Palm grip. Laced wrist. Per set (4 Gloves) 2.70
- No. A.—Boy's size. Olive Tan leather, Brown Tan Palms, well stuffed with hair. Palm grip. Elastic wrist. Per set (4 Gloves) 2.00

One set in a box.

The patent perspiration proof lining alluded to in above descriptions has superseded the old style of leather lining. Always remains soft and pliable.

The patent adjustable palm grip instead of being sewed to the palm of the glove as formerly is only fastened at each end allowing it to move freely. Will conform to any size hand whether long or short.

The patent laced wrist makes the glove fit any sized hand, gives better ventilation and strengthens the hand and wrist.

Racer.—Length 56 inches, width 13 inches, height $6\frac{1}{4}$ inches. Weight 16 pounds. A special sled for the ambitious well grown boy. Will stand every hardship. Designed for speed and efficient control..... Per dozen \$ 51.00

No. 5.—Length 62 inches, width 16 inches, height $8\frac{1}{2}$ inches. Weight 22 pounds. Carries three grown persons or four or five children Per dozen \$ 72.00

No. 6.—Length 101 inches, width 16 inches, height $8\frac{3}{4}$ inches. Weight 41 lb. Carries 6 grown persons. Per dozen \$ 144.00
One-sixth dozen in a bundle.

FLEXIBLE FLYER FEATURES.

Steering bar.—Bends the spring-steel runners to the right or left as desired and the sled thus follows smoothly in the direction rider wishes to go without checking in any way the speed. The control is perfect and the smallest child can operate as easily as a grown-up.

Patented runners.—"T" shape spring-steel with groove along the bottom. This groove prevents skidding or slipping on icy hills or pavements.

Construction.—Only straight grained second growth ash used. Uprights or supports of pressed high carbon steel. Runners are Japanned and the wood work is handsomely decorated and finished with three coats of best grade varnish.

One dozen in a box.

No. 2.—Goodell. 5½ inches long. Solid cast steel head. Six hardened cast steel wheels. Polished steel handle with putty knife end Per dozen \$ 5.00
One dozen in a box.

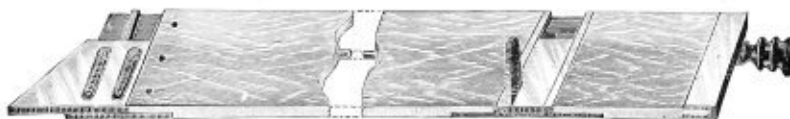

"STERLING BRAND FOR QUALITY STANDS"

PERFECTION GLASS BOARDS

WITH IMPROVED ADJUSTABLE STRAIGHT EDGE

Upper side of straight edge.

Lower side of straight edge.

Perfection Glass Board. Quickly adjusted. By merely turning a thumb nut at the end of the rule, the straight edge can be adjusted so as to cut eighths, quarters and halves of an inch, a feature not to be found on other boards. The straight edge is held firmly at both ends enabling operator to cut glass to a uniform size.

The board is made of well-seasoned lumber, made of narrow strips and will always remain true. It is ruled from side to side both ways, dividing the board into even inches. At the top is a series of perpendicular pins, one for each inch and at the bottom a corresponding series of horizontal pins. The straight edge is provided at each end with a laterally adjustable gauge connected with and moved simultaneously equal distances by a connecting rod. This feature makes it impossible to move one gauge more than the other. When even inches are to be cut, these gauges are brought even with the right hand side of the straight edge. The wedge shaped point is inserted between the perpendicular pins and the plug at the other end of the straight edge is dropped between the horizontal pins at the desired inch.

TILE-LIKE

FLOORS

It makes the best and most durable finish on floors. Can be used on hard or soft wood.

OLD FURNITURE

It erases all scratches and mars.

WICKER FURNITURE

Coated with Tile-Like gives it an appearance as if new.

PORCH CHAIRS

Coated with Tile-Like makes a beautiful finish.

LINOLEUM or OIL CLOTH

Coated with Tile-Like adds to wear. Will resist water and never turns white.

DEAD BLACK

One coat Tile-Like Dead Black applied to tarnished Chandeliers, Lamps or Fire Fronts makes a beautiful finish.

All old work should be washed with scouring soap before applying Tile-Like.

Be sure the work is thoroughly dry.

"WEARS LIKE TILE"

TILE-LIKE

RENEWES EVERYTHING

TILE-LIKE

Tile-Like is a varnish and stain combined, and more than that it is a colored varnish that requires no stirring.

Tile-Like stains and varnishes at the same time and will not hide the grain of the wood. When used on floors it will make a perfect floor varnish. It is made in eight (8) different colors, in flat yellow black and gloss white. It is the only article of its kind that is particularly adapted for the use of the practical man.

It is uniform in color, a quality which gives it an advantage over other like materials.

Tile-Like is sold on its merits and not through magazine advertising.

TILE-LIKE

Tile-Like is made from a hard Kauri Gum combined with Linseed and China Wood Oils so as to make a hard, tough, elastic finish and which combines readily with the coloring matter to give the desired shade. It works easily, is slow in setting and can be rubbed in twenty-four hours. It is suitable for all kinds of interior work, particularly where the matter of wear and tear is an item.

JAP-A-LAC COLOR CARD

Alabastine

The Sanitary Wall Coating

Selecting the Colors

Placing the Order

**It Does Not Pay to Stock Goods That Are
Unadvertised and Unknown**
Simply Because They are Sold Cheap

Alabastine

The Stylish Wall Tint

Is in demand among the people; they come into your store for it. It is recognized as **Quality Goods**. It is not a Cheap Kalsomine; it is not in that class. The Alabastine Co.'s liberal policy of telling people about Alabastine, and their willingness to help the householder in getting his home properly decorated, is developing a wonderfully increased demand year by year.

Coaxing Trade

These who do not sell Alabastine are missing an opportunity to not only add a profit maker to their line, but a trade coxer as well. Every person who is planning to use Alabastine, also needs a number of accessory articles, such as Brushes, Paints, Tacks, Hammers and a thousand and one odds and ends. Why not get the whole trade?

Alabastine pays a generous profit. It coaxes trade to your store.

Alabastine

The Sanitary Wall Coating

Dealers sell Alabastine because it is advertised, in demand, affords a good margin of profit, is recognized as a high grade article and draws customers to the dealer's store.

Practical men use Alabastine because it is easy to mix, requiring only cold water, has rich, beautiful, velvety tints, and because, with Alabastine, decorators can get a larger and better class of work and give the housekeeper the material that she asks for on her walls.

Sample Tints of Regular Alabastine

A
Durable
Coating,
Not a
Kalsomine.
—
Protected

"STERLING BRAND FOR QUALITY STANDS"

We have secured from Geo. D. Wetherill & Co., Inc., the exclusive sale of their Wetherill's Atlas Prepared Paint and Manufactured Specialties for Western Pennsylvania, Eastern Ohio and West Virginia, and are in a position to fill all orders promptly.

In placing before our patrons the old and well-known line of Wetherill's Atlas Prepared Paints we feel that we have selected a paint of the highest quality, manufactured by one of the oldest concerns in the country.

Established in 1807 they have built up an enviable reputation by over One Hundred Years of Honest Effort.

ATLAS Prepared Paint is without a peer. No Paint can be made better. It is in all the Perfect Paint.

One Gallon of ATLAS covers three hundred square feet two coats. You will note the Guarantee to give satisfaction.

To ascertain the amount of paint required—Add the number of feet in width to the number of feet in length, (both sides:) this multiplied by the average height, gives the number of square feet to be painted. This divided by 300—as one gallon of this paint covers 300 square feet (two coats), gives the amount required in gallons.

Example:

Front, 40 ft.	180 ft.
Rear, 40 ft.	(Multiply) Height, 35
Side, 50 ft.	
Side, 50 ft.	300)6300
	180
	21 gal. for 2 coats

This is an approximate estimate. Should the surface be smooth and hard, less will be required; if rough, more.

The agency propositions offered to dealers are more than liberal. The system of Advertising and Sales Co-operation are the very best. We will gladly inform you in detail as to all of the Paint Schemes.

Prices of Wetherill's ATLAS Prepared Paint are as follows:

"STERLING BRAND FOR QUALITY STANDS"

VARNISHES

Cleveland varnishes. For architectural and general purpose use. In the assortment will be found varnishes suitable for every class of regular work from the finest exterior or interior finishes down to the small package goods for household use. The Permanere finishes, in fact all the Cleveland varnishes are well and favorably known throughout this section. Not new or experimental grades but, on the contrary, have been on the market for more than a quarter of a century during which they have proven their right to occupy first rank.

For free-working and easy-rubbing qualities, they stand without a peer, while they excel in extreme paleness and transparency. In addition their deep, rich, full lustre and above all their long wearing qualities commend them for every practical purpose of the painter and decorator.

We give on this and the following pages a brief description of each grade, together with the prices on the several size packages in each that are regularly carried in stock. These are all regarded as staple by the trade. In addition we are prepared to meet the requirements of the manufacturing trades and of others whose methods and facilities necessitate the use of Varnishes, Baking Japans or Drying Japans of special adaptability for their business.

PERMANERE EXTERIOR FINISH

The most durable wood and metal preservative manufactured. Prepared specially for finishing exteriors, doors, vestibules, window sills and all exposed work; equally good for use over grained or painted surfaces and canvas. Light in color, transparent and has a brilliant and lasting lustre. Sets dust free in from six to eight hours and hardens next day.

Capacity, gallons	1	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{8}$
Per can	\$4.50	\$2.35	\$1.25	\$0.65

PERMANERE INTERIOR FINISH

An interior finish of the highest possible quality; made specially for application on interiors, new or old. Excellent for stores, hospitals, laundries, institutions, etc. Protects and beautifies both wood and metal; light in color, elastic and durable. Has an excellent lustre; can be washed without injury. Works easily under the brush; dries dust free in from four to six hours; can be rubbed in forty-eight hours and polished the third day.

Capacity, gallons	1	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{8}$
Per can	\$3.25	\$1.75	\$0.90	\$0.50

PERMANERE FLOOR FINISH

The highest quality floor finish manufactured. Remarkable for its extreme durability; gives long life to linoleum. Has a brilliant gloss, can be washed without injury and does not spot from contact with mud or water. Retains its lustre under constant exposure to severe wear, and is so elastic that it yields readily under the heel or under pressure of heavy furniture without breaking. Dries dust free in from four to six hours; hardens quickly and thoroughly. Can be rubbed or polished or left in the gloss, as desired.

Capacity, gallons	1	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{8}$
Per can	\$3.25	\$1.75	\$0.90	\$0.50

CLEVELAND FLEXIBLE FLOOR VARNISH

A tough, elastic varnish for floors; possesses specially quick-drying and easy-working qualities. Very durable; does not crack under pressure of the heel or mar white. Dries dust free in from four to five hours; hardens well in eighteen hours.

Capacity, gallons	1	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{8}$
Per can	\$2.75	\$1.45	\$0.80	\$0.45

"STERLING BRAND FOR QUALITY STANDS"

VARNISHES

CLEVELAND INTERIOR SPAR VARNISH

A waterproof, general utility varnish suitable for almost every purpose. Withstands the action of ammonia fumes, and is recommended for finishing toilets, bathrooms, stables, etc., either in the natural or over painted or grained surfaces. Has a fine lustre, very elastic, wears well. Will not spot white and can be washed without injury. Works freely under the brush; dries free from dust in four to six hours; hardens in twenty-four hours.

Capacity, gallons	5	1	$\frac{1}{2}$	$\frac{1}{4}$
Per can	\$10.50	\$2.20	\$1.20	\$0.65

CLEVELAND NO. 1 COACH VARNISH

A varnish that no Master Painter can afford to be without. Can be used in emergency cases for almost any purpose. Wears well, is elastic and will not crack or water spot. Has been used successfully for outside work. Mixes readily with colors; medium light in color; medium heavy in body. Dries dust free in from four to six hours; hardens in from eighteen to twenty hours.

Capacity, gallons	1	$\frac{1}{2}$	$\frac{1}{4}$
Per can	\$2.20	\$1.20	\$0.65

CLEVELAND SPECIAL INTERIOR COACH VARNISH

A gloss varnish, for interior finishing, exceptionally economical, yields uniformly satisfactory results. A quick, useful and popular grade. Dries dust free in from three to four hours; hardens in from sixteen to eighteen hours.

Capacity, gallons	5	1	$\frac{1}{2}$	$\frac{1}{4}$
Per can	\$9.50	\$2.00	\$1.10	\$0.60

CLEVELAND EXTRA WHITE DAMAR VARNISH

A varnish, pale, transparent and heavy in body, made from Damar gum. Mixes freely with white pigment. Will not discolor delicate shades. Dries hard in from ten to twelve hours.

Capacity, gallons	1	$\frac{1}{2}$	$\frac{1}{4}$
Per can	\$2.50	\$1.35	\$0.70

CLEVELAND SPECIAL FURNITURE VARNISH

A gloss varnish for furniture and general interior work. Medium light in color, has good lustre and works easily under the brush. Dries dust free in a few hours and hardens in about fifteen hours.

Capacity, gallons	1	$\frac{1}{2}$	$\frac{1}{4}$
Per can	\$1.40	\$0.80	\$0.45

CLEVELAND SPECIAL HARD OIL FINISH

An inexpensive but good grade of Hard Oil Finish, made specially for house interiors. Has given full satisfaction to many users for many years. Medium pale in color, possesses good lustre; can be rubbed to a dull or egg-shell finish if desired. Works easily under the brush; dries dust free in from three to four hours; hardens quickly.

Capacity, gallons	5	1	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{8}$
Per can	\$7.75	\$1.65	\$0.90	\$0.50	\$0.30

CLEVELAND LIQUID FILLER

The most economical of all pigment wood fillers manufactured; particularly suitable for quick and medium-class work. Medium light in color, of good quality and yields good results. Works easily under the brush; dries hard; can be sanded freely in from ten to twelve hours.

Capacity, gallons	1	$\frac{1}{2}$	$\frac{1}{4}$
Per can	\$1.25	\$0.75	\$0.40

"STERLING BRAND FOR QUALITY STANDS"

VARNISHES

CLEVELAND TURPENTINE JAPAN DRIER

A useful dryer in considerable demand. Mixes perfectly with raw linseed oil, and well adapted for use in connection with all grades of paint except those of the most delicate color. Very elastic; an exceptionally good binder; strong in drying qualities.

Capacity, gallons	1	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{8}$
Per can	\$1.50	\$0.85	\$0.50	\$0.30

CLEVELAND DRYING JAPAN, NO. 33

An exceptionally low-priced grade, decidedly strong in drying qualities. Has medium body; mixes freely with linseed oil; does not curdle paint.

Capacity, gallons	5	1	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{8}$
Per can	\$4.50	\$1.00	\$0.60	\$0.35	\$0.20

CLEVELAND ASPHALTUM VARNISH

A good, durable grade, fairly heavy in body. Produces a brilliant, black, lasting finish. Dries free from dust very quickly and hardens with good toughness in from four to six hours.

Capacity, gallons	1	$\frac{1}{2}$	$\frac{1}{4}$
Per can	\$1.10	\$0.65	\$0.40

CLEVELAND NO. 1 BRONZING LIQUID

Made expressly for carrying metal powders such as bronze, silver, aluminum, etc. Mixes with and holds the mineral powder in suspension. Not affected by heat or cold. Prevents to a large extent the mineral from tarnishing after being applied to radiators, etc.

Capacity, gallons	1	$\frac{1}{2}$	$\frac{1}{4}$
Per can	\$1.40	\$0.80	\$0.45

ARROWHEAD NO. 1 COACH VARNISH

A general purpose household varnish. Suitable for use over either grained or painted surfaces. Mixes readily with colors. Medium in color and body. Put up in round friction top cans—very convenient for the user.

Capacity	1 quart	1 pint	$\frac{1}{2}$ pint
Per can	\$0.55	\$0.33	\$0.20

ARROWHEAD NO. 1 FURNITURE VARNISH

A general utility varnish. Particularly suitable for household renovation. Medium clear and transparent with a good lustre. Spreads easily and does not show the marks of the brush. Dries in a few hours. Put up in round friction-top cans—just the thing for the use of the household.

Capacity	1 quart	1 pint	$\frac{1}{2}$ pint
Per can	\$0.40	\$0.26	\$0.17

ARROWHEAD NO. 1 ASPHALTUM VARNISH

A black, heavy asphaltum that works freely under the brush and dries very quickly. In round friction top cans to fill the demand for such a piece of goods wanted in small packages.

Capacity	1 quart	1 pint	$\frac{1}{2}$ pint
Per can	\$0.35	\$0.22	\$0.14

LINGERWETT PAINT AND VARNISH REMOVER

For removing paint or varnish from iron, metal, wood, glass or any surface. Will be found to work equally well on upright, overhead or flat surfaces. Does not raise the grain or discolor the most delicate woods and leaves the surface in perfect condition for re-finishing. It is quick, safe and far more economical than the old method of torch-burning. Wherever tried has always given satisfaction.

Capacity	1 gal.	$\frac{1}{2}$ gal.	1 qt.	1 pt.	$\frac{1}{2}$ pt.
Per can	\$2.50	\$1.35	\$0.70	\$0.40	\$0.25
